Recommendations for the Inspection, Maintenance and Management of Car Park Structures. National Steering Committee for the Inspection of Multi-storey Car Parks Institution of Civil Engineers. National Steering Committee for the Inspection, Maintenance and Management of Car Park Structures, 2002 **Concrete Structure Management - Guide to Ownership and Good Practice** fib Fédération internationale du béton, 2008-01-01 Construction projects are undertaken to meet a variety of business service and aspirational objectives and needs The success of a building or an element of infrastructure depends on how well it meets the owner s needs and interests or those of the users Recent changes in owner attitudes to construction are reflected in an increasing interest in through life costs i e not only the capital costs of construction but also the operational costs associated with a structure s functional performance for a defined life span The owner can greatly improve the likelihood of achieving the value they seek from the facility by being intimately and effectively involved in the definition of performance requirements at the start of the construction procurement process The objective of fib Bulletin 44 is to provide guidance to owners of concrete structures on the management of their concrete structures buildings and infrastructure as part of their business goals or the service objectives of their organization best practice in the management of concrete structures their responsibilities with respect to the management of their concrete structures the wider context and issues of service life design information and direction needed by the supporting professional team of architects engineers specifiers contractors and others This Guide also provides background information on topics such as deterioration processes and technical procedures used for the management of concrete structures including reference to international standards for the protection

and repair of concrete structures These activities are illustrated by application examples case histories and by a section addressing frequently asked questions A brief review is made of some potential future developments *Car Park Designers' Handbook* Jim Hill, Glynn Rhodes, Steve Vollar, Chris Whapples, 2005 Car Park Designers Handbook looks at multi storey car parks as being utilitarian constructions The authors do not see their design as being a finite art but as a compromise between the motorist's spatial desires and the practical need to achieve economy of construction Case Studies of Rehabilitation, Repair, Retrofitting, and Strengthening of Structures Mourad M. Bakhoun, 2010 **Management of Deteriorating Concrete Structures** George Somerville, 2008-02-14 Demolishing and rebuilding is becoming less and less of an option and developing trends such as the growth of PFI are directing attention to whole life costing With the relentless drive towards greater sustainability proper asset management of the existing infrastructure will become increasingly important in the future This authoritative book describes **ICE Handbook of Concrete Durability** Marios Soutsos, 2023-10-24 ICE Handbook of Concrete Durability second edition is a comprehensive practical reference for professionals involved in design and maintenance of concrete structures of all types It is an invaluable guide for construction professionals including design engineers consultants and contractors as well as postgraduate students **Recommendations for the Inspection, Maintenance and Management of Car Park Structures Second Edition** Leo McKibbins, 2018 Concrete Repair Michael G. Grantham, 2011-04-04 Concrete is an inherently complex material to produce and an even more complex material to repair With growing pressure to maintain the built environment and not simply to demolish and rebuild the need to repair concrete buildings and other structures is increasing and is expected to become of greater importance in the future This straightforward **Parking Management Best Practices** Todd Litman, 2020-03-04 This book is a blueprint for developing an integrated parking plan It explains how to determine parking supply and affect parking demand as well as how to calculate parking facility costs It also offers information about shared parking parking maximums financial incentives tax reform pricing methods and other management techniques What types of locations benefit from parking management Places with perceived parking problems Areas with rapidly expanding population business activity or traffic Commercial districts and other places with compact land use patterns Urban areas in need of redevelopment and infill Places with high levels of walking or public transit or places that want to encourage those modes Districts where parking problems hinder economic development Areas with high land values Neighborhoods concerned with equity including fairness to nondrivers Places with environmental concerns Unique landscapes or historic districts in need of preservation *Structural Concrete Textbook, Volume 5* fib Fédération internationale du béton, 2012-06-01 The third edition of the Structural Concrete Textbook is an extensive revision that reflects advances in knowledge and technology over the past decade It was prepared in the intermediate period from the CEP FIP Model Code 1990 MC90 to fib Model Code for Concrete Structures 2010 MC2010 and as such incorporates a significant amount of information that has been already finalized for MC2010 while keeping some

material from MC90 that was not yet modified considerably The objective of the textbook is to give detailed information on a wide range of concrete engineering from selection of appropriate structural system and also materials through design and execution and finally behaviour in use The revised fib Structural Concrete Textbook covers the following main topics phases of design process conceptual design short and long term properties of conventional concrete including creep shrinkage fatigue and temperature influences special types of concretes such as self compacting concrete architectural concrete fibre reinforced concrete high and ultra high performance concrete properties of reinforcing and prestressing materials bond tension stiffening moment curvature confining effect dowel action aggregate interlock structural analysis with or without time dependent effects definition of limit states control of cracking and deformations design for moment shear or torsion buckling fatigue anchorages splices detailing design for durability including service life design aspects deterioration mechanisms modelling of deterioration mechanisms environmental influences influences of design and execution on durability fire design including changes in material and structural properties spalling degree of deterioration member design linear members and slabs with reinforcement layout deep beams management assessment maintenance repair including conservation strategies risk management types of interventions as well as aspects of execution quality assurance formwork and curing The updated textbook provides the basics of material and structural behaviour and the fundamental knowledge needed for the design assessment or retrofitting of concrete structures It will be essential reading material for graduate students in the field of structural concrete and also assist designers and consultants in understanding the background to the rules they apply in their practice Furthermore it should prove particularly valuable to users of the new editions of Eurocode 2 for concrete buildings bridges and container structures which are based only partly on MC90 and partly on more recent knowledge which was not included in the 1999 edition of the textbook
