## **Reconstructing Societies In The Aftermath Of War:**

**The Role of International Law in Rebuilding Societies After Conflict** Brett Bowden, Hilary Charlesworth, Jeremy Matam Farrall, 2009-04-16 The genesis of this book was a workshop entitled Empire or Empowerment The Role of International Law in Building Democracy and Justice after Conflict held at the Australian National University in Canberra on 9-10 August 2007

**Reconstructing Post-Saddam Iraq** Sultan Barakat, 2007-08-16 Previously published as a special issue of Third World Quarterly this volume seeks to analyze to what extent the controversial US policy of democratizing the Middle East with pre-emptive invasions was justified or effective Post 9/11 the US developed a policy of War on Terror taking the decision to democratize the Middle East with pre-emptive in Southern Society and Its Transformations, 1790-1860

Susanna Delfino, Michele Gillespie, Louis M. Kyriakouides, 2011-07-29 In Southern Society and Its Transformations a new set of scholars challenge conventional perceptions of the antebellum South as an economically static region compared to the North Showing that the pre-Civil War South was much more complex than once thought the essays in this volume examine the economic lives and social realities of three overlooked but important groups of southerners the working poor non-slaveholding whites and middling property holders such as small planters professionals and entrepreneurs The nine essays that comprise Southern Society and Its Transformations explore new territory in the study of the slave era South conveying how modernization took shape across the region and exploring the social processes involved in its economic developments The book is divided into four parts each analyzing a different facet of white southern life The first outlines the legal dimensions of race relations exploring the effects of lynching and the significance of Georgia's vagrancy laws Part II presents the advent of the market economy and its effect on agriculture in the South including the beginning of frontier capitalism The third section details the rise of a professional middle class in the slave era and the conflicts provoked The book's last section deals with the financial aspects of the transformation in the South including the credit and debt relationships at play and the presence of corporate entrepreneurship Between the dawn of the nation and the Civil War constant change was afoot in the American South Scholarship has only begun to explore these progressions in the past few decades and has given too little consideration to the economic developments with respect to the working class experience These essays show that a new generation of scholars is asking fresh questions about the social aspects of the South's economic transformation Southern Society and Its Transformations is a complex look at how whole groups of traditionally ignored white southerners in the slave era embraced modernizing economic ideas and actions while accepting a place in their race-based world This volume will be of interest to students of Southern and US economic and social history

**Reconstructing Spain** Dacia Viejo-Rose, 2011 This book explores the role of cultural heritage in post-conflict reconstruction whether as a motor for the prolongation of violence or as a resource for building reconciliation The research was driven by two main goals to understand the post-conflict reconstruction process and to identify how this process evolves in the medium term and the impact it has on society The

Spanish Civil War 1936-39 and its subsequent phases of reconstruction provides the primary material for this exploration. In pursuit of the first goal, the book centers on the material practices and rhetorical strategies developed around cultural heritage in post-civil war Spain and the victorious Franco regime's reconstruction. The analysis captures a discursively complex set of practices that made up the reconstruction and in which a variety of Spanish heritage sites were claimed, rebuilt or restored and represented as signs of historical narratives, political legitimacy and group identity. The reconstruction of the town of Gernika is a particularly emblematic instance of destruction and a significant symbol within the Basque regions of Spain as well as internationally. By examining Gernika, it is possible to identify some of the trends common to the reconstruction as a whole along with those aspects that pertain to its singular symbolic resonance. In order to achieve the second goal, the book examines the processes of selection, value change and exclusionary dynamics of reconstruction. Exploring the possible impact of post-civil war reconstruction in the medium term is conducted in two time frames: the period of political transition that followed General Franco's death in 1975 and the 2004-2008 period when Rodríguez Zapatero's government undertook initiatives to recover the historic memory of the war and dictatorship. Finally, the observations made of the Spanish reconstruction are analyzed in terms of how they might reveal general trends in post-conflict reconstruction processes in relation to cultural heritage. These insights are pertinent to the situations in Cambodia, Bosnia and Herzegovina, Afghanistan and Iraq.

*Violence and Post-war Reconstruction* Christina Steenkamp, 2009-05-30 The uncomfortable truth about peace accords is that often they do not bring about a real and lasting peace while the conflict is officially over, civilians still live with the daily threat of violence. It is generally assumed that this does not pose a threat to the peace process, yet the author shows how, in reality, violence that occurs at this time and within this context has a unique potential to cause damage. In this much-needed and pioneering study, the author shows the impact of continuing physical insecurity upon the postwar reconstruction process. Examining the type of violence when it occurs and the identity of those who commit it, she reveals the serious implications for the reconstruction of state polity and society and for the quality of peace that emerges. She shows how the use of violence to address everyday problems becomes increasingly acceptable, explores the use of violence by organized groups in society and pays particular attention to civilian reactions to post-accord insecurity. In a final chapter, she identifies a range of important considerations for the better understanding of a vital yet often neglected aspect of postwar reconstruction.

**Rebuilding Communities After Displacement** Mo Hamza, Dilanthi Amaratunga, Richard Haigh, Chamindi Malalgoda, Chathurangane Jayakody, Anuradha Senanayake, 2023-02-19 This book presents a collection of double-blind peer-reviewed papers under the scope of sustainable and resilient approaches for rebuilding displaced and host communities. Forced displacement is a major development challenge, not only a humanitarian concern. A surge in violent conflict as well as increasing levels of disaster risk and environmental degradation driven by climate change has forced people to leave or flee their homes, both internally displaced as well as refugees. The rate of forced displacement befalling in

different countries all over the world today is phenomenal with an increasingly higher rate of the population being affected on daily basis than ever. These displacement situations are becoming increasingly protracted, many lasting over 5 years. Therefore, there is a need to develop more sustainable and resilient approaches to rebuild these displaced communities, ensuring the long-term satisfaction of communities and enhancing the social cohesion between the displaced and host communities. Accordingly, chapters are arranged around five main themes of rebuilding communities after displacement: Response management for displaced communities; The Built environment in resettlement planning; Governance of displacement; Socio-Economic interventions for sustainable resettlement.

*Mathematical Communities in the Reconstruction After the Great War 1918-1928* Laurent Mazliak, Rossana Tazzioli, 2021-03-27. This book is a consequence of the international meeting organized in Marseilles in November 2018 devoted to the aftermath of the Great War for mathematical communities. It features selected original research presented at the meeting, offering a new perspective on a period the 1920s not extensively considered by historiography. After 1918, new countries were created and borders of several others were modified. Territories were annexed while some countries lost entire regions. These territorial changes bear witness to the massive and varied upheavals with which European societies were confronted in the aftermath of the Great War. The reconfiguration of political Europe was accompanied by new alliances and a redistribution of trade, commercial, intellectual, artistic, military, and so on, which largely shaped international life during the interwar period. These changes also had an enormous impact on scientific life, not only in practice but also in its organization and communication strategies. The mathematical sciences, which from the late 19th century to the 1920s experienced a deep disciplinary evolution, were thus facing a double movement, internal and external, which led to a sustainable restructuring of research and teaching. Concomitantly, various areas such as topology, functional analysis, abstract algebra, logic, or probability, among others, experienced exceptional development. This was accompanied by an explosion of new international or national associations of mathematicians, with, for instance, the founding in 1918 of the International Mathematical Union and the controversial creation of the International Research Council. Therefore, the central idea for the articulation of the various chapters of the book is to present case studies illustrating how, in the aftermath of the war, many mathematicians had to organize their personal trajectories, taking into account the evolution of the political, social, and scientific environment, which had taken place at the end of the conflict.

**Art from Trauma** Rangira Béatrice Gallimore, Gerise Herndon, 2019-08. What is the role of aesthetic expression in responding to discrimination, tragedy, violence, even genocide? How does gender shape responses to both literal and structural violence, including implicit linguistic, familial, and cultural violence? How might writing or other works of art contribute to healing? *Art from Trauma: Genocide and Healing beyond Rwanda* explores the possibility of art as therapeutic, capable of implementation by mental health practitioners, crafting mental health policy in Rwanda. This anthology of scholarly, personal, and hybrid essays was inspired by scholar and activist Chantal Kalisa in 1965. 2015. At the commemoration

of the nineteenth anniversary of the genocide in Rwanda organized by the Rwandan Embassy in Washington DC Kalisa gave a presentation Who Speaks for the Survivors of the Genocide against Tutsi Kalisa devoted her energy to giving expression to those whose voices had been distorted or silenced The essays in this anthology address how the production and experience of visual dramatic cinematic and musical arts in addition to literary arts contribute to healing from the trauma of mass violence offering preliminary responses to questions like Kalisa's and honoring her by continuing the dialogue in which she participated with such passion sharing the work of scholars and colleagues in genocide studies gender studies and francophone literatures

**Sustainable Peace** Arnim Langer, Graham K. Brown, 2016-06-16 Countries emerging from civil war or protracted violence often face the daunting challenge of rebuilding their economy while simultaneously creating the political and social conditions for a stable peace The implicit assumption in the international community that rapid political democratisation along with economic liberalisation holds the key to sustainable peace is belied by the experiences of countries such as Iraq and Afghanistan Often the challenges of post conflict reconstruction revolve around the timing and sequencing of different reform that may have contradictory implications Drawing on a range of thematic studies and empirical cases this book examines how post conflict reconstruction policies can be better sequenced in order to promote sustainable peace The book provides evidence that many reforms that are often thought to be imperative in post conflict societies may be better considered as long term objectives and that the immediate imperative for such societies should be people centred policies

**Post-Conflict Reconstruction** Neil Ferguson, 2010-10-12 Violence and conflict are two of the greatest challenges the world will face in this millennium Indeed since the turn of the century it is estimated that approximately four million people have died as a result of armed conflict Ending these seemingly intractable conflicts is a priority for global stability However the signing of the peace accord or the ending of formal hostilities does not automatically bring a return to normality in these fractured societies In practice it is more likely that these fractured societies will face a period in the twilight between war and peace a time when the world turns its attention to new problems and seemingly more pressing matters leaving the country to struggle towards peace and a new social order The book's contributors deal with the challenges faced in creating the foundations for the development of a positive peace from a variety of multi disciplinary perspectives such as development studies politics psychoanalysis psychology sports studies and neuroscience This breadth of perspectives offers innovative insights into the grey space between war and peace which is home to millions of people across the globe and explores interventions which aim to create the conditions for positive post conflict reconstruction

**Reconstructing Conflict** Dr Colin Flint, Dr Scott Kirsch, 2012-11-28 Reconstruction the rebuilding of state economy culture and society in the wake of war is a powerful idea and a profoundly transformative one From the refashioning of new landscapes in bombed out cities and towns to the reframing of national identities to accommodate changed historical narratives the term has become synonymous with notions of post conflict society it draws much of its rhetorical power from the neat demarcation both spatially and temporally between war and peace The reality is far more complex In this volume reconstruction is identified as a process of conflict and of militarized power not something that clearly demarcates a post war period of peace Kirsch and Flint bring together an internationally diverse range of studies by leading scholars to examine how periods of war and other forms of political violence have been justified as processes of necessary and valid reconstruction as well as the role of war in catalyzing the construction of new political institutions and destroying old regimes Challenging the false dichotomy between war and peace this book explores instead the ways that war and peace are mutually constituted in the creation of historically

specific geographies and geographical knowledges      Decades of Reconstruction Ute Planert, James Retallack, 2017-06-13 International scholars review decades of postwar reconstruction in international comparison from the eighteenth to the twentieth century demonstrating how foreign domestic policy cannot be separated      **Gender Dynamics and Post-conflict Reconstruction** Christine Eifler, Ruth Seifert, 2009 This volume by international authors deals with the role of gender dynamics in the development of post conflict societies The authors describe and analyze diverse aspects of the intertwining of gender and other social and cultural relations from an interdisciplinary perspective They analyze gendered post conflict dynamics in diverse contexts asking for the consequences these developments have in the settings under investigation such as Eastern and Southeastern Europe Palestine and Afghanistan      Conflict Prevention and Peace-building in Post-War Societies T. David Mason, James D. Meernik, 2006-05-02 This volume provides an overview of the costs benefits consequences and prospects for rebuilding nations emerging from violent conflict The rationale for this comes from the growing realization that in the post Cold War era and in the aftermath of 9 11 our understanding of conflict and conflict resolution has to include consideration of the conditions conducive to sustaining the peace in nations torn by civil war or interstate conflict The chapters analyze the prospects for building a sustainable peace from a number of different perspectives examining the role of economic development democratization respect for human rights the potential for renewal of conflict the United Nations and other critical topics In an age when nation building is once again on the international agenda and scholars as well as policy makers realize both the tremendous costs and benefits in fostering developed democratic peaceful and secure nations the time has truly come for a book that integrates all the facets of this important subject Conflict Prevention and Peace building in Post War Societies will appeal to students and scholars of peace studies international relations security studies and conflict resolution as well as policy makers and analysts      Echoes of Conflict: Tales of Antiquity and Timeless Battles Pasquale De Marco, 2025-07-15 Immerse yourself in Echoes of Conflict Tales of Antiquity and Timeless Battles an enthralling exploration of the enduring legacy of war and its profound impact on humanity Delve into the depths of ancient feuds and timeless struggles as this thought provoking book offers a multifaceted perspective on the complexities of conflict and the enduring allure of peace From the dawn of civilization humanity has been embroiled in a seemingly endless cycle of warfare Greed power and ideology have fueled countless battles leaving an indomitable imprint on the tapestry of human history Yet amidst the chaos and destruction there have also been moments of profound heroism resilience and the relentless pursuit of peace Echoes of Conflict delves into the art of war examining the strategies tactics and technological innovations that have shaped the face of battle throughout the ages It explores the intricate relationship between war and society shedding light on the impact of conflict on gender roles economies and the environment Furthermore it delves into the profound psychological and emotional toll that war inflicts on individuals and communities The wounds of war are not only physical but also deeply embedded in the psyche leaving lasting scars that endure long after the fighting has ceased Finally the book examines the
