Drug and Substance Abuse Among Older Adults Louis A. Pagliaro,Ann Marie Pagliaro,2022-03-07 Drug and Substance Abuse Among Older Adults provides a timely comprehensive overview and analysis of the silent epidemic of drug and substance abuse involving elderly Americans Combining the authors individual 50 plus years of formal academic and clinical experience the book presents a critical reflective analysis and synthesis of the published research associated with older adult psychotropic drug use and abuse in the United States Chapters delineate related causes and consequences and

provide the reader with guidance on how to minimize and effectively deal with this significant and growing problem. Related professional reminders throughout each chapter emphasize and remind readers of important basic content and principles while common misbeliefs regarding specific abusable psychotropics and their use by older adults are debunked and corrected. Also included are carefully developed figures and tables to supplement chapter content along with explicit guides and tools to facilitate the assessment and diagnosis of abusable psychotropic dependence or use disorder. Health and social care professionals in the U S will learn to assess and diagnose abusable psychotropic dependence or use disorders among older adults and to provide clients quickly and accurately with appropriate efficacious and empirically validated treatment.

The Quarterly, 1992 Nicotine Addiction C. Tracy Orleans, John D. Slade, 1993. Despite persistent warnings from the medical profession about the health risks involved in cigarette smoking, millions of people continue to smoke cigarettes. With contributions from renowned experts, this ground-breaking work defines and explains nicotine addiction as a primary problem or disease instead of as a habit or risk factor for other diseases. A comprehensive clinical text on tobacco dependence, this book provides clinicians with essential information on how to diagnose and treat nicotine addicted patients. It also offers the medical, epidemiological, and behavioral science backgrounds necessary for understanding the process and dynamics of tobacco dependence. Following the traditional format of medical texts, the book first covers etiology, pathogenesis, and complications, then diagnosis and treatment, and finally public health and prevention. Part One presents an overview of the biological, psychological, and social factors that contribute to nicotine dependence, including such topics as a description of nicotine delivery systems, psychopharmacology, economics, natural history, and epidemiology, mortality, morbidity, and environmental tobacco smoke exposure. The second part offers practical guidelines and tools for treating nicotine dependence and describes a stepped care treatment model with brief interventions that can be easily integrated into routine medical practice. This section also covers the role of psychopharmacologic and formal treatment programs, the treatment of smokeless tobacco addiction, and treating nicotine dependence in pregnant women and in people with medical illnesses, other chemical dependencies, or psychiatric disorders. The last section focuses on worksite and community intervention programs and summarizes the research on smoking patterns and history in women, Blacks, Hispanics, youth, and older adults, discussing how intervention and prevention programs could be made more effective in these groups. Written by the nation's leading tobacco control researchers and clinicians, this important work contains new and critical information not previously available.
