Disaster Recovery Project Management Randy R. Rapp, 2011 The scope of disasters ranges from man made emergency to natural calamity from a kitchen grease fire to a hurricane or volcanic eruption It may be just one house that is destroyed or perhaps a whole infrastructure system is threatened While each type of event requires a very different scale and type of immediate response the project management challenges that face

restoration and reconstruction professionals after the emergency phase is complete are remarkably similar Using insights acquired through decades of real world experience as well as from his academic research and teaching responsibilities the author explains pertinent requirements and methods for the contractors and other professionals who bring order from chaos The first section of the book surveys the managerial skills required to confront the range of disasters that might be encountered and the different project environments involved The second section examines the details of project management and administration from materials management to health and safety The third and final section provides an overview of restoration techniques from restorative drying to debris management and demolition This is the first systematic presentation of the tools and skills needed for disaster recovery project management It is designed primarily for contractors both large and small firms although it will also be of value for those who might hire them the communities they serve and their organizational partners in the disaster recovery effort Those who are new to disaster restoration and reconstruction will find the volume particularly useful Focused on informing the management of projects that recover the built environment after emergency conditions sufficiently stabilise the volume supplements and complements books devoted to conventional construction or emergency relief management

Climbing the Holy Mountain of Recovery Adrian Auler,2015-12-02 This story is about the development of my heroin addiction and my recovery from it I struggled to escape from addiction for 17 years but only succeeded after an ibogaine treatment It is autobiographical but I only describe traumatic episodes that contributed to addiction and sketch the highlights and milestones in my recovery It is a memoir as it offers a thematic view of my life and is moderate in scope and a personal essay in which I offer insights about societys role in addiction My intent is that addicts and their loved ones may better understand the nature of addiction so their approaches to treatment are better informed and more compassionate At 66 I am a gentleman hipster Seeker and scholar but Im not an armchair academic who wrote this book from a library I was an addict for 22 years Now I am blessed to be alive and have 18 years clean My mission is to help addicts by educating the public and the professional community about addictions complexity and the efficacy of ibogaine for its treatment I hope my story supports a change in social and medical attitudes so that the unheard voices of addicts will be honored instead of just seeing them as social problems Addiction put my life into suspended animation when I had a third of the credits I needed for a bachelors degree 27 years later I returned to school now I have bachelors degrees in Anthropology and Psychology and a Masters degree in East West Psychology EWP I am currently a PhD candidate in EWP at the California Institute of Integral Studies in San Francisco California
