**The Privileges and Immunities of International Organizations in Domestic Courts** August Reinisch, 2013-09-12

International organizations are increasingly operating across borders and engaging in legal transactions in virtually all jurisdictions. This makes familiarity with the applicable law and practice imperative for both international organizations and those who engage in legal relations with them. Furthermore, the issue of whether how and to what extent domestic courts take into account decisions of foreign and international courts and tribunals in their own decision making has become increasingly important in recent years. This book provides a comprehensive empirical study of this transnational judicial dialogue focusing on the law and practice of domestic jurisdictions concerning the legal personality, privileges and immunities of international organizations. It presents a selection of detailed country by country studies examining the manner of judicial dialogue across domestic jurisdictions and between national and international courts. The approach taken in this book intersects with three highly topical areas of international legal scholarship: the rapidly evolving law of international institutions; the burgeoning research into the role of domestic courts in the international legal system; and the recent rise of empirically oriented legal scholarship. Utilizing OUP's International Law in Domestic Courts database, the book presents analysis of little known cases which have real international significance, illustrating the impact and extent of transnational judicial dialogue in the international legal system. The book provides important perspectives on the evolution and status of the law of immunity of international organizations and contributes to the understanding of relationships between national courts and between national and international courts. *Transconstitutionalism* Marcelo Neves, 2013-05-01

Transconstitutionalism is a concept used to describe what happens to constitutional law when it is emancipated from the state in which can be found the origins of constitutional law. Transconstitutionalism does not exist because a multitude of new constitutions have appeared but because other legal orders are now implicated in resolving basic constitutional problems. A transconstitutional problem entails a constitutional issue whose solution may involve national, international, supranational and transnational courts or arbitral tribunals as well as native local legal institutions. Transconstitutionalism does not take any single legal order or type of order as a starting point or *ultima ratio*. It rejects both nation statism and internationalism, supranationalism, transnationalism and localism as privileged spaces for solving constitutional problems. The transconstitutional model avoids the dilemma of monism versus pluralism. From the standpoint of transconstitutionalism, a plurality of legal orders entails a complementary and conflicting relationship between identity and alterity. Constitutional identity is rearticulated on the basis of alterity. Rather than seeking a Herculean Constitution, transconstitutionalism tackles the many-headed Hydra of constitutionalism, always looking for the blind spot in one legal system and reflecting it back against the many others found in the world's legal orders. Ethics of Human Rights A. Reis Monteiro, 2014-03-11 This

volume focuses on the ethical significance of human rights aiming at contributing to a universal culture of human rights with deep roots and wide horizons Its purpose scope and rationale are reflected in the three part structure of the manuscript Part I has a broad introductory historical theoretical and legal character Part II submits that an Ethics of Human Rights is best understood as an Ethics of Recognition of human worth dignity and rights Moreover it is argued that human worth consists in the perfectibility of the human species rooted in its semiotic nature to be accomplished through the perfecting of human beings for which the right to education is key In Part III the main legal and political outcomes of the Human Rights Revolution are described and answers to the most lasting and common criticisms of human rights are provided To conclude the human stature of the Big Five drafters of the Universal Declaration of Human Rights is profiled and the priority that should be recognized to human rights education is highlighted Some appendices supplement the manuscript While making a case for the high value and liberating power of the idea and ideal of human rights objections controversies and uncertainties are not at all overlooked and emerging issues are explored The diversity of content of this volume meets many needs of the typical syllabus for a human rights course
