Cook, 2014-03-06 On the fiftieth anniversary of Quotations from Chairman Mao this pioneering volume examines the book as a global historical phenomenon *Kitchen Con* Trevor White, 2012-06 In this tart tautly written hilariously funny insider look at the restaurant

business Trevor White offers an impassioned unbiased exposé of the world of dining out From the most fashionable tables in New York London and Paris to local fast food chains he takes us behind the scenes and demonstrates that all too often we are being conned or cowed by overrated egomaniacal chefs pretentious waiters and self important critics whose cursory evaluations and often prejudiced reviews can sound the death knell of a worthy eatery A scathing attack on gourmet dogma

White's defiantly populist critique of today's restaurant culture redefines the dining room as a place in which people have the right to be satisfied rather than intimidated. Included too is a fascinating conversation between celebrity chef Anthony Bourdain and the author where both reveal their respective viewpoints on the culinary world.

Book jacket *The FIDIC Red Book Contract* Christopher Seppälä, 2023-04-25

Conditions of Contract for Construction known universally as the Red Book published by the International Federation of Consulting Engineers known by its French acronym FIDIC is the most widely used standard form of international construction contract. This book is a detailed commentary on the 2022 reprint of the 2017 FIDIC Red Book. For each of the Red Book's 168 Sub Clauses the commentary identifies changes from the 1999 edition, analyses the meaning and significance of the Sub Clause and lists related Sub Clauses, describes related international arbitration awards, national court decisions and legal principles and where appropriate proposes amendments to improve the Sub Clause. As the FIDIC Yellow and Silver Books are very similar to the Red Book, much of the commentary is equally applicable to those forms of contract. The author is a FIDIC insider having served for more than thirty years as Legal Special Adviser to or Member of the FIDIC Contracts Committee which is responsible for preparing FIDIC's contracts. This book is an indispensable resource for all parties called on to work with a FIDIC contract. With guidance for every stage of a construction project whether in drafting, negotiating, performing, interpreting or administering a FIDIC contract, the book's easy-to-use structure includes such issues and topics as the following: introduction to FIDIC and its contracts and to publications of FIDIC and others relevant to the Red Book; including the 2022 FIDIC Contracts Guide; critical examination of each Sub Clause and advice for amending the same in order to better adapt it to the interests of each party, the Employer or the Contractor; special attention to each Sub Clause relating to the Contractor's and the Employer's claims and claims procedure and to how to assert claims effectively as well as to time bars and other pitfalls and how they may be overcome; detailed examination of Sub Clauses relating to the referral of issues or disputes to the Dispute Avoidance Adjudication Board and if necessary to international arbitration and optimal strategies for doing so; discussion of the changes required to the 2017 Red Book by The World Bank's Conditions of Particular Application COPA reference where appropriate to the UNIDROIT Principles of International Commercial Contracts and trade usages; comprehensive discussion of practical issues that arise under common law, civil law and international legal principles especially when a contract is with a state or public body; comparison of common law and civil law methods of contract interpretation and a suggested practical approach to interpretation given a FIDIC contract's international arbitration clause and overcoming problems that can arise when a contract is governed by the law of a less developed country; Legal and technical terms are clearly defined and numerous figures and tables are included to illustrate steps in contract procedures. Detailed attention is paid to terminological distinctions among the various legal traditions including a comparison of British English and American English construction contract terms. Unquestionably the most detailed and thorough commentary ever published on the FIDIC Red Book, this highly practical work enables preparers

of FIDIC contracts to amend and adapt the Red Book's provisions to a particular project. Dispute adjudicators, arbitrators and judges will welcome the book's authoritative guidance on interpreting the provisions of a FIDIC contract and engineers and other construction professionals involved in contract administration will appreciate the book's many practical features.

Routledge Handbook of Food as a Commons Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17. From the scientific and industrial revolution to the present day, food, an essential element of life, has been progressively transformed into a private transnational mono-dimensional commodity of mass consumption for a global market. But over the last decade, there has been an increased recognition that this can be challenged and reconceptualized if food is regarded and enacted as a commons. This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought, interpreted and practiced around the old/new paradigms of commons and commoning. The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and reimagined from a commons perspective. Chapters do not define the notion of commons but engage with different schools of thought: the economic approach based on rivalry and excludability; the political approach recognizing the plurality of social constructions and incorporating epistemologies from the South; the legal approach that describes three types of proprietary regimes: private, public and collective; and different layers of entitlement bundles of rights and the radical activist approach that considers the commons as the most subversive, coherent and history-rooted alternative to the dominant neoliberal narrative. These schools have different and rather diverging epistemologies, vocabularies, ideological stances and policy proposals to deal with the construction of food systems, their governance, the distributive implications and the socio-ecological impact on Nature and Society. The book sparks the debate on food as a commons between and within disciplines, with particular attention to spaces of resistance, food sovereignty, de-growth, open knowledge, transition, town occupations, bottom-up social innovations and organizational scales: local, food, national, policies, South-South collaborations, international governance and multi-national agreements. Overall, it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food, the planet and living beings.

The Encyclopedia of the Industrial Revolution in World History Kenneth E. Hendrickson III, 2014-11-25. As editor Kenneth E. Hendrickson III notes in his introduction: Since the end of the nineteenth century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West, after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth and Japan. In *The Encyclopedia of the Industrial Revolution in World History*, contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. *The Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but

scholarly explorations of topics from the aerospace industry to zaibatsu Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization Entries include generous selections of biographical figures and human communities with articles on entrepreneurs working men and women families and organizations They also cover legal developments disasters and the environmental impact of the Industrial Revolution Each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information The Encyclopedia of the Industrial Revolution in World History includes over 300 illustrations as well as artfully selected extended quotations from key primary sources from Thomas Malthus Essay on the Principal of Population to Arthur Young s look at Birmingham England in 1791 This work is the perfect reference work for anyone conducting research in the areas of technology business economics and history on a world historical scale
