Science Fiction, Canonization, Marginalization, and the Academy Gary Westfahl, George Slusser, 2002-01-30 Science fiction occupies a peculiar place in the academic study of literature For decades scholars have looked at science fiction with disdain and have criticized it for being inferior to other types of literature But despite the sentiments of these traditionalists many works of science fiction engage recognized canonical texts such as the *Odyssey* and many traditionally canonical works contain elements of science fiction More recently the canon has been subject to revision as scholars have deliberately sought to include works that reflect diversity and have participated in the serious study of popular culture But these attempts to create a more inclusive canon have nonetheless continued to marginalize science fiction This book examines the treatment of science fiction within the academy The expert contributors to this volume explore a wide range of topics related to the place of science fiction in literary studies These include academic attitudes toward science fiction the role of journals and cultural gatekeepers in canon formation and the marginalization of specific works and authors by literary critics In addition the volume gives special attention to multicultural and feminist concerns In discussing these topics the book sheds considerable light on much broader issues related to the politics of literary studies and academic inquiry

Reload Mary Flanagan, Austin Booth, 2002-05-03 An anthology of feminist cyberfiction and theoretical and critical writings on gender and technoculture Most writing on cyberculture is dominated by two almost mutually exclusive visions the heroic image of the male outlaw hacker and the utopian myth of a gender free cyberworld *Reload* offers an alternative picture of cyberspace as a complex and contradictory place where there is oppression as well as liberation It shows how cyberpunk's revolutionary claims conceal its

ultimate conservatism on matters of class gender and race The cyberfeminists writing here view cyberculture as a social experiment with an as yet unfulfilled potential to create new identities relationships and cultures The book brings together women s cyberfiction fiction that explores the relationship between people and virtual technologies and feminist theoretical and critical investigations of gender and technoculture From a variety of viewpoints the writers consider the effects of rapid and profound technological change on culture in particular both the revolutionary and reactionary effects of cyberculture on women s lives They also explore the feminist implications of the cyborg a human machine hybrid The writers challenge the conceptual and institutional rifts between high and low culture which are embedded in the texts and artifacts of cyberculture
