Yeh, 2011-02-02 This book is intended to fill a knowledge gap in the study of contemporary high rise living While there has been much documentation on the engineering and technological aspects of tall buildings relatively little has been written about the social and livability of high rise Much less is written about Asian cities even though Asia is the current hotbed of high rise development Even though traditional discourse of high rise housing is not always positive new forces are redefining its place in 21st century urbanity Many cities around the world are reembracing high rise in urban agenda under current narrative of sustainable development High rise is fast becoming a priority area in international research agenda The quest is for livable and sustainable high rise development Against the background of current trends globalization urbanization mixed use development and new built taller buildings in inner city areas in both developed and developing countries this book examines the software design economics estate management legal and property rights physical environment planning community development and social dimensions of high rise living Analysis is with the widely acclaimed successful high rise public housing in Hong Kong and Singapore to understand the advantages and worries of high rise living and to distill the key points and lessons in the making of a good highrise living environment Hong Kong and Singapore have been constructing high rise for more than four decades each The majority of their population has moved to live in high rise selecting to live high rise and registering consistently high residential satisfaction The height of apartment buildings in both cities continues to rise The tallest is anticipated to be 70 storey It is the contention of this book that contrary to earlier common negative discourses on public high rise living the high rise environment may yet offer urban residents a satisfying dwelling experience Leading housing academics researchers and practitioners in the two cities have contributed to this book This book presents a timely contribution to our understanding of a widening urban phenomenon that will affect a growing number of the world s population **The Most Radical Gesture**

The Figural Jew Sarah Hammerschlag, 2010-05-15 The rootless Jew wandering disconnected from history homeland and nature was often the target of early twentieth century nationalist rhetoric aimed against modern culture But following World War II a number of prominent French philosophers recast this maligned figure in positive terms and in so doing transformed postwar conceptions of politics and identity Sarah Hammerschlag explores this figure of the Jew from its prewar usage to its resuscitation by Jean Paul Sartre Emmanuel Levinas Maurice Blanchot and Jacques Derrida Sartre and Levinas idealized the Jew's rootlessness in order to rethink the foundations of political identity Blanchot and Derrida in turn used the figure of the Jew to call into question the very nature of group identification By chronicling this evolution in thinking Hammerschlag ultimately reveals how the figural Jew can function as a critical mechanism that exposes the political dangers of mythic allegiance whether couched in universalizing or particularizing terms Both an intellectual history and a philosophical argument *The Figural Jew* will set the agenda for all further consideration of Jewish identity modern Jewish thought and continental philosophy

Decolonizing 1968 Burleigh Hendrickson, 2022-11-15 *Decolonizing 1968* explores how activists in 1968 transformed university campuses across Europe and North Africa into sites of contestation where students administrators and state officials collided over definitions of modernity and nationhood after empire Burleigh Hendrickson details protesters versions of events to counterbalance more visible narratives that emerged from state controlled media centers and ultimately describes how the very education systems put in place to serve the French state during the colonial period ended up functioning as the crucible of postcolonial revolt Hendrickson not only unearths complex connections among activists and their transnational networks across Tunis Paris and Dakar but also weaves together their overlapping stories and participation in France's May 68 Using global protest to demonstrate the enduring links between France and its former colonies *Decolonizing 1968* traces the historical relationships between colonialism and 1968 activism examining transnational networks that emerged and new human and immigrants rights initiatives that directly followed As a result Hendrickson reveals that 1968 is not merely a flashpoint in the history of left wing protest but a key turning point in the history of decolonization Thanks to generous funding from Penn State and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories

Organicity Dobereiner David Dobereiner, 2019-10-15 Nature is endlessly reinventing itself in a constant flux of movement and diversity Yet the advancement of modern civilization has engendered extreme inequality social division and an imbalance between society and nature Our technological proficiency has given our species the illusion of omnipotence in our efforts to build robots more like us we have not noticed

how robotic we ourselves have become To deal with this profound crisis we must understand this problem at its roots Could the origins of social domination and ecological exploitation be related Is it possible for us to transform these dynamics and design society in a way that is cognizant of and harmonious with the Earth In this visionary book David Dobereiner lucidly delves into the present urban and ecological impasse and examines the prospects for our future Laced with insights into social and political ecology and written with a lifetime s experience of innovating in ecological design Organicity shows that there is still hope to build a more humane egalitarian and sustainable system but it requires a fundamental shift in the way we do civilization At the crossroads of creation and destruction will evolution or entropy triumph

the World Stanley Aronowitz is professor of sociology and cultural studies at the Graduate Center of the City University of New York He is the author most recently of *Left Turn Forging a New Political Future* *The Knowledge Factory* and *How Class Works* *The American Politics of French Theory* Jason Demers, 2019-01-01 Working from the premise that May 68 is a shorthand that delimits an intensive decade of global revolt Jason Demers documents the cross pollination of French philosophy international activist movements and American countercultures From the assassinations of Martin Luther King Jr and George Jackson to the revolt at Columbia University the 1968 Democratic National Convention Woodstock and the Weather Underground Demers writes French theory into a constellation of American events and icons uncontained by national borders More than a compelling new take on the history of theory *The American Politics of French Theory* develops concepts gleaned from the work of Derrida Deleuze Guattari and Foucault providing new tools for thinking about translation theory and politics By recontextualizing French theory within a complex fabric of mass communication and global revolt Demers demonstrates why it is politically potent and methodologically necessary to think of translation associatively **The Wind From the East** Richard Wolin, 2017-11-14 How Maoism captured the imagination of French intellectuals during the 1960s Michel Foucault Jean Paul Sartre Julia Kristeva Phillipe Sollers and Jean Luc Godard During the 1960s a who's who of French thinkers writers and artists spurred by China's Cultural Revolution were seized with a fascination for Maoism Combining a merciless exposé of left wing political folly and cross cultural misunderstanding with a spirited defense of the 1960s *The Wind from the East* tells the colorful story of this legendary period in France Richard Wolin shows how French students and intellectuals inspired by their perceptions of the Cultural Revolution and motivated by utopian hopes incited grassroots social movements and reinvigorated French civic and cultural life Wolin's riveting narrative reveals that Maoism's allure among France's best and brightest actually had little to do with a real understanding of Chinese politics Instead it paradoxically served as a vehicle for an emancipatory transformation of French society Recounting the cultural and political odyssey of French students and intellectuals in the 1960s *The Wind from the East* illustrates how the Maoist phenomenon unexpectedly sparked a democratic political sea change in France **The Capture of Speech and Other Political Writings** Michel de Certeau, 1997-01-01 In this foundational exploration of political expression and participation de Certeau examines who has the right to speak how this right is acquired and what happens when this right is denied or inhibited He emphasizes that all too often free speech is upheld in the abstract while social institutions work in such a way to deny access to effective communication **The Imaginary Revolution** Michael M. Seidman, 2004 The events of 1968 have been seen as a decisive turning point in the Western world The author takes a critical look at May 1968 and questions whether the events were in fact as revolutionary as French and foreign commentators have indicated He concludes the student movement changed little that had not already been challenged and altered in the late fifties and early sixties The workers strikes led to fewer working hours and higher wages but these reforms reflected the secular demands of the French labor movement May

1968 was remarkable not because of the actual transformations it wrought but rather by virtue of the revolutionary power that much of the media and most scholars have attributed to it and which turned it into a symbol of a youthful renewed and freer society in France and beyond
