Pacific Malcolm Hodges, 2001 *China's Coercion of States in the Asia-Pacific Region* Maximilian Ernst, 2025-02-11 This book explains why China chooses to coerce Asia Pacific regional states despite the risk of such actions creating a backlash and complicating its strategic calculus China s coercion of neighboring states often a variation of heavy informal economic sanctions combined with diplomatic pressure and gray zone coercive measures has been increasingly observable in the past decade It has become an important tool in China s foreign policy toolbox and is frequently used by Beijing to shape the security political environment of the Asia Pacific The book begins with an appreciation of China s complicated geopolitical exposition and an understanding that such coercion creates backlash since the target state will likely be alienated and pushed into closer security cooperation with the United States China s main geopolitical rival Through two in depth case studies of Chinese coercion targeting the Philippines and South Korea respectively the book demonstrates that first the reason China coerces is that the secondary state engages in actions that fundamentally threaten China s security interests and second it will coerce these states only if other policy options geared to change the secondary state s course of action have not worked Employing balance of power theory and particularly wedge strategies the book solves a pertinent research question and improves our knowledge of contemporary security politics in the Asia Pacific This book will be of interest to students scholars and practitioners of Asia Pacific security Chinese foreign policy and international relations **India as an**

urgency to address state on state competition at sea more strongly felt than in the Indo Pacific region where freedom of navigation stands challenged by regional states continuous investments in naval power and the renewed political will to use it The international groups of distinguished contributors to this volume survey and analyze the implications of the return of naval power as a critical consideration of international relations in the Indo Pacific region Catherine L Grant Alessio Patalano and James A Russell develop an original framework in which five factors of influence help explain how and why naval power matters in this pivotal part of the world for cooperation coercion and competition The chapters also provide historical background outline key issues and conduct a close examination of key subregions This book will be read by both academics and policy makers alike seeking to navigate the complexity of maritime security and regional affairs Project on Nuclear Issues Mark Cancian, 2017-05-09 The role that nuclear weapons play in international security has changed since the end of the Cold War but the need to maintain and replenish the human infrastructure for supporting nuclear capabilities and dealing with the multitude of nuclear challenges remains essential Recognizing this challenge CSIS launched the Project on Nuclear Issues PONI in 2003 to develop the next generation of policy technical and operational nuclear professionals through outreach mentorship research and debate PONI runs two signature programs the Nuclear Scholars Initiative and the Annual Conference Series to engage emerging nuclear experts in thoughtful and informed debate and research over how best to address the nuclear community's most pressing problems The papers included in this volume comprise research from participants in the 2016 Nuclear Scholars Initiative and the PONI Conference Series PONI sponsors this research to provide a forum for facilitating new and innovative thinking and to provide a platform for emerging thought leaders across the nuclear enterprise Spanning a wide range of technical and policy issues these selected papers further serious discussion in their respective areas **Strategic Regions in 21st Century Power Politics** Jakub Landovský, Martin Riegl, Irina Valko, 2014-11-19 Resource wars identity conflicts disinformation geostrategic rivalries global power shifts and an increasing number of non state actors make it difficult to analyse contemporary international relations At the same time contemporary power rivalries are increasingly affected by currency wars economic diplomacy competitive intelligence economic warfare indirect strategies and state capitalism The events in Ukraine in Spring 2014 reconfirm that Thomas Friedman's flattening of the world based on the coincidence of the collapse of the Berlin Wall and the emergence of Netscape and the Web workflow software uploading outsourcing offshoring supply chaining insourcing in forming and steroids like Facebook and Instagram goes hand in hand with the fact that as postulated by Robert Kaplan geography still matters in a global world Globalization exists because of local processes and local processes are ultimately shaped by globalization Geography remains among the primary factors shaping a country's foreign policy This book addresses the most fundamental geopolitical issues observable in a region where the great game of geopolitics is particularly still alive in East and South East Asia The contemporary geopolitical situation in this part of the world is far from stable the width and depth of economic integration in the region

resonates with the nature of political relations crises in the global financial system climate change and the regional security architecture inherited from the Cold War era In terms of power relations the particular changes in the region s status quo imply an immediate intensification of the PRC s activities within the framework of political and security dialogue with its direct neighbors ultimately leading to a rivalry between China and the United States The studies presented in this book largely focus on East and South East Asian actors and problems while studies of the situation in other global regions enrich the research by adding a global dimension to the study of regional geopolitical affairs *China Views Nine-Eleven* Mei Renyi,Yan Xunhau,2020-05-15 The events of September 11 2001 had reverberations which were felt across the world not just in the United States In their aftermath the United States refocused its foreign policies a process that had a major impact upon the Asia Pacific region especially China In this cross disciplinary collection of essays almost two dozen scholars the majority of them from China range across a wide spectrum of issues to address just how Nine Eleven affected the United States globally and at home Different authors discuss non Americans images of the United States the nation s international position and policies the mindset and influence of neo conservatives American internal politics debates over immigration the cultural repercussions of Nine Eleven for television literature drama art and music and the implications of efforts to commemorate the events of September 11 2001 Uniting all these essays is the effort to view the events of September 11 2001 not in isolation but in a much broader context a framework encompassing the entire sweep of US involvement in the world since the seventeenth century and the country s political intellectual cultural and literary history and traditions The dialogue among them produces a complicated and fruitful dialectical network of cross fertilization across different areas a stimulating and intricate cat s cradle from which the enterprising reader may draw new and profitable intellectual discoveries

Deterrence, Diplomacy and the Risk of Conflict Over Taiwan Bill Emmott,2024-07-15 Russia s full scale invasion of Ukraine confirmed that revived great power competition has heightened the prospect of global conflict while restoring the concept of deterrence to centre stage The stakes in a conflict in East Asia however would be even higher than those in Ukraine A war over Taiwan could bring the United States and China the world s two greatest powers into a direct military conflict which would represent a contest for regional or global leadership and would be likely to draw other powers into the fight Such a war in which the nuclear question would be ever present can currently be described as possible avoidable but potentially catastrophic In this Adelphi book Bill Emmott evaluates the diplomatic and deterrence strategies that countries in and outside the Indo Pacific region are using to try to reduce the risk of that conflict occurring This book examines these strategies in the light of the lessons of the Ukraine war and identifies yardsticks with which to gauge their potential effectiveness and sustainability Our goal Emmott argues must be for all sides to regard such a US China conflict as inevitably catastrophic and therefore inconceivable *China, Faits Accomplis and the Contest for East Asia* Joshua Hastey,2023-04-28 This book explores China s use of faits accomplis in its periphery and offers the first formal model for the

use of faits accomplis by rising powers With growing attention to great power competition and conflict in the gray zone between war and peace this book explains China's use of faits accomplis to revise the maritime status quo in the South and East China Seas Using formal modelling and case study analysis the book argues that while power shifts provide rising states with opportunities to impose faits accomplis to revise the status quo the use of faits accomplis also increase the likelihood of war with the dominant state's The book surveys existing understandings of how power shifts incentivize interstate competition in general and in the case of Sino American competition in particular and brings existing theory and novel modelling to explain China's differing strategies in the South and East China Seas in the first two decades of the 21st century The book concludes by using the lessons from these cases to assess the strategic options available to both states and conditions that make a peaceful resolution more likely This book will be of much interest to students of Chinese politics Asian security studies and International Relations

The Nexus of Naval Modernization in India and China Christopher K.

Colley,2024-03-14 Naval modernization is an extremely expensive time consuming and a relatively rare phenomenon Scholars have proposed various arguments to explain this process ranging from bureaucratic politics to nationalism and to the security dilemma The Nexus of Naval Modernization in India and China demonstrates that from 1990 until 2020 the primary driver of naval modernization resulted from a strategic rivalry Key to strategic rivalries is perceived threat perceptions that cause decision makers to prepare for worst case scenarios when trying to decipher their enemy's behaviour When a state believes it is threatened by a rival's naval power it is likely to pursue its own form of naval modernization for self protection Importantly rivalries do not exist in a vacuum and are frequently linked This project will reveal how the interconnected nature of rivalries can also cause naval modernization Through a close examination of scholarly works government documents and in depth focused interviews with experts based in India China Australia and the U S Colley argues that while strategic rivalry is not the only driver of naval modernization it is the most compelling explanation Other arguments are frequently embedded within the strategic rivalry model and thus are best seen as only partial drivers This study contributes to the rivalry research program as well as the policy and security studies literatures

New Regional Geopolitics in the Indo-Pacific Priya Chacko, 2016-04-14. During the last twenty years, burgeoning transnational trade, investment and production linkages have emerged in the area between the Indian and Pacific Oceans. The appearance of this area of interdependence and interaction and its potential impact on global order has captured the attention of political leaders and the concept of the Indo-Pacific region is increasingly appearing in international political discourse. This book explores the emergence of the Indo-Pacific concept in different national settings. Chapters engage with critical theories of international relations, regionalism, geopolitics and geoeconomics in reflecting on the domestic and international drivers and foreign policy debates around the Indo-Pacific concept in Australia, India, the United States, Indonesia and Japan. They evaluate the reasons why the concept of the Indo-Pacific has captured the imaginations of policy makers and policy analysts in these countries and assess the implications of competing interpretations of the Indo-Pacific for conflict and cooperation in the region. A significant contribution to the analysis of the emerging geopolitics of the Indo-Pacific, this book will be of interest to researchers in the field of Asian Studies, International Relations, Regionalism, Foreign Policy Analysis and Geopolitics.

Red Star Over Malaya Cheah Boon Kheng, 2012-01-01. Red Star Over Malaya is an account of the inter-racial relations between Malays and Chinese during the final stages of the Japanese occupation. In 1947, none of the three major races of Malaya—Malays, Chinese and Indians—regarded themselves as pan-ethnic Malaysians with common duties and problems. With the occupation forcibly cut them off from China, Chinese residents began to look inwards towards Malaya and stake political claims, leading inevitably to a political contest with the Malays. As the country advanced towards nationhood and self-government, there was tension between traditional loyalties to the Malay rulers and the states or to ancestral homelands elsewhere and the need to cultivate an enduring loyalty to Malaya on the part of those who would make their home there in the future. As Japanese forces withdrew from the countryside, the Chinese guerrillas of the communist-led resistance movement, the Malayan People's Anti-Japanese Army (MPAJA), emerged from the jungle and took control of some 70 per cent of the country's smaller towns and villages, seriously alarming the Malay population. When the British Military Administration sought to regain control of these liberated areas, the ensuing conflict set the tone for future political conflicts and marked a crucial stage in the history of Malaya. Based on extensive archival research, Red Star Over Malaya provides a riveting account of the way the Japanese occupation reshaped colonial Malaya and of the tension-filled months that followed.
