Foreign Language Learning with Digital Technology

Michael Evans, 2009-04-07 Provides a sustained and in depth qualitative analysis of the use of digital technology within the field of foreign language learning drawing on empirical evidence **Handbook of Undergraduate Second Language Education** Judith W. Rosenthal, 2013-06-17 This volume offers the most comprehensive up to date description of the wide array of second language programs currently available to undergraduate students in the United States and abroad It brings together for the first time detailed descriptions of programs in foreign language English as a second language ESL dual language bilingual American Sign Language Native American and heritage languages Addressing both theory and practice the volume presents the historical development current practices and future directions of each type of program along with detailed case studies For second language teachers academic administrators and teacher educators this Handbook provides information that will be useful in making instructional and programmatic planning decisions **Self-Esteem and Foreign**

Language Learning Fernando Rubio, 2021-02-19 Self Esteem and Foreign Language Learning deals with a topic which has been given surprisingly little attention in Second and Foreign Language Acquisition studies. Although there are several studies dealing with general education, this volume addresses the need to take self-esteem into consideration in the language classroom and adopts both theoretical research and practical perspectives with the hope of being useful for both researchers and practitioners. The book is organized into three main parts. Part I serves as an introduction to self-esteem. Part II reports on the existing literature about the theory and research dealing with self-esteem and foreign language learning, and Part III includes procedures for implementation and activities for classroom applications. Self Esteem and Foreign Language Learning is edited by Fernando Rubio, PhD, a researcher and teacher at the University of Huelva in Spain. Most of the chapters have been written by members of the research group Affective factors in language learning, which has also published a book on Multiple Intelligences and the teaching of English. Dr. Jane Arnold, Dr. Carmen Fonseca, etc. There are two outside contributions: one is by Andrew Wright, author of numerous publications for language teachers, and the other by Veronica de Andr s, teacher trainer from the University of El Salvador, Argentina, and member of the executive board of the International Council for Self Esteem. Dr. Elaine Horwitz of the University of Texas has contributed a preface. First Language Use in Second and Foreign Language Learning Miles Turnbull, Jennifer Dailey-O'Cain, 2009-08-24 This volume offers fresh perspectives on a controversial issue in applied linguistics and language teaching by focusing on the use of the first language in communicative or immersion type classrooms. It includes new work by both new and established scholars in educational scholarship, second language acquisition, and sociolinguistics, as well as in a variety of languages, countries, and educational contexts. Through its focus at the intersection of theory, practice, curriculum, and policy, the book demands a reconceptualization of code switching as something that both proficient and aspiring bilinguals do naturally and as a practice that is inherently linked with bilingual code switching. The SAGE Handbook of Gender and Education Christine Skelton, Becky Francis, Lisa Smulyan, 2006-10-23 The Handbook of Gender and Education brings together leading scholars on gender and education to provide an up-to-date and broad-ranging guide to the field. It is a comprehensive overview of different theoretical positions on equity issues in schools. The contributions cover all sectors of education, from early years to higher education, curriculum, subjects, methodological and theoretical perspectives, and gender identities in education. Each chapter reviews syntheses and provides a critical interrogation of key contemporary themes in education. This approach ensures that the book will be an indispensable source of reference for a wide range of readers: students, academics, and practitioners. The first section of the Handbook, Gender Theory and Methodology, outlines the various feminist perspectives on researching and exploring gender and education. The section critiques the notion of gender as a category in educational research and considers recent trends, evident especially in the gender and underachievement debates, to locate gender difference solely within biology. This section provides the broad background upon which the issues and debates in the other

sections can be situated Section two Gender and Education considers the differing ways in which gender has been shown to impact upon the opportunities and experiences of pupils students teachers and other adults in the different sectors of education It also includes a chapter on single sex schooling Section three Gender and School Subjects comprises chapters that cover gender issues within the teaching and learning of particular school subjects for example maths literacy and science It also includes topics such as sex education and assessment The chapters in section four Gender identity and educational sites address up to date issues which have a long history in terms of explorations into gender and educational opportunities More recent inclusions in the debates such as disability sexuality and masculinities are discussed alongside the more traditional concerns of race social class and femininities The final section Working in Schools and Colleges illuminates the working lives of teachers and academics The chapters cover such topics as school culture career progression and development and the gendered identities of professionals within educational institutions The contributors to this book have been selected by the editors as authorities in their specific area of gender and education and are drawn from the international scholarly community

Speaking and Instructed Foreign Language Acquisition Mirosław Pawlak, Ewa Waniek-Klimczak, Jan Majer, 2011-07-04 Developing the ability to speak in a foreign language is an arduous task This is because it involves the mastery of different language subsystems simultaneous focus on comprehension and production and the impact of a range of social factors This challenge is further compounded in situations in which learners have limited access to the target language Thus there is a need to explore issues related to teaching learning and testing speaking with a view to translating the guidelines based on theoretical positions and research findings into feasible and context specific pedagogical recommendations This is the rationale behind this book which considers speaking from leading theoretical perspectives investigates individual variables which affect its development and reports the results of studies focusing on different aspects of its instructed acquisition

Literacy and the Second Language Learner JoAnn Hammadou Sullivan, 2002-04-01 The field of second language learning research has grown rapidly in recent years Educators have become increasingly aware that pedagogical knowledge varies significantly from one subject domain to the next and that findings from educational research in one domain are not necessarily applicable to the next Researchers in second language learning are adding to our understandings of secondlanguage specific pedagogy There exists a need therefore for an outlet for these ever improving understandings of this content specific pedagogy The new book series Research in Second Language Learning will provide just such an outlet The series invites articles from all methodological approaches to research The series will promote a research based approach to the decision making process in second language teaching learning

Handbook of Research on Study Abroad Programs and Outbound Mobility Velliaris, Donna M., Coleman-George, Deb, 2016-08-24 Millions of students seek short and long term study abroad options every year and this trend is a key illustration of the internationalization of higher education Because a global perspective has become mandatory in the largely

globalized workforce many institutions look to study abroad programs to prepare their students This outbound mobility has the potential to contribute to greater understanding between cultures countries and individuals The Handbook of Research on Study Abroad Programs and Outbound Mobility offers a comprehensive look into motivations for and opportunities through all forms of outbound mobility programs By providing empirically based research this publication establishes the benefits difficulties and rewards of building a framework to support international students and programs It is an invaluable resource for academics students policy makers course developers counselors and cross cultural student advisors

Routledge Encyclopedia of Language Teaching and Learning Michael Byram,2004 This handbook deals with all aspects of contemporary language teaching and its history Produced for language teaching professionals it is also useful as a reference work for academic studies at postgraduate level *Research as a Tool for Empowerment* David Schwarzer,Melanie Bloom,Sarah Shono,2006-03-01 Research as a Tool for Empowerment Theory Informing Practice is an edited volume that includes an array of research based chapters that not only further the field of second foreign language research but also provide practical implications to language classrooms in international and national settings Chapters in this volume present a bridge between methodologically sound second foreign language research and strong pedagogical implications This volume includes the voices of researchers graduate students teachers parents and learners exploring the second foreign language phenomena The multiple voices of the contributing authors reflect the diverse readership of the Research in Second Language Learning series Unlike previous anthologies in second foreign language research this volume presents studies from various research paradigms Chapters include examples of various research methods from both quantitative and qualitative paradigms Few previous anthologies have presented research based in multiple paradigms and from multiple perspectives Research as a Tool for Empowerment Theory Informing Practice not only presents these various perspectives but it also makes the link from research to classroom implications and applications The volume is unique as it makes a connection between different types of research and research methods and empowerment and issues of empowerment **Code Choice in the Language Classroom** Glenn S. Levine,2011 Code Choice in the Language Classroom argues that the foreign language classroom is and should be regarded as a multilingual community of practice rather than as a perpetually deficient imitator of an exclusive second language environment From a sociocultural and ecological perspective Levine guides the reader through a theoretical empirical and pedagogical treatment of the important roles of the first language and of code switching practices in the language classroom Intended for SLA researchers language teachers language program directors and graduate students of foreign languages and literatures the book develops a framework for thinking about all aspects of code choice in the language classroom and offers concrete proposals for designing and carrying out instruction in a multilingual classroom community of practice An extremely timely book on one of the most vexing issues in foreign language teaching how much codeswitching is acceptable or even desirable in the 21st century 12 classroom Through a sound

theoretical framework and concrete pedagogical examples Glenn Levine develops an exciting innovative multilingual approach to curriculum design teaching and articulation that engages the students in the co construction of code choice conventions Claire Kramsch University of California at Berkeley USA Translanguaging in EFL Contexts Michael Rabbidge, 2019-03-26 The purpose of this book is to promote the value of translanguaging in EFL teaching contexts To date translanguaging has been discussed mostly in regards to US and European contexts This book will examine the teaching beliefs and practices of teachers within a South Korean elementary school context to evaluate the practices of current teachers who use translanguaging strategies when teaching This examination utilizes sociological theories of pedagogic discourse to discuss the consequences of language exclusion policies on the peninsula Using these theories it presents an argument for why EFL contexts like South Korea need to reevaluate their current policies and understandings of language learning and teaching By embracing translanguaging as an approach the author argues they will transform their traditional notions of language learning and teaching in order to view teachers as bilinguals and learners as emerging bilinguals rather than use terms of deficiency that have traditionally been in place for such contexts This book s unique use of sociological theories of pedagogic discourse supports a need to promote the translanguaging ideology of language teaching and learning
