The Subtlety of Emotions Aaron Ben-Ze'Ev, 2001-08-24 An informal yet rigorous exploration of human emotions in all their complexity and subtlety Why do we cry at the movies What is the best way to manage destructive feelings such as jealousy Although emotions pervade our lives their nature causes and effects have only recently been studied by social scientists and philosophers Despite growing scientific interest in the subject empirical findings have not yet caught up with our intuitive knowledge In this book Aaron Ben Ze ev carries out what he calls a careful search for general patterns in the primeval jungle of emotions In an engaging informal style he draws on a variety of theoretical approaches and popular sources to produce a coherent account of emotions in all their subtlety All of the ideas are illustrated with examples drawn from everyday life The book is organized into two parts The first presents an overall conceptual framework for understanding emotions It looks at the typical

characteristics and components of emotions distinguishes emotions from other affective phenomena classifies the emotions and covers such related issues as emotional intelligence regulating emotions and emotions and morality The second part discusses individual emotions including envy jealousy pleasure in others misfortune pity compassion anger hate disgust love sexual desire happiness sadness pride regret and shame The text is laced with insightful and often amusing quotations from sources ranging from Mae West to Montesquieu *The Routledge Handbook of Phenomenology of Emotion* Thomas Szanto, Hilge Landweer, 2020-04-22 The emotions occupy a fundamental place in philosophy going back to Aristotle However the phenomenology of the emotions has until recently remained a relatively neglected topic The Routledge Handbook of Phenomenology of Emotion is an outstanding guide and reference source to this important and fascinating topic Comprising forty nine chapters by a team of international contributors this handbook covers the following topics historical perspectives including Brentano Husserl Sartre Levinas and Arendt contemporary debates including existential feelings situated affectivity embodiment art morality and feminism self directed and individual emotions including happiness grief self esteem and shame social emotions including sympathy aggressive emotions collective emotions and political emotions borderline cases of emotion including solidarity trust pain forgiveness and revenge Essential reading for students and researchers in philosophy studying phenomenology ethics moral psychology and philosophy of psychology The Routledge Handbook of Phenomenology of Emotion is also suitable for those in related disciplines such as religion sociology and anthropology

Knowing Emotions Rick Anthony Furtak, 2018-02-01 How do our emotions enable us to know When Pascal noted that the heart has its own reasons he implied that our rational faculty alone cannot grasp what is revealed in affective experience Knowing Emotions seeks to explain comprehensively why human emotions are more than physiological disturbances but experiences capable of making us aware of significant truths that we could not know by any other means Recent philosophical and interdisciplinary research on the emotions has been dominated by a renewal of the debate over how best to characterize the intentionality of emotions as well as their bodily character Rick Anthony Furtak frames this debate differently however arguing that intentionality and feeling are not two discrete parts of affective experience but conceptually distinguishable aspects of a unified response His account captures how an emotion's phenomenal or felt quality what it is like relates to its intentional content what it is about Knowing Emotions provides a solid introduction to the philosophy of emotion before delving into the debates that surround it Furtak draws from a wide range of analytic and Continental philosophers including Sartre Merleau Ponty Kierkegaard and Nietzsche among others and bolsters his analysis with empirical evidence from social psychology neuroscience and psychiatry Perhaps most importantly Furtak investigates all varieties of affective experience from brief episodes to moods and emotional dispositions loves and other longstanding concerns and overall patterns of temperament and affective outlook Ultimately he argues that we must reject the misguided aspiration to purify ourselves of passion and attain an impersonal standpoint Knowing Emotions attempts to clarify what kind of truth may be

revealed through emotion and what can be known not despite but precisely by virtue of each person's idiosyncratic perspective *Emotions as Original Existences* Demian Whiting, 2020-09-25 This book defends the much disputed view that emotions are what Hume referred to as original existences feeling states that have no intentional or representational properties of their own In doing so the book serves as a valuable counterbalance to the now mainstream view that emotions are representational mental states Beginning with a defence of a feeling theory of emotion Whiting opens up a whole new way of thinking about the role and centrality of emotion in our lives showing how emotion is key to a proper understanding of human motivation and the self Whiting establishes that emotions as types of bodily feelings serve as the categorical bases for our behavioural dispositions including those associated with moral thought virtue and vice The book concludes by advancing the idea that emotions make up our intrinsic nature the characterisation of what we are like in and of ourselves when considered apart from how we are disposed to behave The conclusion additionally draws out the implications of the claims made throughout the book in relation to our understanding of mental illness and the treatment of emotional disorders

Emotional Self-Knowledge Alba Montes Sánchez, Alessandro Salice, 2023-04-13 This volume sheds light on the affective dimensions of self knowledge and the roles that emotions and other affective states play in promoting or obstructing our knowledge of ourselves It is the first book specifically devoted to the issue of affective self knowledge The relation between self knowledge and human emotions is an often emphasized but poorly articulated one While philosophers of emotion tend to give affectivity a central role in making us who we are the philosophical literature on self knowledge focuses overwhelmingly on cognitive states and does not give a special place to the emotions Currently there is little dialogue between both fields or with other philosophical traditions that have important contributions to make to this topic such as phenomenology and Asian

philosophy This volume brings together philosophers from the relevant fields to explore two related sets of questions First do philosophers of emotion exaggerate the importance of our affective lives in making us who we are Or is it philosophers of self knowledge who misunderstand emotions Second what is the role of emotions in self knowledge What sort of self knowledge can be secured by paying attention to our emotions Emotional Self Knowledge is an essential resource for researchers and advanced students working on philosophy of emotion philosophy of mind epistemology philosophical psychology and phenomenology Chapter 1 and Chapter 10 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Oxford Handbook of Aesthetics Jerrold Levinson, 2005-01-27 The Oxford Handbook of Aesthetics has assembled 48 brand new essays making this a comprehensive guide available to the theory application history and future of the field

Thinking about Feeling Robert C. Solomon, 2004 Philosophers since Aristotle have explored emotion and the study of emotion has always been essential to the love of wisdom In recent years Anglo American philosophers have rediscovered and placed new emphasis on this very old discipline The view that emotions are ripe for philosophical analysis has been supported by a considerable number of excellent publications In this volume Robert Solomon brings together some of the best Anglo American philosophers now writing on the philosophy of emotion with chapters from philosophers who have distinguished themselves in the field of emotion research and have interdisciplinary interests particularly in the social and biological sciences The reader will find a lively variety of positions on topics such as the nature of emotion the category of emotion the rationality of emotions the relationship between an emotion and its expression the relationship between emotion motivation and action the biological nature versus social construction of emotion the role of the body in emotion the extent of freedom and our control of emotions the relationship between emotion and value and the very nature and warrant of theories of emotion In addition this book acknowledges that it is impossible to study the emotions today without engaging with contemporary psychology and the neurosciences and moreover engages them with zeal Thus the essays included here should appeal to a broad spectrum of emotion researchers in the various theoretical experimental and clinical branches of psychology in addition to theorists in philosophy philosophical psychology moral psychology and cognitive science the social sciences and literary theory

Identity Construction and Science Education Research Maria Varelas, 2012-12-17 In this edited volume science education scholars engage with the constructs of identity and identity construction of learners teachers and practitioners of science Reports on empirical studies and commentaries serve to extend theoretical understandings related to identity and identity development vis vis science education link them to empirical evidence derived from a range of participants educational settings and analytic foci examine methodological issues in identity studies and project fruitful directions for research in this area Using anthropological sociological and socio cultural perspectives chapter authors depict and discuss the complexity messiness but also potential of identity work in science education and show how

critical constructs such as power privilege and dominant views access and participation positionality agency structure dialectic and inequities are integrally intertwined with identity construction and trajectories Chapter authors examine issues of identity with participants ranging from first graders to pre service and in service teachers to physics doctoral students to show ways in which identity work is a vital albeit still underemphasized dimension of learning and participating in science in and out of academic institutions Moreover the research presented in this book mostly concerns students or teachers with racial ethno linguistic class academic status and gender affiliations that have been long excluded from or underrepresented in scientific practice science fields and science related professions and linked with science achievement gaps This book contributes to the growing scholarship that seeks to problematize various dominant views regarding for example what counts as science and scientific competence who does science and what resources can be fruitful for doing science **Sound**

Sentiments David Pugmire, 2005-04-21 **Sound Sentiments** seeks to open a new path in the philosophy of emotion The focus of most recent work on the philosophy of emotion has been on the nature of emotion with some attention also to the relation of emotion to ethics This book explores the idea that emotions admit of valuation of degrees of adequacy We cannot just decide what to think or to desire or to feel as we can decide to act and these attitudes are integral to emotions Nonetheless emotions can have normative characteristics that resemble virtues Philosophers are familiar with the notion that emotions are valuational But how well they serve that function determines the value they themselves have The book opens with an account of the theory of emotion reflecting recent work on that and considers the way in which emotions are valuational with reference to the contributions of writers such as de Sousa Gibbard and McDowell The worth of an emotional experience depends on the quality of the valuation it itself achieves Most of the book is then devoted to a set of interconnected themes Some of these concern properties that emotions can have which can variously enhance or detract from them profundity social leverage narcissism and sentimentality Others are attitudes with characteristic emotional loadings and sometimes motivations that raise similar questions cynicism ambivalence and sophistication David Pugmire's general approach is indirect and negative to analyse emotional foibles which tend to elude us as we succumb to them and thereby to point to what soundness in emotion would be He also elicits connections amongst these aspects of the emotional life The most pervasive is the dimension of profundity which opens the discussion each of the subsequent problems amounts to a way in which emotion can be shallow and slight and so amount to less than it seems and accordingly each identifies a form of integrity in the emotions **Criminology** Eamonn Carrabine, Paul Iganski, Nigel South, Maggy Lee, 2004 Covering all the major areas of the subject this introduction to criminology features specific topics such as the history and theory of criminology and categories of crime

The Heart Has Its Reasons Beata Toth, 2016-05-26 **The Heart Has Its Reasons** explores a hitherto neglected area of theological anthropology the unity of human emotion and reason embodied in the Biblical concept of the heart While the theological contours of human rationality have long been clearly drawn and presented

as the exclusive seat of the image of God affectivity has been relegated to a secondary position. With the reintegration of the body into recent philosophical and theological discourses a number of questions have arisen: if the image also resides in the body, how does this change one's view of the theological significance of human affect? In what way is our likeness to God realised in the whole of what we are? Can one overcome the traditional dissociation between intellect and affect by a renewed theory of love? In conversation with patristic and medieval authors like Irenaeus, Tertullian, Gregory of Nyssa, Maximus and Thomas Aquinas and in dialogue with more recent interlocutors such as Blaise Pascal, Ricoeur, Marion, Milbank and John Paul II, Beata Toth pursues a novel theological vision of the essential unity of our humanity.

The Emotions Peter Goldie, 2002-08

Peter Goldie opens the path to a deeper understanding of our emotional lives through a lucid philosophical exploration of this surprisingly neglected topic. He illuminates the phenomena of emotion by drawing not only on philosophy but also on literature and science. He considers the roles of culture and evolution in the development of our emotional capabilities. He examines the links between emotion, mood and character and places the emotions in the context of such related phenomena as consciousness, thought, feeling and imagination. He explains how it is that we are able to make sense of our own and other people's emotions and how we can explain the very human things which emotions lead us to do. A key theme of *The Emotions* is the idea of a personal perspective or point of view contrasted with the impersonal stance of the empirical sciences. Goldie argues that it is only from the personal point of view that thoughts, reasons, feelings and actions come into view. He suggests that there is a tendency for philosophers to over-intellectualize the emotions and investigates how far it is possible to explain emotions in terms of rationality. Over-intellectualizing can also involve neglecting the centrality of feelings and Goldie shows how to put them where they belong as part of the intentionality of emotional experience directed towards the world from a point of view. Goldie argues that the various elements of emotional experience including thought, feeling, bodily change and expression are tied together in a narrative structure. To make sense of one's emotional life one has to see it as part of a larger unfolding narrative. The narrative is not simply an interpretative framework of a life; it is what that life is. Goldie concludes by applying these ideas in a close study of one particular emotion: jealousy. This fascinating book gives an accessible but penetrating exploration of a subject that is important but mysterious to all of us. Any reader interested in emotion and its role in our understanding of our lives will find much to think about here.

From Passions to Emotions Thomas Dixon, 2003-06-05

Today there is a thriving emotions industry to which philosophers, psychologists and neuroscientists are contributing. Yet until two centuries ago the emotions did not exist. In this path-breaking study Thomas Dixon shows how during the nineteenth century the emotions came into being as a distinct psychological category replacing existing categories such as appetites, passions, sentiments and affections. By examining medieval and eighteenth-century theological psychologies and placing Charles Darwin and William James within a broader and more complex nineteenth-century setting, Thomas Dixon argues that this domination by one single descriptive category is not healthy. Overinclusivity of the emotions hampers attempts to argue

with any subtlety about the enormous range of mental states and stances of which humans are capable This book is an important contribution to the debate about emotion and rationality which has preoccupied western thinkers throughout the eighteenth and nineteenth centuries and has implications for contemporary debates **Public Relations and**

Individuality Simon Moore, 2018-05-08 Our individuality is partly shaped by encounters with the external world so it is inconceivable that we are unaffected by the planned management of public communications which manages much of our external experience Exploring one of the most important mediators between organizations and individual encounters public relations PR is long overdue By developing new ways to create and connect with us as members of particular target audiences has it changed our interior existence by altering perceptions of the world outside ourselves PR's massive impact on groups society or organizations is rightly explored but its immense influence on our individuality is neglected In an age where new media makes deepening connections to individuals the relationship of PR to individuality is one of the field's most profoundly important issues This provocative book will assist scholars and advanced students in PR and communication research to develop a clear structured disciplined understanding of this phenomenon and its implications *The Logic of Love* Andrew J. B. Cameron, 2022-12-29 Overviewing what makes the intersection between emotion and ethics so confusing this book surveys an older wisdom in how to manage it using a range of Christian theologians and sources More important even than managing we begin to see a vision for a better set of affections to grow within and among us In this vision emerges a practical and nuanced account of what the Christian tradition sometime summarises as love How may we recover a deep affection for what matters both within ourselves and together in groups This book also dialogues with a new movement in moral psychology social intuitionism Cameron argues that researchers in this discipline have interests and conclusions that sometimes overlap with Christian sources even where their respective lenses differ In this way the book overviews recent trends in moral psychology against a recent historical and contemporary cultural backdrop whilst assaying major sources in Christian theology that offer guidance on moral psychology The Oxford Handbook of Philosophy of Emotion Peter Goldie, 2009-12-03 This volume contains thirty one state of the art contributions from leading figures in the study of emotion today The volume addresses all the central philosophical issues in current emotion research including the nature of emotion and of emotional life the history of emotion from Plato to Sartre emotion and practical reason emotion and the self emotion value and morality and emotion art and aesthetics Anyone interested in the philosophy of emotion and its wide ranging implications in other related fields such as morality and aesthetics will want to consult this book It will be a vital resource not only for scholars and graduate students but also for undergraduates who are finding their way into this fascinating topic
