Reducing Prejudice And Discrimination:

Reducing Prejudice and Discrimination Stuart Oskamp, 2013-05-13 Finding ways to reduce prejudice and discrimination is the central issue in attacking racism in our society Yet this book is almost unique among scientific volumes in its focus on that goal This important book combines critical analysis of theories about how to reduce prejudice and discrimination with cutting edge empirical research conducted in real world settings as well as in controlled laboratory situations This book s outstanding contributors focus on a common set of questions about ways to reduce intergroup conflict prejudice and stereotyping They summarize their own research as well as others interpret the conclusions and suggest implications concerning the practical methods that have been or could be used in programs aimed at reducing intergroup conflict The chapters present solidly based critical analyses and research findings in clear reader friendly prose This book evolved from the Sixteenth Annual Claremont Symposium on Applied Social Psychology Each Symposium in the series concentrates on a single area in which social psychological knowledge is being applied to the resolution of a current social problem Ideal for teachers social workers administrators managers and other social practitioners who are concerned about prejudice and discrimination this book will also serve as a valuable foundation of knowledge in courses that examine this topic How to

reduce discrimination and prejudice in society? Vlad Popa-Florea, 2016-01-15 Essay from the year 2012 in the subject Psychology Social Psychology grade 1 6 Jacobs University Bremen gGmbH course Stereotypes Prejudice and Discrimination language English abstract Nowadays the world is becoming more globalized interconnected and heterogeneous People can no longer interact just with their own type or race but on the contrary must embrace the diversity that surrounds them However as human beings live in groups and act all together as a group this life style also develops an alternative side of stereotypes prejudice and discrimination Stereotypes are related to the cognitive aspect of perception over people thus defined as beliefs and conceptions on the behavior of different groups This paper will evaluate and discuss methods through which an individual person can reduce prejudice and discrimination in society It will offer theoretical background and empirical evidence along with certain limitations that restrain the reduction methods **Reducing Prejudice in the**

Classroom , 1984 *Racial Reconciliation and the Healing of a Nation* Charles J. Ogletree, Jr., Austin Sarat, 2017-10-24 The work at hand for bridging the racial divide in the United States From Baltimore and Ferguson to Flint and Charleston the dream of a post racial era in America has run up against the continuing reality of racial antagonism Current debates about affirmative action multiculturalism and racial hate speech reveal persistent uncertainty and ambivalence about the place and meaning of race and especially the black white divide in American culture They also suggest that the work of racial reconciliation remains incomplete *Racial Reconciliation and the Healing of a Nation* seeks to assess where we are in that work examining sources of continuing racial antagonism among blacks and whites It also highlights strategies that promise to promote racial reconciliation in the future Rather than revisit arguments about the importance of integration assimilation

and reparations the contributors explore previously unconsidered perspectives on reconciliation between blacks and whites Chapters connect identity politics the rhetoric of race and difference the work of institutions and actors in those institutions and structural inequities in the lives of blacks and whites to our thinking about tolerance and respect Going beyond an assessment of the capacity of law to facilitate racial reconciliation Racial Reconciliation and the Healing of a Nation challenges readers to examine social political cultural and psychological issues that fuel racial antagonism as well as the factors that might facilitate racial reconciliation Attitudes and Related Psychosocial Constructs Lewis Aiken,2002-02-12 I would find this book a tempting alternative to my current text for two reasons its coverage of more recent research and theorizing and its focus on applications of attitude measurement and survey research to a number of very important practical issues RICHARD HARRIS University of New Mexico Attitudes have a major impact on behavior and one s ability to manage and adapt to change while also influencing the behavior of others This text provides a compact but comprehensive research oriented treatment of attitudes and related psychosocial constructs values opinions beliefs and personal orientations It focuses on the meaning measurement and utility of attitudes in various applied settings such as education or the workplace The topics explored include social and personal matters such as prejudice and discrimination illness and disability death and dying poverty and unemployment conflict and violence schools and teachers work and retirement and politics religion and morality The book will prove valuable to both students and professionals who find themselves involved with measuring evaluating and modifying attitudes Psychology for VCE Units 1 and 2 9e learnON and Print John Grivas,2022-12-19

Hussein Rassool,2021-03-31 Islamic Psychology or ilm an nafs science of the soul is an important introductory textbook drawing on the latest evidence in the sub disciplines of psychology to provide a balanced and comprehensive view of human nature behaviour and experience Its foundation to develop theories about human nature is based upon the writings of the Qur an Sunna Muslim scholars and contemporary research findings Synthesising contemporary empirical psychology and Islamic psychology this book is holistic in both nature and process and includes the physical psychological social and spiritual dimensions of human behaviour and experience Through a broad and comprehensive scope the book addresses three main areas Context perspectives and the clinical applications of applied psychology from an Islamic approach This book is a core text on Islamic psychology for undergraduate and postgraduate students and those undertaking continuing professional development in Islamic psychology psychotherapy and counselling Beyond this it is also a good supporting resource for teachers and lecturers in this field The Importance of Target and Audience in Reducing Prejudice and Discrimination Through Intergroup Contact and Extended Contact Amy

Ellard-Gray,2019 This dissertation compared the efficacy of intergroup contact theory with an alternative prejudice reduction intervention extended contact An experimental manipulation utilizing direct and extended contact conditions was created in an effort to reduce heterosexual Americans sexual prejudice and subtle discrimination against the LGBTQ group Over the course of two studies I tested conditions that could give extended contact an advantage over direct contact I hypothesized that extended contact with a straight self identified ally would make extended contact more effective than direct contact with a gay person Study 1 was a 2 participant gender x 2 target s sexual orientation gay straight x 2 target s explicit support for LGBTQ issues ally advocate non ally non advocate between subjects experimental design Participants viewed a video in which a male target shared facts about sexual orientation and the harmfulness of prejudice and discrimination Participants completed an online pre test and a post test following the manipulation Study 2 was essentially a replication of Study 1 but an attempt was made to strengthen the manipulation of target s explicit support for LGBTQ issues Results showed that among participants with low previous contact with the LGBTQ group contact with a gay identified target resulted in lower subtle discrimination than extended contact The hypothesis that an ally would make extended contact more effective than direct contact was not supported in either study However Study 1 showed a novel finding that advocacy for LGBTQ issues was associated with higher subtle discrimination among those with low to no contact with the LGBTQ group regardless of sexual orientation of the contact This finding has implications for the application of prejudice reduction interventions in the real world In addition a pre post comparison of prejudice showed that the manipulation itself reduced prejudice over and above target s self disclosed identity suggesting potential for a video format prejudice reduction intervention tool that can be distributed through online channels for a large scale reach
