O'Hanlon, 2012-10-11 For some observers nuclear arms control is either a relic of the cold war or a utopian dream about a denuclearized planet decades in the future But as Brookings scholars Steven Pifer and Michael O Hanlon argue in *The Opportunity* arms control can address some key security challenges facing Washington today and enhance both American and global security Pifer and O Hanlon make a compelling case for further arms control measures to reduce the nuclear threat to the United States and its allies to strengthen strategic stability to promote greater transparency regarding secretive nuclear arsenals to create the possibility for significant defense budget savings to bolster American credibility in the fight to curb nuclear proliferation and to build a stronger and more sustainable U S Russia relationship President Obama gave priority to nuclear arms control early in his first term and by all accounts would like to be transformational on these questions Can there be another major U S Russia arms treaty Can the tactical and surplus strategic nuclear warheads that have so far escaped controls be brought into such a framework Can a modus vivendi be reached between the two countries on missile defense And what of multilateral accords on nuclear testing and production of fissile materials for nuclear weapons Pifer and O Hanlon concisely frame the issues the background and the choices facing the president provide practical policy recommendations and put it all in clear and readable prose that will be easily understood by the layman **Pulling Back from the Nuclear Brink** Barry R. Reducing Nuclear Danger McGeorge Bundy, William J. Crowe, Sidney David Drell, 1993 The end of the U S Soviet standoff and the increasing risk of political adventurers such as Saddam Hussein developing nuclear capability have profoundly altered the shape of global nuclear danger In *Reducing Nuclear Danger* three of America's top experts on nuclear affairs offer a thoughtful prescription for effective international action to cut existing nuclear arsenals and to prevent further proliferation They argue that the United States must take a cooperative leadership role to achieve worldwide control of nuclear weapons The immediate tasks to this end are to execute the already agreed upon reductions in U S and Russian forces ensure that Russia remains the only nuclear state of the former Soviet Union and substantially strengthen the

international efforts against the spread of nuclear weapons The authors favor adopting a strict doctrine of using nuclear weapons only as a defensive last resort along with other specific changes in current policy Prominent in their prescriptions is an eventual drastic reduction of the current Russian American warhead ceilings They also advocate a new policy for American leaders toward other nations as well as the American people of open public explanation of nuclear danger This important and insightful book on the current nuclear danger should be read by all citizens with an interest in resolving what remains our greatest global risk at a time of unprecedented opportunity Realism, Strength, Negotiation, 1984 An anthology of 40 speeches by President Ronald Reagan Vice President George Bush and Secretary of State George Shultz Taken together they represent a comprehensive accounting of the Reagan administration's foreign policy the principles on which it is based its goals and purposes the plans and programs by which it has been advanced and the progress it has made toward achieving its goals The addresses cover each of the regions of the world and the major foreign policy initiatives undertaken by the Reagan administration
