various models for integrating library research and reference skills into the curricula and discussions of the effects of these new models on the school librarian's role. Section two addresses the profound effect new technologies such as CD ROM multimedia CD I and CD TV are having on both the teaching of reference and information skills and on the entire research process from initiation to production of the final student report. The last section presents three models for assessing the effectiveness of school reference services and skills instruction. School library reference services and particularly library instruction are changing dramatically in the 1990s as a result of the information age. School Library Reference Services in the 90s helps professionals in the field stay abreast of current developments and be more effective in their jobs. The Image and Role of the Librarian Linda S Katz, 2003-06-27 Get a unique insight into the image problems librarians face. The Image and Role of the Librarian addresses all aspects of professional identity for librarians including professional roles, cultural images, popular perceptions and future trends. The book examines historical representations, stereotypes and popular culture icons and the r **Reference Service Expertise** William A. Katz, 1993 This important volume presents a wealth of practical ideas for improving the art of reference librarianship. Reference Service Expertise provides pragmatic ways for librarians to aid patrons, consider reference collections and how they are employed and assess various technologies in reference work. Dedicated to the idea that reference service is a benevolent desire to help the sometimes puzzled library user, this unique book describes numerous and varied means to that end and encourages reference librarians to become familiar with the multiple resources available in modern libraries. Reference Service Expertise pinpoints specific areas in which librarians can increase their knowledge in order to become more efficient. These strategies include using a systems approach in reference instruction for library professionals, guidelines for academic librarians to use for evaluating facilities, services and staff as to how effectively they welcome users and validate their information needs, using team teaching to instruct users about library services, developing legal reference skills to support the constitutional right to know in a self governing society and helping non science librarians to become science literate by reading popular science literature, watching science television programs, visiting science museums and generally increasing their awareness of the problem of science illiteracy among the general population. A wide variety of resources available in today's reference libraries are discussed to help librarians become better informed about the options available to their patrons including ERIC and NTIS and the information gap between the two databases, resources on the evolving market economy or investments in the Commonwealth of Independent States, fee based services, PsycLIT CD ROM, PsycINFO online and the difference in retrieval patterns using the same vocabulary of terms, interactive media centers, advantages and shortcomings. Reference librarians in all types of libraries will benefit from chapters that describe specific methods for improving their own personal effectiveness as well as chapters that evaluate specific services and reference tools available for reference library users. Social Science Reference Services Pam M. Baxter, 1995 This new book addresses reference services across the spectrum of the social sciences.

Chapters embrace a multidisciplinary approach to providing both materials and services to users and stress the variety of information formats available through a bewildering array of delivery mechanisms from an astounding number of sources. Among the topics addressed are challenges of the automated environment, dissertation development, improving the handling of business reference queries, user education, bibliographic instruction, data files for social research, strategies for locating information on environmental public policy, reference literature on the European Community, and using economic statistics from the federal government.
