Reference To Abstract Objects In Discourse:

Reference to Abstract Objects in Discourse Nicholas Asher, 1993-04-30 This volume is about abstract objects and the ways we refer to them in natural language Asher develops a semantical and metaphysical analysis of these entities in two stages The first reflects the rich ontology of abstract objects necessitated by the forms of language in which we think and speak A second level of analysis maps the ontology of natural language metaphysics onto a sparser domain a more systematic realm of abstract objects that are fully analyzed This second level reflects the commitments of real metaphysics The models for these commitments assign truth conditions to natural language discourse Annotation copyright by Book News Inc Portland OR

Reference to Abstract Objects in Discourse Nicholas Asher, 2012-12-06 Reference to Abstract Objects in Discourse presents a novel framework and analysis of the ways we refer to abstract objects in natural language discourse The book begins with a typology of abstract objects and related entities like eventualities After an introduction to bottom up compositional discourse representation theory DRT and to previous work on abstract objects in DRT notably work on the semantics of the attitudes the book turns to a semantic analysis of eventuality and abstract object denoting nominals in English The book then substantially revises and extends the dynamic semantic framework of DRT to develop an analysis of anaphoric reference to abstract objects and eventualities that exploits discourse structure and the discourse relations that obtain between elements of the structure A dynamic semantically based theory of discourse structure SDRT is proposed along with many illustrative examples Two further chapters then provide the analysis of anaphoric reference to propositions VP ellipsis The abstract entity anaphoric antecedents are elements of the discourse structures that SDRT develops The final chapter discusses some logical and philosophical difficulties for a semantic analysis of reference to abstract objects For semanticists philosophers of language computer scientists interested in natural language applications and discourse philosophical logicians graduate students in linguistics philosophy cognitive science and artificial intelligence **The**

Grammar-Pragmatics Interface Nancy Hedberg, Ron Zacharski, 2007-05-15 This collection of papers celebrates the work of Jeanette K Gundel who has contributed to the field of the grammar pragmatics interface through her publications on the syntactic realization of topic and comment and the cognitive status of referring expressions as well as by inspiring colleagues to make contributions to the overall field of pragmatics This volume collects together papers from colleagues and former students on pragmatics and syntax pragmatics and reference and pragmatics and social variables The volume includes papers devoted to explicating the grammar pragmatics interface with the focus of the papers ranging from Gricean and post Gricean pragmatics construction grammar and genre theory to formal semantics as well as papers devoted to expanding on Gundel's own original approach to factors such as the cognitive status decisions underlying speakers choice of referring expression and the topic and focus decisions underlying speakers choice of syntactic construction Cross-Linguistic Semantics Cliff Goddard, 2008-04-10 Cross linguistic semantics investigating how languages package and express meanings

differently is central to the linguistic quest to understand the nature of human language This set of studies explores and demonstrates cross linguistic semantics as practised in the natural semantic metalanguage NSM framework originated by Anna Wierzbicka The opening chapters give a state of the art overview of the NSM model propose several theoretical innovations and advance a number of original analyses in connection with names and naming clefts and other specificational sentences and discourse anaphora Subsequent chapters describe and analyse diverse phenomena in ten languages from multiple families geographical locations and cultural settings around the globe Three substantial studies document how the metalanguage of NSM semantic primes can be realised in languages of widely differing types Amharic Ethiopia Korean and East Cree Each constitutes a lexicogrammatical portrait in miniature of the language concerned Other chapters probe topics such as inalienable possession in Koromu Papua New Guinea epistemic verbs in Swedish hyperpolysemy in Bunuba Australia the expression of momentariness in Berber ethnogeometry in Makasai East Timor value concepts in Russian and virtuous emotions in Japanese This book will be valuable for linguists working on language description lexical semantics or the semantics of grammar for advanced students of linguistics and for others interested in language universals and language diversity

Constraints in Discourse Anton Benz, Peter Kühnlein, 2008-04-10 It is a commonplace to say that the meaning of text is more than the conjunction of the meaning of its constituents But what are the rules governing its interpretation and what are the constraints that define well formed discourse Answers to these questions can be given from various perspectives In this edited volume leading scientists in the field investigate these questions from structural cognitive and computational perspectives The last decades have seen the development of numerous formal frameworks in which the structure of discourse can be analysed the most important of them being the Linguistic Discourse Model Rhetorical Structure Theory and Segmented Discourse Representation Theory This volume contains an introduction to these frameworks and the fundamental topics in research about discourse constraints Thus it should be accessible to specialists in the field as well as advanced graduate students and researchers from neighbouring areas The volume is of interest to discourse linguists psycholinguists cognitive scientists and computational linguists

God and Abstract Objects William Lane Craig, 2017-09-05 This book is an exploration and defense of the coherence of classical theism's doctrine of divine aseity in the face of the challenge posed by Platonism with respect to abstract objects A synoptic work in analytic philosophy of religion the book engages discussions in philosophy of mathematics philosophy of language metaphysics and metaontology It addresses absolute creationism non Platonism realism fictionalism neutralism and alternative logics and semantics among other topics The book offers a helpful taxonomy of the wide range of options available to the classical theist for dealing with the challenge of Platonism It probes in detail the diverse views on the reality of abstract objects and their compatibility with classical theism It contains a most thorough discussion rooted in careful exegesis of the biblical and patristic basis of the doctrine of divine aseity Finally it challenges the influential Quinean metaontological theses concerning the way in which we make

ontological commitments Constraints in Discourse 2 Peter Kühnlein, Anton Benz, Candace L. Sidner, 2010-04-14 Text is highly structured and structured at a variety of levels But what are the units of text which levels are at stake and what establishes the structure that binds the units together This volume just as the predecessor a spin off of one of the workshops on constraints in discourse contains the most recent thoroughly reviewed papers by specialists in the area that try to give answers to such questions It helps deepening the understanding of a multiplicity of mechanisms and constraints that are at work during production and comprehension of well formed discourse Researchers from linguistics both formal and psycholinguistics artificial intelligence and cognitive sciences will appreciate this book as a valuable resource for information and inspiration **Concise Encyclopedia of Semantics** Keith Allan, 2010-04-06 Concise Encyclopedia of Semantics is a comprehensive new reference work aiming to systematically describe all aspects of the study of meaning in language It synthesizes in one volume the latest scholarly positions on the construction interpretation clarification obscurity illustration amplification simplification negotiation contradiction contraction and paraphrasing of meaning and the various concepts analyses methodologies and technologies that underpin their study It examines not only semantics but the impact of semantic study on related fields such as morphology syntax and typologically oriented studies such as grammatical semantics where semantics has made a considerable contribution to our understanding of verbal categories like tense or aspect nominal categories like case or possession clausal categories like causatives comparatives or conditionals and discourse phenomena like reference and anaphora COSE also examines lexical semantics and its relation to syntax pragmatics and cognitive linguistics and the study of how logical semantics develops and thrives often in interaction with computational linguistics As a derivative volume from Encyclopedia of Language and Linguistics Second Edition it comprises contributions from 150 of the foremost scholars of semantics in their various specializations and draws on 20 years of development in the parent work in a compact and affordable format Principally intended for tertiary level inquiry and research this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages As semantics is a centrally important and inherently cross cutting area within linguistics it will therefore be relevant not just for semantics specialists but for most linguistic audiences The first encyclopedia ever published in this fascinating and diverse field Combines the talents of the world's leading semantics specialists The latest trends in the field authoritatively reviewed and interpreted in context of related disciplines Drawn from the richest most authoritative comprehensive and internationally acclaimed reference resource in the linguistics area Compact and affordable single volume reference format Metasemantics Alexis Burgess, Brett Sherman, 2014 Metasemantics comprises new work on the philosophical foundations of linguistic semantics by a diverse group of established and emerging experts in the philosophy of language metaphysics and the theory of content The science of semantics aspires to systematically specify the meanings of linguistic expressions in context The paradigmatic metasemantic question is accordingly what more basic or

fundamental features of the world metaphysically determine these semantic facts Efforts to answer this question inevitably raise others Where are the boundaries of semantics What is the essence of the meaning relation Which framework should we use for semantic theorizing What are the intrinsic natures of semantic values Are the semantic facts metaphysically determinate What is semantic competence Metasemantic inquiry has long been recognized as a central part of the philosophy of language but recent developments in metaphysics and semantics itself now allow us to approach these classic questions with an unprecedented degree of precision The essays collected here provide promising new perspectives on old problems pose questions that suggest novel research projects and taken together greatly sharpen our understanding of linguistic representation

Logical Aspects of Computational Linguistics Sylvain Pogodalla, Jean-Philippe Prost, 2011-06-24 This book constitutes the refereed proceedings of the 6th International Conference on Logical Aspects of Computational Linguistics LACL 2011 held in Montpellier France in June July 2011 The 18 revised full papers presented were carefully reviewed and selected from 31 submissions The papers address a wide range of logical and formal methods in computational linguistics such as type theoretic grammars dependency grammars formal language theory grammatical inference minimalism generation and lexical and formal semantics

Abstract Entity Anaphora in Argumentative Texts Donghong Liu, 2023-08-21 This book focuses on abstract entity anaphora in argumentative texts with Asher's 1993 Segmented Discourse Representation Theory SDRT as the theoretical framework investigating its pragmatic features and exploring its referent interpretation The data sources include more than 160 000 word argumentative texts 80 000 word English texts and 80 000 word Chinese ones selected from newspapers journals and books in China and America At first a comparative study was done between Chinese and English argumentative texts so as to compare the pragmatic features of abstract entity anaphora in the two languages Then referent interpretation is explored within the SDRT framework Although SDRT can account for most of the instances of abstract entity anaphora it appears incompetent in dealing with some phenomena in the data of our study Seven problems in SDRT were found and corresponding solutions were proposed in an attempt to improve this theory In general this book has three aspects of significance Firstly it establishes abstract entity anaphora as an independent and a special kind of anaphora Secondly the research methods are the combination of empirical study and theoretical hypotheses as well as the coalescent of dynamic study and static study Thirdly the book is not limited to the application of SDRT to Mandarin Chinese and backward anaphora Instead based on the linguistic phenomena in the data it challenges and improves the theory and it even negates some aspects and meanwhile brings forward new solutions

fueled by seven dominant approaches discourse psychology corpus analysis computational discourse discourse technologies
 conversation analysis hybrid qualitative and quantitative approaches and cultural foundations The contributors also discuss
 future trends in research including corpus analyses the integration of neuroscience with discourse research and the
 development of more advanced computer technologies for analyzing discourse *Text, Speech and Dialogue* Vaclav
 Matousek, Paul Mautner, Roman Moucek, Karel Tauser, 2003-06-30 This book constitutes the refereed proceedings of the 4th
 International Conference on Text Speech and Dialogue TSD 2001 held in Zelezná Ruda Czech Republic in September 2001
 The 59 revised papers presented were carefully reviewed and selected from 117 submissions The book presents a wealth of
 state of the art research and development results from the field of natural language processing with emphasis on text speech
 and spoken language **Thin Objects** Øystein Linnebo, 2018-05-23 Are there objects that are thin in the sense that not very
 much is required for their existence Frege famously thought so He claimed that the equinumerosity of the knives and the
 forks suffices for there to be objects such as the number of knives and the number of forks and for these objects to be
 identical The idea of thin objects holds great philosophical promise but has proved hard to explicate ystein Linnebo aims to
 do so by drawing on some Fregean ideas First to be an object is to be a possible referent of a singular term Second singular
 reference can be achieved by providing a criterion of identity for the would be referent The second idea enables a form of
 easy reference and thus via the first idea also a form of easy being Paradox is avoided by imposing a predicativity restriction
 on the criteria of identity But the abstraction based on a criterion of identity may result in an expanded domain By iterating
 such expansions a powerful account of dynamic abstraction is developed The result is a distinctive approach to ontology
 Abstract objects such as numbers and sets are demystified and allowed to exist alongside more familiar physical objects And
 Linnebo also offers a novel approach to set theory which takes seriously the idea that sets are formed successively Frege
 Michael Dummett, 1991 No one has figured more prominently in the study of the German philosopher Gottlob Frege than
 Michael Dummett His magisterial *Frege Philosophy of Language* is a sustained systematic analysis of Frege's thought
 omitting only the issues in philosophy of mathematics In this work Dummett discusses section by section Frege's masterpiece
The Foundations of Arithmetic and Frege's treatment of real numbers in the second volume of *Basic Laws of Arithmetic*
 establishing what parts of the philosopher's views can be salvaged and employed in new theorizing and what must be
 abandoned either as incorrectly argued or as untenable in the light of technical developments Gottlob Frege 1848-1925 was a
 logician mathematician and philosopher whose work had enormous impact on Bertrand Russell and later on the young
 Ludwig Wittgenstein making Frege one of the central influences on twentieth century Anglo-American philosophy he is
 considered the founder of analytic philosophy His philosophy of mathematics contains deep insights and remains a useful and
 necessary point of departure for anyone seriously studying or working in the field Dialogue Analysis: Units, relations and
strategies beyond the sentence Edda Weigand, Eckhard Hauenherm, 2011-07-13 The topic of this volume was discussed at a

Round Table of the International Association for Dialogue Analysis IADA at the University of Bologna in March 1995 The Round Table was intended to make a scientific contribution in honour of the president's 65th birthday The topic refers on the one hand to the central problem of Dialogue Analysis which is to discover a new communicatively functioning unit after having left behind the unit of the sentence which can be considered the unit par excellence of structural linguistics On the other hand it includes the manifold units relations and strategies i e the specific problems of dialogue analysis Truth and Objectivity Crispin Wright, 2009-07-01 Crispin Wright offers an original perspective on the place of realism in philosophical inquiry He proposes a radically new framework for discussing the claims of the realists and the anti realists This framework rejects the classical deflationary conception of truth yet allows both disputants to respect the intuition that judgments whose status they contest are at least semantically fitted for truth and may often justifiably be regarded as true In the course of his argument Wright offers original critical discussions of many central concerns of philosophers interested in realism including the deflationary conception of truth internal realist truth scientific realism and the theoreticity of observation and the role of moral states of affairs in explanations of moral beliefs **Truth and Interpretation** Ernest LePore, 1986 Each of these 28 essays is part of a comprehensive program to address questions about language mind action and their interconnections Philosophy **Focus** Peter Bosch, Rob van der Sandt, 1999 This collection of papers examines the theoretical psychological and descriptive approaches to focus **Tense, Mood and Aspect** Louis de Saussure, Jacques Moeschler, Genoveva Puskás, 2007 This book is a collection of articles dealing with theoretical issues in the study of tense mood and aspect as well as with specific semantic and syntactic problems raised by linguistic expressions dedicated to these domains across a variety of languages Through these papers strong variations are explored but also crosslinguistic convergences are investigated Numerous phenomena so far often left aside in linguistics are described and enlightened by different scientific standpoints which they serve to illustrate The languages investigated in this volume include Germanic languages Dutch English German Romance French Catalan Italian Slavic Serbo Croatian Czech Russian Greek and non indoeuropean languages such as Thai Digo and Kikuyu Related topics such as grammaticalization presuppositions questions in dialogue illocutionary acts and acquisition are incidentally called upon in order to shed light from the outside onto tense mood and modality and aspect This volume is of great interest for all scholars engaged in contemporary research on the linguistic expression of tense mood and aspect The papers gathered in this volume are a tight selection of the ones that were presented at the 6th Chronos colloquium
