 intention of this volume is two fold first to give a chronologically arranged overview of selected data on the history of science
 in the United States and second to orient the reader to the substantial reference literature and research sources as guidance
 to further study of the topic The subject areas that are covered include astronomy biology chemistry geology mathematics
 physics and their related disciplines areas such as anthropology and psychology are covered to a lesser extent Science is the
 central focus but the content of the work recognizes that the boundaries between subjects or activities are not absolute and
 certainly not when coverage spans several centuries **Book Catalog of the Library and Information Services**
