**Reflections on the Law of War** Frits Kalshoven, 2007 The papers collected in this volume span a 35 year period of active involvement in the reaffirmation and development of international humanitarian law A process under that name started in 1971 and ended in 1977 with the adoption of two Protocols Additional to the Geneva Conventions of 1949 one for international and one for internal armed conflicts Subsequent developments brought a narrowing of this gap between international and internal armed conflicts as well as growing recognition of the interplay between the law of armed conflict and human rights the rediscovery of individual

criminal liability for violations of international humanitarian law the introduction of further prohibitions or restrictions on the use of specified weapons and so on In contrast with these positive developments the period was negatively characterised by increasing disrespect not only for some or other minor rule such as what to do with cash taken from a prisoner of war at the time of his capture but for the very principles underlying the entire body of the law of armed conflict respect for the other as a human being and hence humane treatment of prisoners of war and other detainees protection of civilians Throughout the period the author's activities ranged from participation in lawmaking and law interpreting exercises through attempts at explaining the law of armed conflict in its historical context and making propaganda for its faithful implementation to critical or even bewildered observance of actual events The papers brought together here reflect these diverse angles **Critical**

**Reflection** Robert Malcolm Murray, Nebojsa Kujundzic, 2005 In an era of information overload our need to learn how to critically evaluate the growing flood of information has never been greater Critical Reflection showcases the role of reason in a world saturated by media enhanced persuasion and complex scientific and technological jargon Drawing from the classic philosophical texts this engaging textbook on the art of analyzing arguments is also relevant to today's undergraduates in its use of real life examples and exercises drawn mainly from media and politics Malcolm Murray and Nebojsa Kujundzic cover the standard subjects in a one semester course on critical thinking offering ways to analyze arguments **Reflections on**

**the UN Declaration on the Rights of Indigenous Peoples** Stephen Allen, Alexandra Xanthaki, 2011-01-12 The adoption of the Declaration on the Rights of Indigenous Peoples by the United Nations General Assembly on 13 September 2007 was acclaimed as a major success for the United Nations system given the extent to which it consolidates and develops the international corpus of indigenous rights This is the first in depth academic analysis of this far reaching instrument Indigenous representatives have argued that the rights contained in the Declaration and the processes by which it was formulated obligate affected States to accept the validity of its provisions and its interpretation of contested concepts such as culture land ownership and self determination This edited collection contains essays written by the main protagonists in the development of the Declaration indigenous representatives and field leading academics It offers a comprehensive institutional thematic and regional analysis of the Declaration In particular it explores the Declaration's normative resonance for international law and considers the ways in which this international instrument could catalyse institutional action and influence the development of national laws and policies on indigenous issues **Reflections from the Kitchen** Fred

Raynaud, 2006-10 Reflections is not a cookbook There are no recipes between its pages What you will find is a look at Christ through the eyes of a chef The book takes you behind the scenes of restaurant life and reflects the Glory of Christ while working and worshipping within the marketplace **Multiple Analyses in Clinical Trials** Lemuel A. Moyé, 2006-05-17 One of the most challenging issues for clinical trial investigators sponsors and regulatory officials is the interpretation of experimental results that are composed of the results of multiple statistical analyses These analyses may include the effect of

therapy on multiple endpoints the assessment of a subgroup analysis and the evaluation of a dose response relationship in complex mixtures

**Multiple Analyses in Clinical Trials** Fundamentals for Clinical Investigators is an essentially nonmathematical discussion of the problems posed by the execution of multiple analyses in clinical trials It concentrates on the rationale for the analyses the difficulties posed by their interpretation easily understood solutions and useful problem sets This text will help clinical investigators understand multiple analysis procedures and the key issues when designing their own work or reviewing the research of others This book is written for advanced medical students clinical investigators at all levels research groups within the pharmaceutical industry regulators at the local state and federal level and biostatisticians Only a basic background in health care and introductory statistics is required

Dr Lemuel A Moy M D Ph D is a physician and Professor of Biometry at the University of Texas School of Public Health He has been Co Principal Investigator of two multinational clinical trials examining the role of innovative therapy in post myocardial infarction survival SAVE and the use of cholesterol reducing agents in post myocardial infarction survival in patients with normal cholesterol levels CARE He has authored over one hundred articles in journals such as the Journal of the American Medical Association the New England Journal of Medicine Statistics in Medicine and Controlled Clinical Trials

From the reviews

From the reviews A quick scan of the book indicates that it is not a typical statistics book You can jump in almost anywhere and just start reading I like the book's organization There is a chapter on clinical trials Then there are several chapters that explain the situations that arise from the occurrence of multiple analyses Particular emphasis is given to multiple endpoints situations where one continues a study to follow up on unanticipated results and to subgroup analyses interventions that impact only a fraction of the subjects in a study The author is equally adept at describing clinical trials for the statistician as at explaining statistics to the clinical investigator I enjoyed leafing through this book and would certainly enjoy have the opportunity to sit down and read it

Technometrics August 2004 Moy's background as a statistician and MD makes him especially qualified to write this book The clinical trial examples are a major strength of the book His medical background and extensive clinical trials experience shine through

Statistics in Medicine 2004 23 3551-3559 The many examples from well known clinical trials are clearly one of the strengths of this book It is also fascinating to share the author's experience with the FDA where he attended many meetings of Advisory Committees

Biometrics December 2005 According to the preface this book is written for clinical investigators and research groups within the pharmaceutical industry medical students and regulators I admire the eloquence of the author The author does a remarkable job Without any doubt the book is a valuable source of ideas for the intended audience For statisticians it is an interesting source of experimental setups that are actually used in practice and that consequently are worth while to be studied

dr H W M Hendriks Kwantitatieve Methoden Issue 72B41 2005 The book is entertaining and informative sufficiently informal to recruit and retain the intended non statistical readership but sufficiently formal to detail methods The author effectively sets up each issue with examples and conceptual discussion grounding all in realistic

examples T A Louis Short Book Reviews Vol 24 2 2004 Here in this book is a special situation for clinical trials in which the investigator must do statistical analyses for a number of different response measurements The author felt that the clinical investigators needed a book that they could understand This book is his effort to reach that audience I like the book s organization I enjoyed leafing through this book and would certainly enjoy having the opportunity to sit down and read it Eric R Ziegel Technometrics Vol 46 3 August 2004 This book is written primarily for clinical researchers who are interested in designing and analysing clinical trials It concentrates on elucidating problems arising from multiple analyses in clinical trials In general the book is well written and easy to follow Although this book is written for clinical investigators I find it a useful reference book for statisticians in the pharmaceutical industry Furthermore senior statisticians may find the non technical discussions and practical examples useful Shuying Yang Pharmaceutical Statistics Issue 3 2004 Without any doubt the book is a valuable source of ideas for the intended audience For statisticians it is an interesting source of experimental setups that are actually used in practice and that consequently are worthwhile to be studied Dr H W M Hendriks Kwantitatieve Methoden

**Rethinking Violence** Erica Chenoweth, Adria Lawrence, 2010-08-27 An original argument about the causes and consequences of political violence and the range of strategies employed States nationalist movements and ethnic groups in conflict with one another often face a choice between violent and nonviolent strategies Although major wars between sovereign states have become rare contemporary world politics has been rife with internal conflict ethnic cleansing and violence against civilians This book asks how why and when states and non state actors use violence against one another and examines the effectiveness of various forms of political violence In the process of addressing these issues the essays make two conceptual moves that illustrate the need to reconsider the way violence by states and non state actors has typically been studied and understood The first is to think of violence not as dichotomous as either present or absent but to consider the wide range of nonviolent and violent options available and ask why actors come to embrace particular strategies The second is to explore the dynamic nature of violent conflicts developing explanations that can account for the eruption of violence at particular moments in time The arguments focus on how changes in the balance of

power between and among states and non state actors generate uncertainty and threat thereby creating an environment conducive to violence This innovative way of understanding violence deemphasizes the role of ethnic cleavages and nationalism in modern conflict Contributors Kristin M Bakke Emily Beaulieu H Zeynep Bulutgil Erica Chenoweth Kathryn McNabb Cochran Kathleen Gallagher Cunningham Alexander B Downes Erin K Jenne Adria Lawrence Harris Mylonas Wendy Pearlman Maria J Stephan     **Travels in Europe, Viz., in England, Ireland, Scotland, France, Italy, Switzerland, Germany, and the Netherlands** Wilbur Fisk, 1838
