Camiciotti, 2012-04-16 In recent years there has been a renewed interest in correspondence both as a literary genre and as cultural practice and several studies have appeared mainly spanning the centuries between Early and Late Modern times However it is between the eighteenth and nineteenth centuries that the roots of contemporary usage begin to evolve thanks to the circulation of new educational materials and more widespread schooling practices In this volume chapters representing diverse but complementary methodological approaches discuss linguistic and discursive practices of correspondence in Late Modern Europe in order to offer material for the comparative cross linguistic analyses of patterns occurring in different social contexts The volume aims to provide a general and solid methodological structure for the study of largely untapped language material from a variety of comparable sources and is expected to appeal to scholars and students interested in the linguistic history of epistolary writing practices as well as to all those interested in the more recent history of European languages      *The Oracle*, 1882      **Discourse and Dominion in the Fourteenth Century** Jesse M.

Gellrich, 1995-03-06 This wide ranging study of language and cultural change in fourteenth century England argues that the influence of oral tradition is much more important to the advance of literacy than previously supposed In contrast to the view of orality and literacy as opposing forces the book maintains that the power of language consists in displacement the capacity of one channel of language to take the place of the other to make the source disappear into the copy Appreciating the interplay between oral and written language makes possible for the first time a way of understanding the high literate achievements of this century in relation to momentous developments in social and political life Part I reassesses the nominalism of Ockham and the realism of Wyclif through discussions of their major treatises on language and government Part II argues that the chronicle histories of this century are tied specifically to oral customs and Part III shows how Sir Gawain and the Green Knight and Chaucer's Knight's Tale confront outright the displacement of language and dominion Informed by recent discussions in critical theory philosophy and anthropology the book offers a new synoptic view of fourteenth century culture As a critique of the social context of medieval literacy it speaks directly to postmodern debate about the politics of historicism today
