understandings of reflective practice Documenting approaches that enhance learning the contributions discuss reflective practice across the globe with a focus on pre service in service and university teachers At a time when there is pressure to measure teachers work through standardised tests the book highlights the professional thinking that is integral to teaching and demonstrates ways it can be encouraged in beginning teachers Aimed at the international community of teacher educators in schools and universities it also includes a critical examination of methodological issues in analysing and evaluating reflective practice and showcases the kind of reflective practice that empowers teachers and pre service teachers to make a difference to students

Reflective Teacher Education Linda Valli,1992-09-01 An increasing number of educators are arguing for conceptually sound reflective or inquiry oriented teacher education programs The argument is based on the fact that reflective teaching is possible and the belief that teachers should develop habits of consciously informed action Those who promote reflective teaching argue for teacher empowerment within a self renewing profession Reflective Teacher Education offers case studies from seven universities that have organized teacher education programs around the concept of reflection The cases represent public and private institutions and alternative and traditional models of teacher preparation The studies represent efforts to transform the entire professional education component rather than individual courses or isolated strategies The volume also considers reflection as a conceptual orientation commenting on its power to inform and improve teacher education and assessing the implementation of reflection in these specific programs The six critiques raise intriguing questions about the possibility and desirability of reflective reform efforts by viewing the cases from varying perspectives development cognitive feminist social reconstructionist and post modern

scrutiny Each of the chapters in this book is concerned with exploring the concept of reflection and considering its contributions to teacher education The papers range across different stages of professional development some focusing in particular on pre service education others on in service or professional development generally Some of the papers are concerned with particular strategies for promoting reflection and how they might operate in a teacher education context others dwell more upon a theoretical appreciation of how reflection facilitates in the processes of professional development and how it relates to issues of quality in teacher education

Evidence and Public Good in Educational Policy, Research and Practice Mustafa Yunus Eryaman, Barbara Schneider, 2017-06-22 This volume draws together interdisciplinary approaches from political philosophy social work medicine and sociology to analyze the theoretical foundations and practical examples of evidence based and evidence informed education for the public good It presents a range of conceptions of the evidence based and evidence informed education and a justification for why the particular examples or issues chosen fit within that conception for the sake of public good It explores the current literature on evidence based and evidence informed educational policy research and practice and introduces a new term evidence free meaning actions of some policymakers who disregard or misuse evidence for their own agenda The demands about the quality and relevance of educational research to inform the policy and practice have been growing over the past decade in response to the Evidence Based Education movement However the literature is yet to tackle the question of the interrelationships between evidence research policy and practice in education for the public good in an international context This book fills that gap
