

Reflexology is an alternative health therapy that uses knowledge of reflex points to stimulate the body's natural processes. It is based on the principle that there are correspondences between the organs of the body and parts of the feet, hands and ears. Reflexology is a non-invasive therapy that aims to improve the circulation of blood, lymph and energy in the body, thereby promoting overall health and well-being. The technique of reflexology involves massaging these reflex points with the fingers, thumbs and elbows in order to treat them, and thereby cause organs connected to the pathway.
