New Perspectives on the History of the Twentieth-Century American High School Kyle P. Steele, 2021-11-07 The growth of the American high school that occurred in the twentieth century is among the most remarkable educational social and cultural phenomena of the twentieth century The history of education however has often reduced the institution to its educational function alone

thus missing its significantly broader importance As a corrective this collection of essays serves four ends as an introduction to the history of the high school as a reevaluation of the power of narratives that privilege the perspective of school leaders and the curriculum as a glimpse into the worlds created by students and their communities and most critically as a means of sparking conversations about where we might look next for stories worth telling *The School Improvement Challenge* Jake Madden, 2012 The 2000 schools era is enmeshed in a public discourse around improving student performance with increasing scrutiny being applied to school results and the performance of teachers Drawing on two decades of service as a primary school principal and coupling the findings of a study he instigated into teacher leadership and the principalship Dr Jake Madden tells how the principal can enhance student learning Madden explains through focused case studies in several schools that effective schools have principals who are strong instructional leaders and work to harness the leadership capacities of their teachers This is a book for school leaders who want insight into the capacities that come from engaging teachers in improving school performance **Restructuring Schools for Collaboration** Diana G. Catalog of School Reform Models, 1998 [International Handbook of Leadership for Learning](#) Tony Townsend, John MacBeath, 2011-07-10 The International Handbook of Leadership for Learning brings together chapters by distinguished authors from thirty one countries in nine different regions of the world The handbook contains nine sections that provide regional overviews a consideration of theoretical and contextual aspects system and policy approaches that promote leadership for learning with a focus on educating school leaders for learning and the role of the leader in supporting learning It also considers the challenge of educating current leaders for this new perspective and how leaders themselves can develop leadership for learning in others and in their organisations especially in diverse contexts and situations The final chapter

considers what we now know about leadership for learning and looks at ways this might be further improved in the future. The book provides the reader with an understanding of the rich contextual nature of learning in schools and the role of school leaders and leadership development in promoting this. It concludes that the preposition for between the two readily known and understood terms of leadership and learning changes everything as it foregrounds learning and complexifies rather than simplifies what that word may mean. Whereas common terms such as instructional leadership reduce learning to outcomes, leadership for learning embraces a much wider developmental view of learning.
