Low Thermal Expansion Glass Ceramics Second Edition:

Low Thermal Expansion Glass Ceramics Hans Bach, Dieter Krause, 2005 **Low Thermal Expansion Glass Ceramics**, 1995 This book is one of a series reporting on international research and development activities conducted by the Schott group of companies With the series Schott aims to provide an overview of its activities for scientists engineers and managers from all branches of industry worldwide where glasses and glass ceramics are of interest Each volume begins with a chapter providing a general idea of the current problems results and trends relating to the subjects treated This volume describes the fundamental principles the manufacturing process and applications of low thermal expansion glass ceramics The composition structure and stability of polycrystalline materials having a low thermal expansion are described and it is shown how low thermal expansion glass ceramics can be manufactured from appropriately chosen glass compositions Examples illustrate the formation of this type of glass ceramic by utilizing normal production processes together with controlled crystallization Thus glass ceramics with thermal coefficients of expansion of less than $0.3 \times 10^{-6} \text{ K}^{-1}$ can be obtained Even for the mass production of high quality cooktop panels Ceran R oven windows and other household appliances a high reproducibility of the properties is achieved Special glass ceramics Zerodur R for technological and scientific applications such as high precision optics or large astronomical mirrors are equally discussed **Low Thermal Expansion Glass Ceramics** Mr. Rohit Manglik, 2024-01-09 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels Low thermal expansion glass-ceramics in the system BaO-Al₂O₃-B₂O₃, 2005 **Low thermal expansion glass-ceramics in the system BaO-Al₂O₃-B₂O₃** Diana Tauch, 2005 **Ultra-Low Thermal Expansion Ceramics** H.
