purposeful acquisition of information and images that characterized a direct engagement with the idea of China. The central figure in this story is Henri Leondard Bertin 1720-1792, who served as a minister of state under Louis XV and briefly Louis XVI. Both his official position and personal passion for all things Chinese placed him at the center of intersecting networks of like-minded individuals who shared his ideal vision of China as a nation from which France had much to learn. John Finlay examines a fascinating episode in the rich history of cross-cultural exchange between China and Europe in the early modern period, and this book will be an important and timely contribution to a very current discussion about Sino-French cultural relations. This book will be of interest to scholars in art history, visual culture, European and Chinese history. *The Oxford History of Science* Iwan Rhys Morus, 2022-12-29. Histories you can trust. The first part of the book tells the story of science in both East and West from antiquity to the Enlightenment, from the ancient Mediterranean world to ancient China, from the exchanges between Islamic and Christian scholars in the Middle Ages to the Chinese invention of gunpowder, paper, and the printing press, from the Scientific Revolution of sixteenth and seventeenth-century Europe to the intellectual ferment of the eighteenth century. The chapters that follow focus on the increasingly specialized story of science since the end of the eighteenth century, covering experimental science in the laboratory from Michael Faraday to CERN, the exploration of nature from intrepid Victorian explorers to twentieth-century primatologists, the mapping of the universe from the discovery of Uranus to Big Bang theory, the impact of evolutionary ideas from Lamarck, Darwin, and Wallace to DNA, and the story of theoretical physics from James Clerk Maxwell to Quantum Theory and beyond. A concluding chapter reflects on how scientists have communicated their work to a wider public from the Great Exhibition of 1851 to the internet in the early twenty-first century.
