meticulously unpacks and contemporizes the ancient Roman philosopher Lucretius's understanding of atomic theory Through a scholarly lens Jenkin delves into the poetic and philosophical implications of Lucretius's work particularly how it intersects with the scientific discourse of the 19th century The book's literary style is rich and accessible combining rigorous analysis with a narrative that brings Lucretius's ideas to life inviting readers into the complexities of atomism and its existential ramifications within the broader context of Epicurean thought Fleeming Jenkin a notable physicist and engineer was deeply influenced by the scientific inquiries of his time particularly the burgeoning fields of thermodynamics and atomic theory His academic background and personal fascination with the intersection of science and philosophy led him to engage with Lucretius's text illuminating its relevance for modern readers Jenkin believed in the importance of contrasting ancient wisdom with contemporary scientific advancements and this book serves as the culmination of his endeavor to bridge those worlds For anyone interested in the foundations of atomic theory philosophy or the historical evolution of scientific thought Jenkin's thorough exploration offers invaluable insights This book not only serves as a scholarly resource but also as an invitation to contemplate the enduring legacy of Lucretius's ideas making it a must read for both scholars and casual readers alike

The Atomic Theory of Lucretius John Masson,2015-06-26 Excerpt from *The Atomic Theory of Lucretius Contrasted With Modern Doctrines of Atoms and Evolution* It is strange that the Greek atomic theory of which Lucretius is the sole exponent has not long before this been set in a clear and detailed form before the English reader In Professor Veitch's little book *Lucretius and the Atomic Theory* 1875 only fifteen pages pp 10 25 deal with Lucretius's theory of atoms and that only in a general way while the rest of the volume is occupied with a very able criticism of modern Materialism The scope of Professor Sellar's work does not allow him to enter at all minutely into the science of Lucretius though his chapter on the connecting links between Lucretius's science and his poetry is most valuable Zeller has indeed given us in his *Pre Socratic Philosophy* an admirable sketch of the system of Democritus but his account of the later development of the atomic theory in the hands of Epicurus is by no means equally complete Lange's short chapters on Democritus Epicurus and Lucretius in his *History of Materialism* contain acute enough criticism though in his statement of facts Lange is by no means so trustworthy as Zeller About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do

The most fierce and fiery discussions on theological matters resolve themselves into disputes about words is a commonplace but such a work as this anew proves that the same to a very great extent applies in philosophy Men differ as they do largely because they use terms differently and refuse to look patiently from each other's point of view Mr F Harrison warmly insists for example that there is no need for Comtists to spell humanity with a big H however enthusiastic they may be while his opponents triumphantly insist that to be consistent they must do so and Sir James Stephen refuses to regard this assertion as aught but nonsense One cannot regard the writings of Lucretius or the theory of atoms which he propounded without being at once pulled up in front of the question What is matter and the somewhat warm replies of modern philosophers do not tend to make matters easier Yet here lies the whole gist of the subject Mr Masson is not ambitious enough to aim at an exhaustive definition on his own account but he points out with no little discrimination the defects in the definitions of Professors Huxley and Tyndall and other writers of our day as well as in the conclusions of thinkers like Mr Picton and he deserves all praise for the careful and thoughtful style in which he has analyzed the doctrines of the Epicurean philosophy and more especially as he was in duty bound to do the doctrines of Lucretius He shows in the clearest manner that Lucretius pace Mr Robert Buchanan and those who lead or follow him was no cut and dry materialist but something so different that he may well be regarded as the teacher of ideas in effect identical with those which are in our own day revolutionizing science and philosophy Lucretius held in reality something in common with the mind stuff of Professor Clifford for if he persists in regarding matter as dead his theory of atoms includes soul atoms in some of which volition is vested and in these are logically found the bases for free will which no mere materialist could assert Will with Lucretius is held so to act on matter that Mr Masson ingenuously writes Lucretius conception of Declination as a movement so exceedingly slight the tiny soul atom swerving from the straight line not more than the least possible degree at the impulse of its own Freewill does not this come pretty near to Herschel's no greater force than is required to remove a single material molecule from its place through a space inconceivably minute p 117 This which seems formally mechanical is in reality moral Of course Mr Masson dwells as he could not help doing on the grand lacuna in the philosophy of Lucretius his total failure to account for consciousness Lucretius admitted no more than sensation which he holds is felt in the body as a whole and not in any part separately and yet he insisted on the sense of free will But Mr Masson has made it clear that

Lucretius if he did not clearly formulate all his conceptions perceived the necessity of founding on personal experience and if he did not see his way to accept the immortality of the soul this was a defect for the principle of free will logically implied it One of the happiest summaries of the points of relationship between Lucretius and Professor Clifford and his school of thinkers is thus given by Mr Masson The reasoning of both is based on the same principle and both apply it with equal boldness The question is an instructive one In both cases materialism finding itself hard pressed escapes as it were by a back door and in so doing unconsciously confesses its own powerlessness to account unaided for the origin of life and thought In one point the pagan has the advantage of the modern philosophy in showing none of the bitterness against all forms of religious belief The British Quarterly Review Volume 80 1884 The Atomic Theory of Lucretius Margeret Nettie Oskamp,1885 *The Atomic Theory of Lucretius* ,1800 **The Atomic Theory of Lucretius Contrasted with Modern Doctrines of Atoms and Evolution** John MASSON (M.A.),1884 **Contesting Cultural Authority** Frank M. Turner,1993-04-08 A volume of essays which constitutes a major overview of the Victorian intellectual enterprise The Atomic Theory of Lucretius Contrasted with Modern Doctrines of Atoms and Evolution - Primary Source Edition John Masson,2013-10 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book **A Commentary on Lucretius De Rerum Natura** Don Fowler,2002 Lucretius theory of atomic motion is one of the most difficult and technical parts of De rerum natura and for that reason has hitherto been neglected by commentators This is the first commentary to take account of the remarkable discoveries and re evaluations in the field of Hellenistic philosophy over the past thirty years which have been stimulated by the publication of many more Epicurean fragments from Herculaneum Deleuze-Lucretius Encounter Ryan J. Johnson,2016-12-05 More than any other 20th century philosopher Deleuze considers himself an apprentice to the history of philosophy But scholarship has ignored one of the more formative influences on Deleuze Lucretian atomism Deleuze s encounter with Lucretius sparked a way of thinking that resonates throughout all his writings from immanent ontology to affirmative ethics from dynamic materialism to the generation of thought itself Filling a significant gap in Deleuze Studies Ryan J Johnson tells the story of the Deleuze Lucretius encounter that begins and ends with a powerful claim Lucretian atomism produced Deleuzianism
