Second World War [Illustrated Edition] David N. Spires, 2014-08-15 Illustrated with 3 charts 28 maps and 88 photos This insightful work by David N Spires holds many lessons in tactical air ground operations Despite peacetime rivalries in the drafting of service doctrine in World War II the immense pressures of wartime drove army and air commanders to cooperate in the effective prosecution of battlefield operations In northwest Europe during the war the combination of the U S Third Army commanded by Lt Gen George S Patton and the XIX Tactical Air Command led by Brig Gen Otto P Weyland proved to be the most effective allied air ground team of World War II The great success of Patton s drive across France ultimately crossing the Rhine and then racing across southern Germany owed a great deal to Weyland s airmen of the XIX Tactical Air Command This deft cooperation paved the way for allied victory in Western Europe and today remains a classic example of air ground effectiveness It forever highlighted the importance of air ground commanders working closely together on the battlefield [Air Force Journal of Logistics](#) ,2000

Hutchinson, 2018-10-18 This book in two volumes attempts to explain the technology developments that evolved in the period from 1900 at Kitty Hawk through the ensuing seventy five years leading to the development of the United States F 16 Multinational Weapon System in the mid 1970s By 2017 4 550 F 16s all with the first all electric fly by wire flight control system have been manufactured for use by twenty six countries Awestricken birds undoubtedly ask themselves How do humans do that as an F 16 streaks by at over two hundred times the airspeed of the bird This book strives to provide the how and why answer to that fascinating story

Battle of Britain 1940 Douglas C. Patton's Air Force David N. Spires, 2014-06-10 From the time the Third Army became operational on August 1 1944 until the guns fell silent on May 8 1945 Lt Gen George S Patton s troops covered more ground and took more enemy prisoners than any other Allied army in northwest Europe Brig Gen Otto P Weyland s XIX Tactical Air Command TAC provided air support every step of the way Their combined success is something of an anomaly air ground relationships are notoriously confrontational and plagued with inter service competition How did Patton and Weyland work together to achieve such astounding success Drawing on exclusive access to official records David N Spires finds that this success was due to four key developments the maturation of tactical aviation doctrine effective organizational procedures a technical revolution in equipment and above all the presence of pragmatic men of goodwill who

made the system work He focuses on the highly effective personal relationship between Patton and Weyland men who respected trusted and fully relied on each other and their respective subordinates This collaboration extended all the way down the chain of command Patton s ground troops and Weyland s airmen trained together in England and so by the time they entered combat they operated together as a single unit Contrary to conventional wisdom air ground relationships in the field can be cooperative rather than confrontational Today s air and ground officers can continue to benefit from the amazing success of the Third Army and the XIX TAC

remorseless expansion in the late 1930s it faced immense challenges It had to manage a huge increase in size as well as mastering rapid advances in aviation technology To protect Britain from attack the RAF's commanders had to choose the right strategy and the right balance in its forces The choices had to be made in peacetime with no guidance from combat experience These visions then had to be translated into practical reality A shifting cast of government ministers civil servants and industrialists with their own financial political and military agendas brought further dynamics into play The RAF's readiness for war was crucial to Britain's ability to respond to Nazi aggression before war broke out and when it did the RAF's rearmament was put to the acid test of battle Adrian Phillips uses the penetrating grasp of how top level decisions are made that he honed in his inside accounts of the abdication crisis and appeasement to dissect the process which shaped the RAF of 1940 He looks beyond the familiar legends of the Battle of Britain and explores in depth the successes and failures of a vital element in British preparations for war

Naval Anti-Aircraft Guns & Gunnery Norman Friedman, 2014-01-21 A winner of the Samuel Eliot Morison Award for Naval Literature gives an excellent overview of the problems involved in shooting at airplanes from ships Coast Defense Journal This book does for naval anti aircraft defense what the author's Naval Firepower did for surface gunnery it makes a highly complex but historically crucial subject accessible to the layman It chronicles the growing aerial threat from its inception in the First World War and the response of each of the major navies down to the end of the Second highlighting in particular the widely underestimated danger from dive bombing Central to this discussion is an analysis of what effective AA fire control required and how well each navy's systems actually worked It also takes in the weapons themselves how they were placed on ships and how this reflected the tactical concepts of naval AA defense Renowned military historian Norman Friedman offers striking insights he argues for example that the Royal Navy so often criticized for lack of air mindedness was actually the most alert to the threat but that its systems were inadequate not because they were too primitive but because they tried to achieve too much The book summarizes the experience of WW2 particularly in theaters where the aerial danger was greatest and a concluding chapter looks at post 1945 developments that drew on wartime lessons All important guns directors and electronics are represented in close up photos and drawings and lengthy appendices detail their technical data It is simply another superb contribution to naval technical history by its leading exponent
