Matthew D'Auria

Nicolas Freret Legende Et Verite:

Nicolas Fréret, légende et vérité Chantal Grell, Catherine Volpilhac-Augier, 1994 Ces études signées par des historiens des philosophes des littéraires et des linguistes cherchent à évaluer la méthode de N Freret 1688-1749 pour cerner la démarche d'un esprit parfaitement libre *Nicolas Freret, légende et vérité*, 1994 *In Search of Pre-Classical Antiquity: Rediscovering Ancient Peoples in Mediterranean Europe (19th and 20th c.)*, 2016-11-28 The book aims at rethinking the cultural history of Mediterranean nationalisms between 19th and 20th centuries by tracing their specific approach to antiquity in the forging of a national past By focusing on how national imaginaries dealt with this topic and how history and archaeology relied on antiquity this collection of essays introduces a comparative approach presenting several case studies concerning many regions including Spain Italy and Slovenia as well as Albania Greece and Turkey By adopting the perspective of a dialogue among all these Mediterranean political cultures this book breaks significantly new ground because it shifts attention on how Southern Europe nationalisms are an interconnected political and cultural experience directly related to the intellectual examples of Northern Europe but also developing its own particular trends Contributors are: Idem Atakuman Filippo Carl Francisco Garcia Alonso Maja Gori Eleni Stefanou Rok Stergar Katia Visconti **Julien-David Leroy and the Making of Architectural History** Christopher Drew Armstrong, 2013-04-15 This book examines the career and publications of the French architect Julien David Leroy 1724-1803 and his impact on architectural theory and pedagogy Despite not leaving any built work Leroy is a major international figure of eighteenth century architectural theory and culture Considering the place that Leroy occupied in various intellectual circles of the Enlightenment and Revolutionary period this book examines the sources for his ideas about architectural history and theory and defines his impact on subsequent architectural thought This book will be of key interest to graduate students and scholars of Enlightenment era architectural history *Antiquarianism and Intellectual Life in Europe and China, 1500-1800* Peter N. Miller, François Louis, 2012-06-13 This book is a project in comparative history but along two distinct axes one historical and the other historiographical Its purpose is to constructively juxtapose the early modern European and Chinese approaches to historical study that have been called antiquarian As an exercise in historical recovery the essays in this volume amass new information about the range of antiquarian type scholarship on the past on nature and on peoples undertaken at either end of the Eurasian landmass between 1500 and 1800 As a historiographical project the book challenges the received and often very much under conceptualized use of the term antiquarian in both European and Chinese contexts Readers will not only learn more about the range of European and Chinese scholarship on the past and especially the material past but they will also be able to integrate some of the historiographical observations and corrections into new ways of conceiving of the history of historical scholarship in Europe since the Renaissance and to reflect on the impact of these European terms on Chinese approaches to the Chinese past This comparison is a two way street with the European tradition clarified by knowledge of

Chinese practices and Chinese approaches better understood when placed alongside the European ones The Ruins of the Most Beautiful Monuments of Greece David Le Roy, 2004 The striking engravings of Julien David Le Roy's *The Ruins of the Most Beautiful Monuments of Greece* 1758 first revealed the architectural wonders of ancient Athens to the West Part architectural theory part archaeological report part travelogue the greatly expanded edition of 1770 here translated into English is entirely original in its understanding of the spirit of classical Greek architecture and in its influence on the direction of contemporary architectural creation Book jacket *The Long Quarrel* Jacques Bos, Jan Rotmans, 2021-11-15 The *Long Quarrel* Past and Present in the Eighteenth Century examines how the intellectual clashes emerging from the Quarrel of the Ancients and the Moderns continued to reverberate until the end of the eighteenth century This extended Quarrel was not just about the value of ancient and modern but about historical thought in a broader sense The tension between ancient and modern expanded into a more general tension between past and present which were no longer seen as essentially similar but as different in nature Thus a new kind of historical consciousness came into being in the Long Quarrel of the eighteenth century which also gave rise to new ideas about knowledge art literature and politics Contributors are Jacques Bos Anna Cullhed H kon Eyju Vera Fa hauer Andrew Jainchill Anton M Matytsin Iain McDaniel Larry F Norman David D Reitsam Jan Rotmans Friederike Vo kamp and Christine Zabel The Shaping of French National Identity Matthew D'Auria, 2020-12-03 Casts new light on of the official French nineteenth century narrative by examining how historians and philosophers conceived of the country's past History of Scholarship Christopher Ligota, Jean-Louis Quantin, 2006-04-06 The history of scholarship has undergone a complete renewal in recent years and is now a major branch of research with vast territories to explore a substantial introduction to History of Scholarship surveys the past vicissitudes of the history of scholarship and its current expansion The authors all specialists of international standing come from a variety of backgrounds classical studies history of religions philosophy early modern intellectual and religious history Their papers illustrate a variety of themes and approaches including Renaissance antiquarianism and philology the rise of the notion of criticism Biblical and patristic scholarship and its implications for both confessional orthodoxy and eighteenth century free thought the history of philosophy and German historiographical thought in both the eighteenth and the nineteenth centuries This challenging volume constitutes a collection of remarkable quality helping to establish the history of scholarship as a more broadly acknowledged worthwhile field of study in its own right **Aspects of Hobbes** Noel Malcolm, 2002-11-07 Noel Malcolm one of the world's leading experts on Thomas Hobbes presents a set of extended essays on a wide variety of aspects of the life and work of this giant of early modern thought Malcolm offers a succinct introduction to Hobbes's life and thought as a foundation for his discussion of such topics as his political philosophy his theory of international relations the development of his mechanistic world view and his subversive Biblical criticism Several of the essays pay special attention to the European dimensions of Hobbes's life his sources and his influence the longest surveys the entire European reception of his work from

the 1640s to the 1750s All the essays are based on a deep knowledge of primary sources and many present striking new discoveries about Hobbes s life his manuscripts and the printing history of his works Aspects of Hobbes will be essential reading not only for Hobbes specialists but also for all those interested in seventeenth century intellectual history more generally both British and European

The Enlightenment Dan Edelstein,2010-12-15 What was the Enlightenment Though many scholars have attempted to solve this riddle none has made as much use of contemporary answers as Dan Edelstein does here In seeking to recover where when and how the concept of the Enlightenment first emerged Edelstein departs from genealogies that trace it back to political and philosophical developments in England and the Dutch Republic According to Edelstein by the 1720s scholars and authors in France were already employing a constellation of terms such as l esprit philosophique to describe what we would today call the Enlightenment But Edelstein argues that it was within the French Academies and in the context of the Quarrel of the Ancients and the Moderns that the key definition concepts and historical narratives of the Enlightenment were crafted A necessary corrective to many of our contemporary ideas about the Enlightenment Edelstein s book turns conventional thinking about the period on its head Concise clear and contrarian The Enlightenment will be welcomed by all teachers and students of the period

reconceive the field of knowledge of the Gallic past in French discourse of the eighteenth and early nineteenth centuries by focusing on the monument as an object capable of underpinning insights into that past the evolution of the concept and the epistemic practices used to produce it Through monuments the book redirects our gaze toward the French provinces where material and immaterial evidence of the Gallic past was discovered and transformed into epistemic objects This perspective results in a provincialization of Paris as a site of knowledge production and sheds light on the crucial role of provincial scholarship not only in the invention of the Gallic past but also in methodological and epistemological renewal The result is a revision of recent historiography which interpreted the narrative of an autochthonous pre Roman Gallic past as nation building This volume offers a pioneering contribution toward new directions in historical epistemology focused on the historicity of the species of evidence of each epoch

The Kingdom of Darkness Dmitri Levitin, 2022-03-31 In 1500 speculative philosophy lay at the heart of European intellectual life by 1700 its role was drastically diminished The Kingdom of Darkness tells the story of this momentous transformation Dmitri Levitin explores the structural factors behind this change the emancipation of natural philosophy from metaphysics theologians growing preference for philology over philosophy and a new conception of the limits of the human mind derived from historical and oriental scholarship not least concerning China and Japan In turn he shows that the ideas of two of Europe's most famous thinkers Pierre Bayle and Isaac Newton were both the products of this transformation and catalysts for its success Drawing on hundreds of sources in many languages Levitin traces in unprecedented detail Bayle and Newton's conceptions of what Thomas Hobbes called The Kingdom of Darkness a genealogical vision of how philosophy had corrupted the human mind Both men sought to remedy this corruption and their

ideas helped lay the foundation for the system of knowledge that emerged in the eighteenth century
