Present And Past In Middle Life:

Present and Past in Middle Life Dorothy H. Eichorn, John A. Clausen, Norma Haan, 2013-10-22 Present and Past in Middle Life presents an interdisciplinary focus on the life course from adolescence to middle age Part I is a review of the social history and life experiences that are shaped by the timing of historical forces exemplified in the Oakland Growth Study and the Guidance Study in California Part II deals with the intrapersonal dimensions covering topics such as health in the middle years adolescence experience personality and IQ up to middle age This part discusses the effects and changes brought by the Binet IQ tests and then evaluates the correlation of IQ and adaptability to change Physiological health and the ill effects of alcohol consumption are also explained in this part The book also discusses the child centered personality theory that the past is the cause and the present is the outcome One paper analyzes adolescent personality as predictive to adult psychological health using 19 personality dimensions to arrive at a psychological health index at 40 Other papers discuss men s work careers in their middle years and those of women highlighting women s relationship with work personality and their role in the family The book can be useful for behavioral scientists sociologists counselors physiologists psychiatrists and researchers involved in the field of human development **The Past and Present Life of the Globe** David Page, 1861

The past and present life of the globe, a sketch of the world's life-system David Page, 1861 *In the Course of a Lifetime* Michele Dillon, Paul Wink, 2007-03-20 Dillon and Wink bring their combination of sociological and psychological perspectives to this landmark study making possible a fascinating series of individual portraits and a fresh new window on how life and faith have changed over the last century Nancy T Ammerman author of Pillars of Faith American Congregations and their Partners Building Traditions Building Communities The rich findings in this landmark volume challenge many assumptions about religion and the life course while documenting the multiple ways both direct and subtle that faith relates to personality social attitudes community involvement psychological well being and health This is social science at its best empirically rigorous and theoretically sophisticated for sure but also deeply humane in its ability to convey so clearly the individual voices of the research participants as they struggle to make sense of their lives in a rapidly changing world Dan P McAdams author of The Redemptive Self Stories Americans Live By Geology: Its Past and Present George Douglas Campbell Duke of Argyll, 1859 Aging and the Religious Dimension Susan A. Eisenhandler, 1994-02-17 Aging and religion has been badly neglected in the field of Gerontology This book containing 13 chapters of original theory and research is devoted to understanding the place that religion and spirituality hold in the lives of elderly persons The authors each experts in their own field approach this issue from their backgrounds in the social sciences and the humanities Overall this is a ground breaking collection It is one of the first attempts to seek to understand the role that religion plays in the lives of elderly persons Based on their various multi disciplinary perspectives the authors make use of a variety of qualitative and quantitative methodologies as well as personal narrative and literature to grapple with this issue Finally the book is unique in

that it addresses scholars and students including the educated layman rather than the professional alone American Lives John A. Clausen,1995-01-01 In the culmination of the now famous Berkeley Longitudinal Studies Clausen assesses what he has learned about the lives of 300 men and women studied since their adolescence in the early 1930s to determine why some were successful in their careers marriages and social lives while others were less so **Wake Up! a Mid-Life Challenge** Roy C. Frings,2013-06-29 In comparison to Husserl and Heidegger Max Scheler s philosophy of time as first presented here is considerably wider in scope Using posthumous manuscripts Frings shows that Scheler conceived the origin of time in the self activating center of individual and universal life as threefold absolute time of a four dimensional expanse This serves as a basis for establishing the phenomenon of objective time in multiple steps of constitutionality including the physical field theory and theory of relativity For Scheler objective time even though anchored in absolute time deserves maximum attention in a technological society Frings focuses here with Scheler on time experience of values and among social groups time experiences in the mind set of capitalism in politics and morals in population dynamics and time experiences in the process of aging all of which were signposts in Scheler s thought before his early demise **Middle Age** David Bainbridge,2012-03-01 There s lots of good

news for the middle aged A very jolly book with clear scientific explanations The Telegraph David Bainbridge is a vet with a particular interest in evolutionary zoology and he has just turned forty As well as the usual concerns about greying hair failing eyesight and goldfish levels of forgetfulness he finds himself pondering some bigger questions have I come to the end of my productive life as a human being And what I am now for By looking afresh at the latest research from the fields of anthropology neuroscience psychology and reproductive biology it seems that the answers are surprisingly reassuringly encouraging In clear engaging and amiable prose Bainbridge explains the science behind the physical mental and emotional changes men and women experience between the ages of 40 and 60 and reveals the evolutionary and personal benefits of middle age which is unique to human beings and helps to explain the extraordinary success of our species Middle Age will change the way you think about midlife and help turn the crisis into a cause for celebration Bainbridge s zoological examination of the human animal results in a study that is full of surprises Heartening Sunday Times Thought provoking It should certainly shed some new light on one s own potbellied or menopausal mid life crisis Fascinating Evening Standard
