Playing and Exploring R.A. Hodgkin, 2025-10-01 First published in 1985

Playing and Exploring draws on many disciplines in order to formulate a new way of thinking about the nature and power of education As so often with creative thinkers Robin Hodgkin's work is at once subversive and conservative He is radical in insisting on the overriding need to question and subvert the external examination systems that now cripple education and to raise standards by other means conservative in asserting with Polanyi that an individual's or a group's enterprise draws on a living tradition The book's most important contribution is to our understanding of the educational needs of young adults of the need for adventure and commitment The author develops a theoretical model that begins with the infant exploring its play space He argues that the learner is an active frontier exploring agent so too must be any effective teacher Robin Hodgkin brings forward important new evidence from neuropsychology to show why doing is so important in teaching and learning His argument that both visual and linguistic competence must cooperate actively in the learning process raises a fundamental question about the part television plays in our culture In this as in his earlier books his work is concerned with the real priorities in education with demonstrating that first hand feelings of friendship of wonder and of danger should be

part of the education of all people especially adolescents and that our greatest and certainly most expensive failure is to deny the experience of educational success to so many children *What Matters Most* Chris Woodhead, 2017 Discovering the passions of Chris Woodhead **Trends in Education** ,1973 **Crossing Cultural Frontiers** Walls, Andrew F., 2017-10-12
