Mountains Mark C.J. Stoddart,2012-05-01 Mountains bear the imprint of human activity Scars from logging and surface mining sit alongside national parks and ski lodges Although the environmental effects of extractive industries are well known skiing is more likely to bring to mind images of luxury wealth and health Drawing on interviews field observations and media analysis Stoddart reveals the multiple often conflicting meanings attached to skiing by skiers mass media First Nations industry leaders and environmentalists in British Columbia Stoddart challenges us to reflect on skiing s negative effects as he exposes how certain groups came to be viewed as the natural inhabitants and legitimate managers of mountain environments

Remaking Participation Jason Chilvers, Matthew Kearnes, 2015-11-02 Changing relations between science and democracy and controversies over issues such as climate change energy transitions genetically modified organisms and smart technologies have led to a rapid rise in new forms of public participation and citizen engagement While most existing approaches adopt fixed meanings of participation and are consumed by questions of method or critiquing the possible limits of democratic engagement this book offers new insights that rethink public engagements with science innovation and environmental issues as diverse emergent and in the making Bringing together leading scholars on science and democracy working between science and technology studies political theory geography sociology and anthropology the volume develops relational and co productionist approaches to studying and intervening in spaces of participation New empirical insights into the making construction circulation and effects of participation across cultures are illustrated through examples ranging from climate change and energy to nanotechnology and mundane technologies from institutionalised deliberative processes to citizen led innovation and activism and from the global north to global south This new way of seeing participation in science and democracy opens up alternative paths for reconfiguring and remaking participation in more experimental reflexive anticipatory and responsible ways This ground breaking book is essential reading for scholars and students of participation across the critical social sciences and beyond as well as those seeking to build more transformative Cargomobilities Thomas Birtchnell, Satya Savitzky, John Urry, 2015-04-10 Objects and materials participatory practices are on the move like never before often at astonishing speeds and along hidden routeways This collection opens to social scientific scrutiny the various systems which move objects about the world examining their fateful implications for many people and places Offering texts from key thinkers the book presents case studies from around the world which report on efforts to establish maintain disrupt or transform the cargo mobility systems which have grown so dramatically in scale and The Routledge Handbook of Mobilities Peter Adey, David Bissell, Kevin Hannam, Peter significance in recent decades Merriman, Mimi Sheller, 2014-01-10 The 21st century seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social

sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems. The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study More-than-Human Sociology O. Pyyhtinen, 2016-02-09 More than Human Sociology is a call for a bolder more creative sociology Olli Pyvhtinen argues that to make sociology responsive to life in the 21st century we need a new sociological imagination one that addresses connectivity understands the world in which we live as both a human and non human world and is sensitive to the multiple scales on which things exist A fresh and innovative take on the promise of sociology this book will appeal to scholars and students both within sociology and the social sciences Archaeology, History and Science Marcos Martinon-Torres, Thilo Rehren, 2016-09-16 Using a combination of more broadly historical archaeological and scientific data is not an uncommon research practice Rarely found however is a more overt critical consideration of how these sources of information relate to each other or explicit attempts at developing successful strategies for interdisciplinary work The authors in this volume provide such critical perspectives examining materials from a wide range of cultures and time periods to demonstrate the added value of combining in their research seemingly incompatible or even contradictory sources Case studies include explorations of the symbolism of flint knives in ancient Egypt the meaning of cuneiform glass texts medieval metallurgical traditions and urban archaeology at industrial sites This volume is noteworthy as it offers novel contributions to specific topics as well as fundamental reflections on the problems and potentials of the interdisciplinary study of the human past **Re-crafting Rationalization** Simon Locke, 2016-03-23 Re crafting Rationalization contributes to debates relating to the public understanding of science regarding the conceptualization of the relationship between science and the public It challenges the prevailing science centred or top down

framework that currently informs notions of public engagement and knowledge transfer offering an alternative that remains firmly grounded in the discourse of classical social theory By proposing an alternative version of rationalization to the standard interpretation of Weber's disenchantment thesis this book establishes the public understanding of science as a matter of fundamental sociological concern As such it redefines this field to emphasize public meanings of science engaging with a range of topics of major interest to the public and popular meaning of science including science and religion science fiction and fantasy fringe science and media representations of science Combining rhetorical analysis with ethnomethodology and membership categorization analysis the book outlines the basis of a new approach to the sociology of knowledge in the light of which Weber's rationalization thesis is radically re crafted in relation to studies of scientists discourse the rhetoric of science popularization and public usages of science This re crafted rationalization is applied in a series of detailed empirical studies of enchanted science creationism and intelligent design Scientology and reflexive spirituality superhero comics and mundane mysteries Fortean discourse conspiracy theory and media representations of the scientist in the case of Jack the Ripper Re crafting Rationalization therefore redresses a significant shortcoming in contemporary social theory which currently overlooks or misrepresents important public meanings of science whilst excluding popular culture from attention With profound implications for the ways in which we make sense of developments involving science this book will be of interest not only to sociologists and social theorists but also to those interested in popular culture and subcultures and the history philosophy and sociology of science
