The Reconstruction of Humanity Pitirim Aleksandrovich Sorokin,1971 *The Haifa Gene: Humanity's Reckoning* G Minerva,2025-09-20 In a world on the brink one scientist's ambition changes the course of humanity forever Arnav a brilliant geneticist discovers the Haifa Gene a mysterious genetic sequence capable of altering human physiology and enhancing strength beyond imagination What begins as a mission to advance human potential spirals into chaos when ambition and ethical compromise unleash uncontrollable monstrosities GeneCore a powerful corporation weaponizes Arnav's research creating half human half monster beings that terrorize cities from Tokyo to New York Governments scramble armies intervene and the world plunges into panic as civilization faces an unprecedented threat Haunted by guilt Arnav joins forces with Ira a pragmatic scientist and Rohit an investigative journalist to infiltrate GeneCore's hidden Antarctic lab Their mission retrieve the original gene sample and develop a vaccine capable of reversing the monstrous transformations In a deadly race against time Arnav confronts the very creations he helped unleash in a final harrowing battle The vaccine is unleashed saving humanity but not without consequences Some survivors retain fragments of the Haifa Gene sparking a new evolution Humanity begins to rebuild wiser and cautious aware that the line between scientific discovery and ethical responsibility is perilously thin As Arnav reflects a chilling truth emerges Science gives us power but morality lights the path Forget our ethics and we risk plunging into a new catastrophe The Haifa Gene is a thrilling exploration of ambition responsibility and the fragile balance between progress and destruction *Sorokin & Civilization* Joseph Brandon Ford,Michel Paul Richard,Palmer Talbutt,Pitirim Aleksandrovich Sorokin, Sorokin and Civilization is a festschrift to Pitirim Sorokin one of the most famed figures of twentieth century sociology and first president of the International Society for the Comparative Study of Civilizations ISCSC He was a giant of the twentieth century stage in the larger world as well He debated with Trotsky exchanged ideas with Pavlov and received a personal invitation to meet with President Masaryk of Czechoslovakia His principled dissent from sociological orthodoxy frequently anticipated that of Charles Wright Mills Alfred McClung Lee and Alexander Solzhenitsyn He was to paraphrase Joseph Ford a scholar among statesmen and a statesmen among scholars

Ways & Power Of Love Pitirim A. Sorokin,2015-10-22 The Ways and Power of Love was originally published in 1954 when Pitirim Sorokin was in the twilight of his career and leading the Harvard Research Center in Creative Altruism His elaborate scientific analysis of love with regard to its higher and lower forms its causes and effects its human and cosmic significance and its core features constitutes the first study on this topic in world literature to date Sorokin was the one absolutely essential twentieth century pioneer in the study of love at the interface of science and religion Bringing The Ways

and Power of Love back into print allows a new generation of readers to appreciate Sorokin's genius and to move forward with his endeavor at a time when civilization itself continues to be threatened by a marked inability to live up to the ideal of love for all humankind. It is certainly right to hope with Sorokin that progress in knowledge about love can move humanity forward to a better future. Turning the sciences toward the study of love is no easy task but it can and must be done.

Compassionate Love and Ebony Grace Kortright Davis, 2012-03-22 Why is the Golden Rule so central in almost every culture and religion? What is it that drives human beings to do good to others? Are altruism, compassion, and forgiveness natural forms of human behavior, or do they have to be learned and practiced in the neural context of our primal instincts for survival and self-defense? These are some of the questions that lie behind the study of Compassionate Love amongst people of color. Davis explores the patterns and contours of other love, which he defines as a selfless regard for the well-being of others. He also examines the basis for distinctive modes of compassionate behavior enriched by ebony grace, a theological attribution for people of African descent. This text focuses especially on the historical, cultural, and religious heritage that inspires and empowers such attitudes in spite of constant encounters with systemic negation, social alienation, and unrelenting racism. How is it that Black families in the home, school, and church still support, sustain, and succeed in the practice of unyielding love in compassion? That is the magic and mystery within contemporary Black cultural norms and moral values. This text is a powerful attempt to contribute to the debate on Christian altruism. *Stove Mounters' & Range Workers' Journal*, 1918

Theosophy Katherine Augusta Westcott Tingley, 1922 *Sorokin*, Pitirim A. Rubin Gotesky, 1949 Theosophy, the Path of the Mystic Katherine Tingley, 1922 **The Scriptures of Won Buddhism** Bongkil Chung, 2003-01-31 Won Buddhism, one of the major religions of modern Korea, was established in 1916 by Pak Chung bin (1891-1943), later known as Sot'aesan. In 1943, Sot'aesan published a collection of Buddhist writings, the Correct Canon of Buddhism, Pulgyo Chongjon, which included the doctrine of his new order. Four years later, the second patriarch Chongsan (1900-1962) had the order compile a new canon, which was published in 1962. This work translated here as The Scriptures of Won Buddhism, Wonbulgyo Kyojon, consists of the Canon, a redaction of the first part of the Pulgyo Chongjon, and the Analects and Chronicle of the founder, known as the Scripture of Sot'aesan. The present translation incorporates critical tenets from the 1943 Canon that were altered in the redaction process and offers persuasive arguments for their re-inclusion. *Pitirim A. Sorokin: Rediscovering a Master of Sociology* Emiliana Mangone, 2023-09-12 Pitirim A. Sorokin is a controversial figure in the history of sociology of which he remains one of the masters. Those who read Sorokin today must, however, frame the historical reality experienced by the scholar, his Russian and American experiences, because the evolution of his thought had several phases that correspond to his personal family and professional lives. He founded and directed the Department of Sociology at Harvard University for many years. This Russian-American sociologist argued that socio-cultural phenomena must be studied following their dynamism in space and time, since the constituent elements, personality, society, and culture are constantly changing and

cannot be studied separately Reviving his thought is not a form of celebration but a moment to reflect on how some sociology classics still have their relevance and how all too often they are forgotten This is why this book takes up his main conceptualizations by anchoring them to contemporary society whose transformations are often difficult to read and above all to highlight how the role of sociology as a science has in part lost sight of its ontological foundation as a service to humanity or public service The theoretical paths taken by Sorokin range from Social and Cultural Dynamics to Social Mobility and to many other topics such as man and society in calamities or love and altruism one of Sorokin's latest topics All these topics can revive the idea of a sociology that holds together the micro meso and macro dimensions and allows us to predict changes in society

Humanity's Last Stand Mark Schuller, 2021-01-15 Are we as a species headed towards extinction As our economic system renders our planet increasingly inhospitable to human life powerful individuals fight over limited resources and racist reaction to migration strains the social fabric of many countries How can we retain our humanity in the midst of these life and death struggles Humanity's Last Stand dares to ask these big questions exploring the interconnections between climate change global capitalism xenophobia and white supremacy As it unearths how capitalism was born from plantation slavery and the slaughter of Indigenous people it also invites us to imagine life after capitalism The book teaches its readers how to cultivate an anthropological imagination a mindset that remains attentive to local differences even as it identifies global patterns of inequality and racism Surveying the struggles of disenfranchised peoples around the globe from frontline communities affected by climate change to BlackLivesMatter activists to Indigenous water protectors to migrant communities facing increasing hostility anthropologist Mark Schuller argues that we must develop radical empathy in order to move beyond simply identifying as allies and start acting as accomplices Bringing together the insights of anthropologists and activists from many cultures this timely study shows us how to stand together and work toward a more inclusive vision of humanity before it's too late More information and instructor resources <https://humanityslaststand.org>

A Political Theology of Nature Peter Scott, 2003-03-06 This book argues that the modern separation of humanity from nature can be traced to the displacement of the triune God Locating the source of our current ecological crisis in this separation Peter Scott argues that it can only be healed within theology through a revival of a Trinitarian doctrine of creation interacting with political philosophies of ecology Drawing insights from deep ecology ecofeminism and social and socialist ecologies Scott proposes a common realm of God nature and humanity Both Trinitarian and political the theology of this common realm is worked out by reference to Christ and Spirit Christ's resurrection is presented as the liberation and renewal of ecological relations in nature and society the movement of the Holy Spirit is understood as the renewal of fellowship between humanity and nature through ecological democracy and the Eucharist is proposed as the principal political resource Christianity offers for an ecological

age *Kant's Search for the Supreme Principle of Morality* Samuel J. Kerstein, 2002-05-02 At the core of Kant's ethics lies the claim that if there is a supreme principle of morality then it cannot be a principle based on utilitarianism or Aristotelian perfectionism or the Ten Commandments. The only viable candidate for such a principle is the categorical imperative. This book is the most detailed investigation of this claim. It constructs a new critical reading of Kant's derivation of one version of the categorical imperative, the Formula of Universal Law. This reading shows this derivation to be far more compelling than contemporary philosophers tend to believe. It also reveals a novel approach to deriving another version of the categorical imperative, the Formula of Humanity, a principle widely considered to be the most attractive Kantian candidate for the supreme principle of morality. This book will be important not just for Kant scholars but for a broad swathe of students of philosophy.
