Recovering Protestantism's Original Insight Paul E. Capetz, 2023-04-20 In this engaging volume Capetz argues that Protestants have largely ignored Luther's heritage when it comes to thinking about biblical authority and instead have followed Calvin's biblicism leading to many intellectual and moral problems in the face of a fully historical critical understanding of the Bible in our time After prefacing the book with a personal story that illustrates what is at stake in this question for the church's pastoral ministry he examines in detail the debate between Barth an heir of Calvin and Bultmann a Lutheran regarding Sachkritik or content criticism of Scripture since their debate serves to clarify the central issue facing Protestants today He then traces their debate back to the Reformation itself to show how the difference between Luther and Calvin presented Protestants from the outset with two conflicting models of biblical authority He then reflects on how this question of the proper understanding of biblical authority manifests itself in the debates over sexual ethics that have plagued mainline denominations for the past four decades And he concludes by arguing that Luther's heritage provides Protestants with a viable way to engage in a robust theological interpretation of the Bible that does not violate what historical criticism has taught us about it

Redefining Recovery from Aphasia Dalia Cahana-Amitay,Martin Albert,2015-01-07 This book focuses on two fundamental aspects of brain language relations one concerns the neural organization of language in the healthy brain the other challenges current approaches to treatment of aphasia and offers a new theory for recovery from aphasia The essence of the book lies in the phrase neural multifunctionality the constant and dynamic incorporation of non linguistic functions into language models of the intact brain The book makes the claim that language is a construction created as we use it and cannot be understood as being supported by neurally based linguistic networks only Rather language emerges from the

constant and dynamic interaction among neural networks subserving cognitive affective and praxic functions with neural networks subserving lexical retrieval naming sentence processing comprehension and discourse communication conversation In persons with stroke induced aphasia neural networks for executive system function attention memory motor system function visual system function and emotion interact with neural networks for language to produce the aphasia profile and to influence recovery from aphasia Consequently neural multifunctionality in aphasia explains individual differences in the lesion deficit model and continued recovery over time redefining the concept of recovery from aphasia and offering new opportunities for treatment

The Ministry, Vol. 09, No. 04 Various Authors, 2005-04-01 This issue of The Ministry contains the first group of eight messages given during the 2004 fall term of the Full time Training in Anaheim California The general subject for this line of messages is the intrinsic significance of the Lord s recovery for the building of the church as the house of God and the city of God The word recovery means a restoration or a return to a normal condition after damage or loss has been incurred The principle of recovery is to bring us back to the beginning Matt 19 8 to God s beginning back to what is normal in God s eyes We do not want to be in an abnormal situation of division confusion or denominationalism or in a situation filled with idols and impurities We want to be recovered back to the enjoyment of Christ as our all inclusive good land so that we can be filled with Him in His unsearchable riches and be built up to be the living temple the house of the living God 1 Tim 3 15 This is the Body of Christ for His expression We also want to be built up as the kingdom of God to represent God for His dominion on this earth as pictured by the city of Jerusalem God s recovery begins with our exercised spirit God wants to recover the spirit of man for His economy We can exercise our spirit to contact God worshipping God in our spirit with Christ as our reality Thus we are here to build up the church as the house of God and the kingdom of God Last of all we include a report concerning the Lord s move in the French speaking world and an update concerning the distribution of the ministry in Poland

Early Category and Concept Development David H. Rakison, Lisa M. Oakes, 2008-12-30 Whether or not infants earliest perception of the world is a blooming buzzing confusion it is not long before they come to perceive structure and order among the objects and events around them At the core of this process and cognitive development in general is the ability to categorize to group events objects or properties together and to form mental representations or concepts that encapsulate the commonalities and structure of these categories Categorization is the primary means of coding experience underlying not only perceptual and reasoning processes but also inductive inference and language The aim of this book is to bring together the most recent findings and theories about the origins and early development of categorization and conceptual abilities Despite recent advances in our understanding of this area a number of hotly debated issues remain at the center of the controversy over categorization Researchers continue to ask questions such as Which mechanisms for categorization are available at birth and which emerge later What are the relative roles of perceptual similarity and nonobservable properties in early classification What is the role of contextual variation in

categorization by infants and children Do different experimental procedures reveal the same kind of knowledge Can computational models simulate infant and child categorization How do computational models inform behavioral research What is the impact of language on category development How does language partition the world This book is the first to address these and other key questions within a single volume The authors present a diverse set of views representing cutting edge empirical and theoretical advances in the field The result is a thorough review of empirical contributions to the literature and a wealth of fresh theoretical perspectives on early categorization
