Copyright Office, 1979 *Raising China's Revolutionaries* Margaret Mih Tillman, 2018-10-02 A widespread conviction in the need to rescue China's children took hold in the early twentieth century Amid political upheaval and natural disasters neglected or abandoned children became a humanitarian focal point for Sino Western cooperation and intervention in family life Chinese academics and officials sought new scientific measures educational institutions and social reforms to improve children's welfare Successive regimes encouraged teachers to shape children into Qing subjects Nationalist citizens or Communist comrades In *Raising China's Revolutionaries* Margaret Mih Tillman offers a novel perspective on the political and

scientific dimensions of experiments with early childhood education from the early Republican period through the first decade of the People's Republic. She traces transnational advocacy for child welfare and education examining Christian missionaries, philanthropists and the role of international relief during World War II. Tillman provides in-depth analysis of similarities and differences between Nationalist and Communist policy and cultural notions of childhood. While both Nationalist and Communist regimes drew on preschool institutions to mobilize the workforce and shape children's political subjectivity, the Communist regime rejected the Nationalists' commitment to the modern bourgeois family. With new insights into the roles of experts, the cultural politics of fundraising and child welfare as a form of international exchange, *Raising China's Revolutionaries* is an important work of institutional and transnational history that illuminates the evolution of modern concepts of childhood in China.

*In the Lap of Tigers* John Cleverley, 2000-02-22 Founded in the forested mountains of China's remote Jiangxi Province in 1958, the Communist Labor University, along with some 100 branch campuses, introduced uneducated farmers and peasants to basic agricultural science and farming techniques through an innovative work study program until 1980. Drawing on a wealth of archival materials, John Cleverley here explores the inner workings of this unique Chinese institution and the direct personal involvement in its affairs by the nation's key communist leaders including Mao Zedong, Zhou Enlai, Zhu De and Deng Xiaoping. The community would survive the dictates of political agriculture, famine and pestilence and the Cultural Revolution, thus mirroring higher education's own cycle of expansion, contraction and division. Yet the university could not avoid the bitter factional politics and deadly power plays of the 1970s. Open to the charge that it was a utopian experiment, another of Mao's great follies, its undoing was part of the larger canvas of China's shift from a Maoist vision to Deng's philosophy of pragmatic socialism. This fascinating story illuminates the internal and external politics of an innovative educational enterprise from both an institutional and personal perspective. In the process, the book underscores the larger issues of educational reform and political and social change in China.

*The Origins of the Developmental State in Taiwan* J. Megan Greene, 2008-04-30 The rapid growth of Taiwan's postwar miracle economy is most frequently credited to the leading role of the state in promoting economic development. Megan Greene challenges this standard interpretation in the first in-depth examination of the origins of Taiwan's developmental state. Greene examines the ways in which the Guomindang state planned and promoted scientific and technical development both in mainland China between 1927 and 1949 and on Taiwan after 1949. Using industrial science policy as a lens, she shows that the state, even during its most authoritarian periods, did not function as a monolithic entity. State planners were concerned with maximizing the use of Taiwan's limited resources for industrial development. Political leaders, on the other hand, were most concerned with the state's political survival. The developmental state emerged gradually as a result of the combined efforts of technocrats and outsiders, including academicians and foreign advisors. Only when the political leadership put its authority and weight behind the vision of these early planners did Taiwan's developmental state fully come into being. In

Taiwan's combination of technocratic expertise and political authoritarianism lie implications for our understanding of changes taking place in mainland China today      Historical Dictionary of the Chinese Communist Party Lawrence R.
