Red Data Birds In Britain Action For Rare Threatened And Important Species:

Globally Threatened Birds in Europe Borja Heredia, Laurence Rose, Mary Painter, BirdLife International, 1996-01-01 Of some 10000 bird species in the world 514 are to be found in Europe Of these twenty six European species are globally threatened risk extinction if their populations are not actively built up This series of action plans for Europe s most threatened species is the result of a joint project carried out by BirdLife International in collaboration with Wetlands International involving over 370 experts in almost every European country This book will be of interest to conservationists at both national local level educators all those interested in the conservation of Europe s bird heritage **Evaluation and Assessment for Conservation** Ian Spellerberg, 2013-11-11 Most politicians have jumped on the conservation bandwagon and nobody running for public office these days can afford to take an overtly anti environment stand The fascination that children have for nature the generous donations people make to conservation organizations the votes cast for Green Parties the continuing popularity of zoos and wildlife films and the strong sales of books about the environment all provide evidence to politicians that the general public supports the idea of conservation Conservation has become a major issue for governments No longer is it necessary for conservationists to campaign for getting the cause on the agenda it is already there at least as a talking point The issue now is how to convert this generalized interest into real action And among the many priorities competing for attention how is a government or a private organization to decide what to do first From a very limited budget for budgets will always be limited what is the package of activities that is most likely to lead to the results that the public wants Ian Spellerberg attempts to address these questions which are at the heart of modern conservation action It is relatively easy to prescribe useful activities that will benefit both the environment and the public at large *Bird Conservation and Agriculture* Jeremy D. Wilson, Andrew D. Evans, Philip V. Grice, 2009-07-09 This gripping and chillingly realistic novel from New York Times bestselling author Sharon Draper shows that all it takes is one bad decision for everything to change Diamond knows not to get into a car with a stranger But what if the stranger is well dressed and handsome On his way to meet his wife and daughter And casting a movie that very night a movie in need of a star dancer What then Then Diamond might make the wrong decision It s a nightmare come true Diamond Landers has been kidnapped She was at the mall with a friend alone for only a few brief minutes and now she s being held captive forced to endure horrors beyond what she ever could have dreamed while her family and friends experience their own torments and wait desperately for any bit of news From New York Times bestselling author Sharon Draper this is a riveting exploration of power how quickly we can lose it and how we can take it back *Nightjars and Their Allies* D.T. Holyoak, 2001-07-19 All the species are illustrated in 23 colour plates painted by Martin Woodcock He has also contributed text drawings that illustrate behaviour and other features **BOOK JACKET** *The Living Planet in Crisis* Joel Cracraft, 1999 Papers presented at a conference held at New York in 1995 *Conservation and the Use of Wildlife Resources* Melvin Bolton, 2012-12-06 Not

everybody cares about the fate of wild animals or the state of the natural environment I met a lady who said it wouldn't worry her if all the wild animals in the world disappeared overnight She was a city person she said There are also people who would prefer to let animals become extinct than to have them kept in captivity no matter how progressive the zoo There are those who on principle will not eat meat let alone do the killing and there are those who enjoy nothing so much as shooting birds People in the last two camps may oppose each other in claiming to be conservationists Extremists are unlikely to find their opinions being reversed by this book but because of the scope of the subject I believe there is a good chance that anybody with an interest in wildlife will find in it something new to think about It may not be too much to hope that a few disagreements might also be settled because I suspect there is more common ground than is generally realized among those with opposing views

Action for Biodiversity in the UK F. J. Wright, Colin A. Galbraith, Roger Bendall, 1993 Presents the proceedings of a seminar held in May 1993 to discuss the UK's National Action plan for Biodiversity *British Birds*, 1992

Britain's Birds in ..., 1991 *Moral Entanglements* Stefan Bargheer, 2018-04-05 At the center of Stefan Bargheer's account of bird watching field ornithology and nature conservation in Britain and Germany stands the question of how values change over time and how individuals develop moral commitments Using life history data derived from written narratives and oral histories *Moral Entanglements* follows the development of conservation from the point in time at which the greatest declines in bird life took place to the current efforts in large scale biodiversity conservation and environmental policy within the European Union While often depicted as the outcome of an environmental revolution that has taken place since the 1960s Bargheer demonstrates to the contrary that the relevant practices and institutions that shape contemporary conservation have evolved gradually since the early nineteenth century *Moral Entanglements* further shows that the practices and institutions in which bird conservation is entangled differ between the two countries In Britain birds derived their meaning in the context of the game of bird watching as a leisure activity Here birds are now as then the most popular and best protected taxonomic group of wildlife due to their particularly suitable status as toys in a collecting game turning nature into a playground In Germany by contrast birds were initially part of the world of work They were protected as useful economic tools rendering services of ecological pest control in a system of agricultural production modeled after the factory shop floor Based on this extensive analysis Bargheer formulates a sociology of morality informed by a pragmatist theory of value

The Merlin Frank Rennie, 2025-07-29 The Merlin *Falco columbarius* is Europe's smallest falcon and its breeding presence is often regarded as a key indicator of a healthy natural environment A highly adaptable species it displays a variety of intriguing and contrasting behaviours across its extensive Northern Hemisphere range Frank Rennie has spent many years observing and researching the characteristics of this important raptor His landmark volume brings together for the first time many important sources of information from Europe Asia and North America to better explain the complex and adaptive nature of the Merlin which make it such a fascinating bird to observe The book provides in depth coverage of the complex

origins and behaviours of the Merlin from its obscure fossil ancestors through to the contemporary challenges it faces from habitat destruction environmental pollution and climate change Close investigation of its hunting methods habitat selection and breeding activities reveals some surprising regional differences that offer a new understanding of this critically important elusive and quietly majestic indicator species **Red Data Book for Cornwall and the Isles of Scilly** ,1997

The Nature of the Cairngorms Philip Shaw,Des B.A. Thompson,2006-06-12 The Cairngorms area is arguably the most significant for nature conservation in the British Isles and contains its largest National Park In this book 35 authors drawing on published and unpublished sources present an up to date review of the area s natural features including plants animals habitats geology and landforms The review falls into three parts The first and largest part describes the area s rich diversity of nature with each chapter summarising recent research findings trends and conservation issues for a different landform habitat or species group The second part considers deer management recreation and projected climate change impacts Part three focuses on rare and threatened species and identifies areas and habitats rich in species for which the Cairngorms are nationally and internationally important **Agriculture and EU Environmental Law** Brian Jack,2016-03-23 This book critically examines the development and current structure of European Union agri environmental measures at a substantive level Examining the measures in an integrated manner showing how they interrelate linking different aspects of European Union agricultural law and policy this volume examines the legislation adopted at European Union level as well as the impact of particular national measures to implement that legislation Where appropriate comparisons are drawn between the manner in which European Union legislation has been implemented among various Member States Critically assessing European Union and national measures in the light of other policy pressures such as the influence of world trade agreements and the political pressures exerted by the agricultural sector within the national legal systems of individual Member States this volume is a valuable resource for academics researching and practitioners working in the areas of European Union environmental and agricultural law **Loving Nature** Kay Milton,2003-09-01 As the full effects of human activity on Earth s life support systems are revealed by science the question of whether we can change fundamentally our relationship with nature becomes increasingly urgent Just as important as an understanding of our environment is an understanding of ourselves of the kinds of beings we are and why we act as we do In *Loving Nature* Kay Milton considers why some people in Western societies grow up to be nature lovers actively concerned about the welfare and future of plants animals ecosystems and nature in general while others seem indifferent or intent on destroying these things Drawing on findings and ideas from anthropology psychology cognitive science and philosophy the author discusses how we come to understand nature as we do and above all how we develop emotional commitments to it Anthropologists in recent years have tended to suggest that our understanding of the world is shaped solely by the culture in which we live Controversially Kay Milton argues that it is shaped by direct experience in which emotion plays an essential role The author argues that the conventional opposition

between emotion and rationality in western culture is a myth The effect of this myth has been to support a market economy which systematically destroys nature and to exclude from public decision making the kinds of emotional attachments that support more environmentally sensitive ways of living A better understanding of ourselves as fundamentally emotional beings could give such ways of living the respect they need

The Conservation of Lowland Dry Grassland Birds in Europe Paul D. Goriup, L. A. Batten, John A. Norton, 1991 Dry grasslands support some specialised bird species in particular bustards stone curlews and sandgrouse However they are disappearing in Europe causing a decline in these birds populations This text presents the seminar which discussed the rate of decline habitat loss and recommendations for halting it within a European context

European Bird Populations Melanie F. Heath, Carolien Borggreve, Nicholas Peet, 2000 Birds, 2002 TLLS, the Times Literary Supplement, 1992

Habitats for Birds in Europe Graham M. Tucker, M. I. Evans, 1997 The greatest threats to Europe s birds and biodiversity come from loss and degradation of habitat This book brings together more than 190 bird and habitat conservation experts from all over Europe to examine the threats to Europe s eight major habitat types and propose policies and actions to protect and restore them Although the emphasis is on birds particularly the 40 percent of European species with an unfavourable conservation status many recommendations would help conserve all elements of biodiversity in the wider European environment An important contribution to the conservation of biodiversity in Europe Peter L Nielsen European Commission An extremely valuable reference for bird conservationists in any continent The Wilson Bulletin
