**Commercial Law Reform** John Gillespie,2017-03-02 The first sustained analysis examining legal transplantation into East Asia this volume examines the prospects for transplanting a rule of law that will attract and sustain international trade and investment in this economically dynamic region The book develops both a general model that explains how legal transplantation shapes legal development in the region whilst developing theoretical insights into the political economic and legal discourses guiding commercial law reforms in Vietnam For the first time this book develops a research methodology specifically designed to investigate law reform in developing East Asia In so doing it challenges the relevance of conventional

convergence and divergence explanations for legal transplantation that have been developed in European and North American contexts As the first finely grained analysis of legal development in Vietnam the book will be invaluable to academics and researchers working in this area It will also be of interest to those involved in commercial legal theory

**Corruption in Asia** Timothy Lindsey, Howard W. Dick, 2002 Multilateral and bilateral aid agencies now direct much of their East Asia activities to so called governance reform Almost every major development project in the region must now be justified in these terms and will usually involve an element of legal institutional reform anti corruption initiatives or strengthening of civil society and often a mix of all of these Most are in fact major exercises in social engineering Aid agencies and major multilateral players like the IMF the World Bank and the Asian Development Bank are attempting not just to improve governance systems and combat corruption but implicitly to restructure entire national political systems and administrative structures Conditionality puts real weight behind these projects If successful they could transform the face of East Asia Defining governance and understanding corruption are therefore not minor issues of terminology However a great deal of optimism is required to believe that social engineering for good governance will succeed in either Indonesia or Vietnam within the foreseeable future In Indonesia there is neither the political will nor the mechanism to act since the legal system is itself utterly corrupted Better laws have been passed but they fail in implementation In Vietnam the problems are somewhat different but the outcomes are similar Corruption is widely recognised to be a major political social and economic issue even by the Party itself but few cases are ever tried The bureaucracy including the legal system and the party are so complicit that reform is impossible These systemic problems point to the basic flaw in the good governance agenda and strategy A politically powerful alliance of foreign and domestic interests is necessary Foreign multilateral agencies donors and NGOs are able to set the international policy agenda but their domestic allies are politically weak In the absence of rule of law the basic institutions of these transitional societies remain largely as they were and there is as yet no viable alternative system in either Indonesia or Vietnam The argument of this book is that more might be achieved sooner by much better understanding of political legal commercial and social dynamics in Indonesia and Vietnam not as they are meant to be but as they are Multilateral agencies donors NGOs business firms and scholars on the one hand and local politicians bureaucrats business people lawyers journalists academics and NGOs on the other hand have much usefully to discuss Only out of that dialogue a dialogue between the world as it is and the world of ideals can steady progress be made This book examines these problems initially in an abstract theoretical sense before testing the frameworks thus established through a series of case studies of Indonesia and Vietnam two very different Asian states one Vietnam still socialist but in difficult transition from command economy to a limited market structure the other Indonesia embracing a market economy and an emerging democratic system one with a Confucian legal and political tradition the other not one with a socialist the other a civil law legal system The book is divided into three parts The first Frameworks establishes some theoretical approaches to the

problem of corruption and governance including a East European example The second part looks at case studies from Indonesia and the third part looks specifically at Vietnam Relevant legislation and judicial decisions can be found in the table of cases and a detailed glossary and list of abbreviations will assist readers unfamiliar with the countries under examination

Number One Realist Nathaniel L. Moir, 2022-04-01 In a 1965 letter to Newsweek French writer and academic Bernard Fall 1926-67 staked a claim as the Number One Realist on the Vietnam War This is the first book to study the thought of this overlooked figure one of the most important experts on counterinsurgency warfare in Indochina Nathaniel L. Moir's intellectual history analyses Fall's formative experiences his service in the French underground and army during the Second World War his father's execution by the Germans and his mother's murder in Auschwitz and his work as a research analyst at the Nuremberg Trials Moir demonstrates how these critical events shaped Fall's trenchant analysis of Viet Minh led revolutionary warfare during the French Indochina War and the early Vietnam War In the years before conventional American intervention in 1965 Fall argued that far more than anything in the United States military arsenal resolving conflict in Vietnam would require political strength willpower integrity and skill Number One Realist illuminates Fall's study of political reconciliation in Indochina while showing how his profound humanitarian critique

of war continues to echo in the endless conflicts of the present It will challenge and change the way we think about the Vietnam War

*The OSS and Ho Chi Minh* Dixee Bartholomew-Feis,2006-05-12 Some will be shocked to find out that the United States and Ho Chi Minh our nemesis for much of the Vietnam War were once allies Indeed during the last year of World War II American spies in Indochina found themselves working closely with Ho Chi Minh and other anti colonial factions compelled by circumstances to fight together against the Japanese Dixee Bartholomew Feis reveals how this relationship emerged and operated and how it impacted Vietnam s struggle for independence The men of General William Donovan s newly formed Office of Strategic Services closely collaborated with communist groups in both Europe and Asia against the Axis enemies In Vietnam this meant that OSS officers worked with Ho Chi Minh and the Viet Minh whose ultimate aim was to rid the region of all imperialist powers not just the Japanese Ho for his part did whatever he could to encourage the OSS s negative view of the French who were desperate to regain their colony Revealing details not previously known about their covert operations Bartholomew Feis chronicles the exploits of these allies as they developed their network of informants sabotaged the Japanese occupation s infrastructure conducted guerrilla operations and searched for downed American fliers and Allied POWs Although the OSS did not bring Ho Chi Minh to power Bartholomew Feis shows that its apparent support for the Viet Minh played a significant symbolic role in helping them fill the power vacuum left in the wake of Japan s surrender Her study also hints that had America continued to champion the anti colonials and their quest for independence rather than caving in to the French we might have been spared our long and very lethal war in Vietnam Based partly on interviews with surviving OSS agents who served in Vietnam Bartholomew Feis s engaging narrative and compelling insights speak to the yearnings of an oppressed people and remind us that history does indeed make strange bedfellows

**The Government of Mistrust** Ken MacLean,2013-12-18 Focusing on the creation and misuse of government documents in Vietnam since the 1920s The Government of Mistrust reveals how profoundly the dynamics of bureaucracy have affected Vietnamese efforts to build a socialist society In examining the flurries of paperwork and directives that moved back and forth between high and low level officials Ken MacLean underscores a paradox in trying to gather accurate information about the realities of life in rural areas and thus better govern from Hanoi the Vietnamese central government employed strategies that actually made the state increasingly illegible to itself MacLean exposes a falsified world existing largely on paper As high level officials attempted to execute centralized planning via decrees procedures questionnaires and audits low level officials and peasants used their own strategies to solve local problems To obtain hoped for aid from the central government locals overstated their needs and underreported the resources they actually possessed Higher ups attempted to re establish centralized control and legibility by creating yet more bureaucratic procedures Amidst the resulting mistrust and ambiguity many low level officials were able to engage in strategic action and tactical maneuvering that have shaped socialism in Vietnam in surprising ways

**Law, Capitalism and Power in Asia** Kanishka Jayasuriya, 2006-06-19 A challenging and provocative book that contests the liberal assumption that the rule of law will go hand in hand with a transition to market based economies and even democracy in East Asia Using case studies from Hong Kong China Indonesia Malaysia Taiwan Japan and Vietnam the authors argue that the rule of law is in fact more likely to provide political elites with the means closely to control civil society It is essential therefore to locate conceptions of judicial independence and the rule of law more generally within the ideological vocabulary of the state
