Lanning,2011-07-20 Vietnam was a different kind of war calling for a different kind of soldier The LRRPs Long Range Reconnaissance Patrols were that new breed of fighting man They operated in six man teams deep within enemy territory and were the eyes and ears of the units they served This is their story of perseverance under extreme hardship and uncommon bravery and how they carried out the war s most hazardous missions **Above the Best** Major Dick

Hale,2012-07-11 It was 1950 the converted LSI was plowing the waters of the Pacific heading towards Korea when Robert Baker an enlisted man aboard the ship was summoned by a Chief Petty Officer to deliver messages to the Signal Officer in the ships ward room And it was a moment of truth for Baker When ushered into the ships ward room Robert became painfully aware that he had somehow been assigned to the wrong part of the ship The officers that he was only hazily aware of during his day to day duties were actually sitting at tables covered with linen table clothes drinking their coffee from china cups while being served by a Philippine stewards mate Baker on the other hand was eating off of a tin tray one deck below and under very different circumstances Different enough that he decided to change his circumstances for the better That afternoon Baker submitted his application for flight training with the U S Navy He had always wanted to fly anyway Baker had actually logged four or five hours a couple of years earlier during his assignment at the Naval Air Station in Jacksonville Florida He had only quit then because he could no longer afford it After a lot of pain blood and about ten days in the hospital wearing a kotex under his nose he was finished with all the formalities Now it was just a question of waiting for the orders to arrive The U S Navy like any other military organization moves slowly In this case they didnt move fast enough After months of waiting with no answer to the application frustration set in along with the end of his enlistment in the Navy Not easily deterred Baker felt it was the Navys loss and some other services gain *Development and employment of fixed-wing*

gunships 1962-1972 , *Air Cav* J.D. Coleman,2011-06-08 *Air Cav History of the 1st Cavalry Division in Vietnam 1965 1969* is the story of the small close world of fighting men in action told in their own words and supplemented with vivid photographs of the First Cavalry Division s experience in the war and a history of the division This volume can be many things to many people a book of memories a souvenir a pictorial essay on airmobility or simply a story of gallant men at war It can be many things but one thing it is not nor does it pretend to be a complete history of the 1st Air Cavalry Division in Vietnam The task and burden of history must lie with the objectivity of future generations far removed from current pressures and restraints It is true of course that much research for this book has been done from available official records the ultimate source of written history But even more has been drawn from the vivid recollections of the Cavalrymen who fought tasted the brassy bile of fear shared the fierce exultation of victory or were drenched in the dark despair of death This volume contains the memoirs of a fighting team the FIRST TEAM It is a memory of combat no doubt it is imperfect as all

memory is but nonetheless it is real for those who were there for those who can fill in the inevitable gaps **UH-1 Huey Gunship vs NVA/VC Forces** Peter E. Davies, 2021-08-19 Often described as the US Army's aerial jeep the UH 1 Iroquois Huey was the general purpose vehicle that provided mobility in a hostile jungle environment which made rapid troop movement extremely challenging by any other means Hueys airlifted troops evacuated casualties rescued downed pilots transported cargo externally and enabled rapid transit of commanders in the field Although vertical aviation had only become a practical reality during the Korean War helicopters evolved rapidly in the decade before Vietnam and by 1965 the US Army and US Marines relied on them as primary combat tools This was principally because North Vietnam's armed forces had long experience of jungle operations camouflage and evasion Generally avoiding set piece pitched battles they relied on rapid frequent strikes and withdrew using routes that were generally inaccessible to US vehicles They commonly relied on darkness and bad weather to make their moves often rendering them immune to conventional air attack Gunship helicopters sometimes equipped with Firefly searchlights and early night vision light intensifiers were more able to track and attack the enemy Innovative tactics were required for this unfamiliar combat scenario and for a US Army that was more prepared for conventional operations in a European type setting One of the most valuable new initiatives was the UH 1C Huey Hog or Frog gunship conceived in 1960 and offering more power and agility than the UH 1B that pioneered gunship use in combat Heavily armed with guns and rockets and easily transportable by air these helicopters became available in large numbers and they became a major problem for the insurgent forces throughout the war Covering fascinating details of the innovations in tactics and combat introduced by gunship helicopters this book offers an analysis of their adaptability and usefulness in a variety of operations while exploring the insurgent forces responses to the advent of vertical aviation **Contact Flying** Jim Dulin, 2008-05 Unlike conventional aviation authors and instructors I do not teach primary flying crop dusting pipeline patrol flying bush flying helicopter medical evacuation flying and air to ground gunnery using instruments inside the aircraft as the primary situational awareness tool Rather I teach Dutch rolls slow flight and stalls over the runway the energy management turns use of ground effect on all takeoffs the brisk walk apparent rate of closure approach hover taxi in fixed wing aircraft and low level low power mountain flying using sights sounds smells and kinetics Sight is used 99.9% of the time looking at the ground Airspeed nor any other instrument is used in takeoff or landing This text teaches the art of flying in the old style at low level using ground references Its author has over sixteen thousand hours of flying Army helicopters crop dusters and pipeline patrol airplanes at three feet to five hundred feet above ground level **Vietnam War Slang** Tom Dalzell, 2014-07-25 In 2014 the US marks the 50th anniversary of the Gulf of Tonkin Resolution the basis for the Johnson administration's escalation of American military involvement in Southeast Asia and war against North Vietnam Vietnam War Slang outlines the context behind the slang used by members of the United States Armed Forces during the Vietnam War Troops facing and inflicting death display a high degree of linguistic creativity Vietnam was the last American war fought by

an army with conscripts and their involuntary participation in the war added a dimension to the language War has always been an incubator for slang it is brutal and brutality demands a vocabulary to describe what we don't encounter in peacetime civilian life Furthermore such language serves to create an intense bond between comrades in the armed forces helping them to support the heavy burdens of war The troops in Vietnam faced the usual demands of war as well as several that were unique to Vietnam a murky political basis for the war widespread corruption in the ruling government untraditional guerilla warfare an unpredictable civilian population in Vietnam and a growing lack of popular support for the war back in the US For all these reasons the language of those who fought in Vietnam was a vivid reflection of life in wartime Vietnam War Slang lays out the definitive record of the lexicon of Americans who fought in the Vietnam War Assuming no prior knowledge it presents around 2000 headwords with each entry divided into sections giving parts of speech definitions glosses the countries of origin dates of earliest known citations and citations It will be an essential resource for Vietnam veterans and their families students and readers of history and anyone interested in the principles underpinning the development of slang

Sasser, 2007-04-01 Taking Fire is the incredible memoir by one of the most decorated chopper pilots to emerge from the Vietnam War Nicknamed Mini Man for his diminutive stature a mere five foot three and 125 pounds in his flight boots chopper pilot Ron Alexander proved to be a giant in the eyes of the men he rescued from the jungles and paddies of Vietnam With an unswerving concern for every American soldier trapped by enemy fire and a fearlessness that became legendary Ron Alexander earned enough official praise to become the second most decorated helicopter pilot of the Vietnam era Yet for Ron the real reward came from plucking his fellow soldiers from harm's way giving them another chance to get home alive In Taking Fire Alexander and acclaimed military writer Charles Sasser transport you right into the cramped cockpit of a Huey on patrol offering a bird's eye view of the Vietnam conflict Packed with riveting action and gritty you are there dialogue this outstanding book celebrates the everyday heroism of the chopper pilots of Vietnam *US Army Long-Range Patrol Scout in Vietnam 1965-71* Gordon L. Rottman, 2013-02-20 The Vietnamese knew the Long Range Patrol Scouts as the men with green faces a reference to the camouflage paint that they used Operating in patrols of four to six men these men were like ghosts scouting far behind enemy lines This book examines the Long Range Patrol Scout's superior stealth movement techniques camouflage and concealment tracking counter tracking observation and other fieldcraft skills It also examines the occasions they participated in small scale direct actions including ambushes and raids Written by a Special Forces Vietnam veteran this book not only depicts the remarkable lives of these scouts when on campaign but also details the training and conditioning that it took to become one of these shadow warriors The Mammoth Book of Inside the Elite Forces Nigel Cawthorne, 2012-03-01 The most comprehensive and up to date guide to American and British special forces covering all aspects of their equipment training and deployment in the Iraq age of warfare It takes a special kind of person to join the Special Forces and those to pass the stringent entrance requirements are subjected to the most rigorous training They're trained to be super fit taught to survive in the most adverse conditions and turned into killing machines This book reveals what makes these men tick and everything you need to know to become one of them It covers all the types of training required for fitness combat survival navigation communication infiltration interrogation extraction and evasion And it details the full array of weapons used from small arms and knives to explosives and air back up Also included are full listings of all the units including the SAS Green Berets SBS Navy SEALs Delta Force Army Rangers and their deployment in present day conflicts such as Desert Storm Somalia Afghanistan Iraq and anti terrorist operations *Red Air* Sanu Kainikara, 2007-10 The Russian Air Force carries the mantle of the erstwhile Red Air Force of the Soviet Union and has a long and illustrious history backed by grand traditions and customs The Russian Air Force is still coming to grips with its changed circumstances

after the collapse of the Soviet Union and is perhaps in the best shape of the three armed forces to be able to lend credence to the Russian Federation's claim to international influence and power projection capabilities. Doctrine is the reflection of a nation's character and air power doctrine is influenced by the strategic culture of a nation. Nowhere else is this more apparent than in the case of the Russian Air Force. The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies. The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world. This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives, political ideology and the development of military doctrine.
