Cultural History After Foucault John Neubauer,2018-01-18 Both as historian and maker of culture Foucault infused numerous disciplines of study with a new conceptual vocabulary and an agenda for future research His ideas have called central assumptions in Western culture into question and altered the ways in which scholars and social scientists approach such issues as discourse theory theory of knowledge Eros technologies of the Self and Other punishment and prisons and asylums and madness The contributors to this volume indicate Foucault's achievements and the suggestive power of his work as well as his methodological weaknesses historical inaccuracies and ambiguities Above all they attempt to show how one can use Foucault to go beyond him in opening new approaches to cultural history Though comprehensiveness was not attempted

their essays broach the major controversial aspects of Foucauldian cultural history the position of the subject the fusion of power and knowledge sexuality the historical structures and changes and they explicitly analyze them with respect to antiquity the Renaissance and the nineteenth century In this collection Neubauer presents analyses by historians literary scholars and philosophers of the entire transdisciplinary range of Foucault's oeuvre emphasizing the rich suggestiveness of its agenda The breadth of the undertaking makes it suitable for seminars and graduate courses in numerous departments

Art of Illusion Dan Karlholm, 2006 To survey art history as a whole was a pressing task for a generation of German scholars around the mid nineteenth century Their projections of a historicist chain of artworks ranged from textual narratives without illustrations to separate picture compendia as well as images of a more allegorical kind Other means with which to picture art history as part of a virtually all encompassing cultural history were the museums of art erected in Germany at the time in Berlin and Munich especially This book deals with practices of representing art history in various media This includes post Hegelian texts and engravings of art history from the 1840s onwards by Franz Kugler Julius Schnorr and others In addition works of art of the late twentieth century by Andy Warhol Anselm Kiefer and others provide opportunities to speculate on the after effects and discursive traces of the old regime Extending the concept of historiography to include not just textual or institutional endeavours but a host of different images as well from reproductive prints to pop paintings and visual archives of the digital era this study is intended to contribute in new ways to a critical historiography of the field of art history and visual culture today

History in Transit Dominick LaCapra, 2018-08-06 History in Transit comprises Dominick LaCapra's explorations of relationships he believes have been insufficiently theorized between experience and identity between history and various theories of subjectivity between extreme events and their representation between institutional structures and the kinds of knowledge produced within them Taken together these discussions form a dialogical encounter positing the links among epistemological questions historicist ones and issues pertaining to disciplinary and institutional politics Reacting against the antitheoretical bias of some prominent historians LaCapra presents an alternative model of historiographical practice one in which emphases on plurality and hybridity are combined with the concept of historical experience For LaCapra experience emerges as a category both theoretically determined and anchored in the facticity of the everyday LaCapra tests the assumptions and implications of the way one approaches the past by looking to psychoanalysis to render more self aware the relationship between the historian and his or her material He offers criticisms of assumptions held by practicing historians and theorists placing the study of history at the center of a larger argument about the role of the contemporary university Contesting both corporatization and claims that the university is in ruins LaCapra writes It is paradoxical that the demand to make the university conform to an ever increasing extent to a market or business model seems oblivious to the fact that the American university has probably been the most successful of its type in the world that students from other countries disproportionately desire to study in it

Frontiers of History Donald R. Kelley, 2006-01-01

In 1764-65 the irrepressible playwright Beaumarchais travelled to Madrid where he immersed himself in the life and society of the day. Inspired by the places he had seen and the people he had met, Beaumarchais returned home to create *The Barber of Seville* and *The Marriage of Figaro*, plays that became the basis for the operas by Rossini and Mozart that continue to delight audiences today. This book is a lively and original account of Beaumarchais's visit to Madrid; he never went to Seville and a re-creation of the society that fired his imagination. Drawing on Beaumarchais's letters and commentaries translated into English for the first time, Hugh Thomas investigates the full range of the playwright's activities in Madrid. He focuses particular attention on short plays that Beaumarchais attended and by which he was probably influenced, and he probes the inspirations for such widely recognized characters as the barber valet Figaro, the lordly Count Almaviva, and the beautiful but deceived Rosine. Not neglecting Beaumarchais's many other pursuits, ranging from an endeavour to gain a contract for selling African slaves to an attempt to place his mistress as a spy in the bed of King Charles III, Lord Thomas provides a highly entertaining view of a vital moment in Madrid's history and in the creative life of the energetic Beaumarchais.

Frontiers of Historical Imagination Kerwin Lee Klein, 2023-11-15 The American frontier, a potent symbol since Europeans first stepped ashore on North America, serves as the touchstone for Kerwin Klein's analysis of the narrating of history. Klein explores the traditions through which historians, philosophers, anthropologists, and literary critics have understood the story of America's origin and the way those understandings have shaped and been shaped by changing conceptions of history. The American West was once the frontier space where migrating Europe collided with Native America, where the historical civilizations of the Old World met the nonhistorical wilds of the New. It was not only the cultural combat zone where American democracy was forged but also the ragged edge of History itself, where historical and nonhistorical defied and defined each other. Klein maintains that the idea of a collision between people with and without history still dominates public memory. But the collision, he believes, resounds even more powerfully in the historical imagination, which creates conflicts between narration and knowledge and carries them into the language used to describe the American frontier. In Klein's words: "We remain obscurely entangled in philosophies of

history we no longer profess and the very idea of America balances on history's shifting frontiers The American frontier a potent symbol since Europeans first stepped ashore on North America serves as the touchstone for Kerwin Klein's analysis of the narrating of history Klein explores the traditions through which historians philosophers anthropologists and others have constructed the American past **Afterlives of war** Michael Roper, 2023-07-05 Afterlives of war documents the lives and historical pursuits of the generations who grew up in Australia Britain and Germany after the First World War Although they were not direct witnesses to the conflict they experienced its effects from their earliest years Based on ninety oral history interviews and observation during the First World War Centenary this pioneering study reveals the contribution of descendants to the contemporary memory of the First World War and the intimate personal legacies of the conflict that animate their history making **Varieties of Cultural History** Peter Burke, 2013-07-08 The aim of this book is both to illustrate and to discuss some of the main varieties of cultural history which have emerged since the questioning of what might be called its classic form exemplified in the work of Jacob Burckhardt and Johan Huizinga Among the themes of individual chapters are the history of popular culture the history of Carnival the history of mentalities the history of gestures the history of jokes and even the history of dreams The emphasis of both the introduction and the case studies which follow is on the variety of forms taken by cultural history today The classic model has not been replaced by any new orthodoxy despite the importance of approaches inspired by social and cultural anthropology Variety is to be found in the cultures studied as well as among their historians The case studies included in the volume come not only from Europe and in particular from Italy but also from the New World especially Brazil Particular emphasis is placed on the importance of cultural encounters cultural conflicts and their consequences whether these consequences should be described in terms of mixing syncretism or synthesis Written by one of the leading cultural historians in Europe today this book will be of particular interest to students of early modern Europe of the encounters between European culture and the New World and to students and scholars interested in problems of historiography
