crushing personal obstacles and failings They take big risks they ignore common wisdom such as the notion that there s nothing left to discover in North America and they even make love in hammocks stretched between branches three hundred feet in the air The deep redwood canopy is a vertical Eden filled with mosses lichens spotted salamanders hanging gardens of ferns and thickets of huckleberry bushes all growing out of massive trunk systems that have fused and formed flying buttresses sometimes carved into blackened chambers hollowed out by fire called fire caves Thick layers of soil sitting on limbs harbor animal and plant life that is unknown to science Humans move through the deep canopy suspended on ropes far out of sight of the ground knowing that the price of a small mistake can be a plunge to one s death Preston s account of this amazing world by turns terrifying moving and fascinating is an adventure story told in novelistic detail by a master of nonfiction narrative The author shares his protagonists passion for tall trees and he mastered the techniques of tall tree climbing to tell the story in *The Wild Trees* the story of the fate of the world s most splendid forests and of the imperiled biosphere itself
