Pister, 1980      Procedures for Evaluation of Vibratory Ground Motions of Soil Deposits at Nuclear Power Plant Sites U.S. Nuclear Regulatory Commission, 1975      Seismic Safety Margins Research Program, Phase I. Project II, 1980 A catalog has been prepared which contains information for 1 world wide ground motion accelerograms 2 the accelerograph sites where these records were obtained and 3 the seismological parameters of the causative earthquakes The catalog is limited to data for those accelerograms which have been digitized and published In addition the quality and completeness of these data are assessed This catalog is unique because it is the only publication which contains comprehensive information on the recording conditions of all known digitized accelerograms However information for many accelerograms is missing Although some literature may have been overlooked most of the missing data has not been published Nevertheless the catalog provides a convenient reference and useful tool for earthquake engineering research and applications      *Strong Ground Motion Seismology* Mustafa Erdik, M.
