*Surface Analysis Methods in Materials Science* D.J. O'Connor, Brett A. Sexton, Roger St.C. Smart, 2013-04-17 The idea for this book stemmed from a remark by Philip Jennings of Murdoch University in a discussion session following a regular meeting of the Australian Surface Science group He observed that a text on surface analysis and applications to materials suitable for final year undergraduate and postgraduate science students was not currently available Furthermore the members of the Australian Surface Science group had the research experience and range of coverage of surface analytical techniques and applications to provide a text for this purpose A list of techniques and applications to be included was agreed at that meeting The list intended readership of the book has been broadened since the early discussions particularly to encompass industrial users but there has been no significant alteration in content The editors in consultation with the contributors have agreed that the book should be prepared for four major groups of readers senior undergraduate students in chemistry physics metallurgy materials science and materials engineering postgraduate students undertaking research that involves the use of analytical techniques groups of scientists and engineers attending training courses and workshops on the application of surface
