✓ Exclusively available on IvyPanda

Several approaches to studying religion will be discussed: exclusivism, inclusivism, pluralism, and empathetic interest in other people. Exclusivism is the belief that only one religion is true and all the others are false (Wood, 2021). Exclusivism aims to exclude foreign and alien elements that invade it from its religion to preserve certain principles of its faith in purity. Inclusivism is the reverse of exclusivism, which is the ability of one religious tradition to include and adapt foreign myths, cults, and even deities of other religions (Wood, 2021). Pluralism is a state of the religious situation in society in which there is a coexistence of many religious associations of different faiths, independent of each other, separated from the state, and equal before the law. Empathy implies understanding and emotional insight into the shape of another person (Wood, 2021). Empathic interest in other people in religion includes a tolerant attitude towards other faiths.

In everyday life, I use the approach of empathic interest because I believe that there is no main religion in the world and that everyone has the right to believe in what they want. Each religion is good in its way, so it is necessary to treat different faiths with respect and tolerance. Every religion has its unique history that needs to be preserved and multiplied, so I treat any religion from the point of view of empathy.

I have a friend who uses an exclusivist approach when it comes to religion. Given our different methods, I would treat his point of view with understanding and patience since he has the right to such an approach. I believe that the academic study of religion should not require me to adjust my approach if I attend college classes on religious traditions. I can study various methods for the academic study of religion and find something interesting for myself in each of them. Still, I should not change my beliefs because of this.

### **An Unnatural History of Religions** Leonardo

Ambasciano,2018-12-27 An Unnatural History of Religions examines the origins development and critical issues concerning the history of religion and its relationship with science The book explores the ideological biases logical fallacies and unwarranted beliefs that surround the scientific foundations or lack thereof in the academic discipline of the history of religions positioning them in today s post truth culture Leonardo Ambasciano provides the necessary critical background to evaluate the most important theories and working concepts dedicated to the explanation of the historical developments of religion He covers the most important topics and paradigm shifts in the field such as phenomenology postmodernism and cognitive science These are taken into consideration chronologically each time with case studies on topics such as shamanism gender biases ethnocentrism and biological evolution Ambasciano argues that the roots of post truth may be deep in human biases but that historical justifications change each time resulting in different combinations The surprising rise of once fringe beliefs such as conspiracy theories pseudoscientific claims and so called scientific creationism demonstrates the alarming influence that post truth ideas may exert on both politics and society Recognising them before they spread anew may be the first step towards a scientifically renewed study of religion

### **Rape Culture and Religious Studies** Rhiannon Graybill,Meredith Minister,Beatrice

Lawrence,2019-04-30 Rape Culture and Religious Studies Critical and Pedagogical Engagements stages a critical engagement between religious texts and the problem of sexual violence Rape and other forms of sexual violence are widespread on college and university campuses they also occur in sacred texts and religious traditions The volume addresses these difficult intersections as they play out in texts traditions and university contexts The volumegathers contributions from religious studies scholars to engage these questions from a variety of institutional contexts and to offer a constructive assessment of religious texts and traditions

### *Religious Studies and Rabbincis* Elizabeth Alexander,Beth

Berkowitz,2017-09-08 Religious Studies and Rabbincis have overlapping yet distinct interests subject matter and methods Religious Studies is committed to the study of religion writ large It develops theories and methods intended to apply across religious traditions Rabbincis by contrast is dedicated to a defined set of texts produced by the rabbinic movement of late antiquity Religious Studies and Rabbincis represents the first sustained effort to create a conversation between these two academic fields In one trajectory of argument the book shows what is gained when each field sees how the other engages the same questions When did the concept of religion arise How should a scholar s normative commitments interact with their

scholarship The book argues that if scholars from Religious Studies and Rabbinics do not realize they are addressing the same problems they will not benefit from each other's solutions A second line of argument brings research methods theoretical claims and data associated with one field into contact with those of the other When Religious Studies categories such as ritual or the sacred are applied to data from Rabbinics and conversely when text reading strategies distinctive to Rabbinics are employed for texts from other traditions both Religious Studies and Rabbinics enlarge their scope The chapters range across such themes as ritual failure rabbinic conceptions of scripture ethics food time and everyday life problems of definition and normativity in the study of religion J Z Smith's writings and the preaching of the African American Christian evangelical social justice activist John Perkins With chapters written by world class theorists of Religious Studies and prominent text scholars of Rabbinics the book provides a unique opportunity to expand the conceptual reach and scholarly audience of both Religious Studies and Jewish Studies

### **The Routledge Handbook of Translation and Religion**

Hephzibah Israel, 2022-12-19 The Routledge Handbook of Translation and Religion is the first to bring together an extensive interdisciplinary engagement with the multiple ways in which the concepts and practices of translation and religion intersect The book engages a number of scholarly disciplines in conversation with each other including the study of translation and interpreting religion philosophy anthropology history art history and area studies A range of leading and emerging international specialists critically engage with changing understandings of the key categories translation and religion as discursive constructs thus contributing to the development of a new field of academic study translation and religion The 28 contributions divided into six parts analyze how translation constructs ideas texts or objects as sacred or for religious purposes often in competition with what is categorized as non religious The part played by faith communities is treated as integral to analyses of the role of translation and religion It investigates how or why translation functions in re constructing and transforming religion's and for whom and examines a range of sacred texts in translation from the written to the spoken manuscript to print paper to digital architectural form to objects of sacred art intersemiotic scriptural texts and where commentary exegesis and translation interweave This Handbook is an indispensable scholarly resource for researchers in translation studies and the study of religions

**Comparative Hagiology** Massimo Rondolino, 2020-12-10 This Special Issue engages with questions of theory and methods in the comparative cross cultural study of hagiographical sources As such it offers first and foremost the venue for conducting a scientific discussion on a re definition of hagiography It also allows for the identification of shared approaches and methodologies in the study of material that may be apprehended through this categorization as an effective strategy for the study of religious phenomena To achieve this the present volume brings together a selected number of scholars whose work focuses on the theoretical study of hagiography and the historical examination of hagiographical sources In this Special Issue five core essays put forward propositions for the comparative and cross cultural re definition of hagiography to which further contributors respond eventually providing a vibrant collaborative debate on a core theoretical and methodological issue in religious studies at large

**The Learned Practice of Religion in the Modern University** Donald Wiebe, 2019-11-14 In these essays Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena

**Ireland and the Reception of the Bible** Bradford A. Anderson, Jonathan Kearney, 2018-04-19 Drawing on the work of leading figures in biblical religious historical and cultural studies in Ireland and beyond this volume explores the reception of the Bible in Ireland focusing on the social and cultural dimensions of such use of the Bible This includes the transmission of the Bible the Bible and identity formation engagement beyond Ireland and cultural and artistic appropriation of the Bible The chapters collected here are particularly useful and insightful for those researching the use and reception of the Bible as well as those with broader interests in social and cultural dimensions of Irish history and Irish studies The chapters challenge the perception in the minds of many that the Bible is a static book with a fixed place in the

world that can be relegated to ecclesial contexts and perhaps academic study Rather as this book shows the role of the Bible in the world is much more complex Nowhere is this clearer than in Ireland with its rich and complex religious cultural and social history This volume examines these very issues highlighting the varied ways in which the Bible has impacted Irish life and society as well as the ways in which the cultural specificity of Ireland has impacted the use and development of the Bible both in Ireland and further afield
