Seeing Red Jose P. Zagal, Benj Edwards, 2024-05-14 The curious history technology and technocultural context of Nintendo's short lived stereoscopic gaming console the Virtual Boy With glowing red stereoscopic 3D graphics the Virtual Boy cast a prophetic hue Shortly after its release in 1995 Nintendo's balance sheet for the product was in the red as well Of all the innovative long shots the game industry has witnessed over the years perhaps the most infamous and least understood was the Virtual Boy Why the Virtual Boy failed and where it succeeded are questions that video game experts Jos Zagal and Benj Edwards explore in Seeing Red but even more interesting to the authors is what the platform actually was what it promised how it worked and where it fit into the story of gaming Nintendo released the Virtual Boy as a standalone table top device in 1995 and quickly discontinued it after lackluster sales and a lukewarm critical reception In Seeing Red Zagal and Edwards examine the device's technical capabilities its games and the cultural context in the US in the 1990s when Nintendo developed and released the unusual console The Virtual Boy in their account built upon and extended an often forgotten historical tradition of immersive layered dioramas going back 100 years that was largely unexplored in video games at the time The authors also show how the platform's library of games conveyed a distinct visual aesthetic style that has not been significantly explored since the Virtual Boy's release having been superseded by polygonal 3D graphics The platform's meaning they contend lies as much in its design and technical capabilities and affordances as it does in an audience's perception of those capabilities Offering rare insight into how we think about video game platforms Seeing Red illustrates where perception and context come quite literally into play

Guided Reflection Christopher Johns, 2011-06-13 an important text for practitioners this text is a valuable tool that develops self inquiry skills Journal of Advanced Nursing Reflection is widely recognised as an invaluable tool in health care providing fresh insights which enable practitioners to develop their own practice and improve the quality of their care Guided Reflection A Narrative Approach to Advancing Professional Practice introduces the practitioner to the concept of guided reflection in which the practitioner is assisted by a mentor or guide in a process of self enquiry development and learning through reflection in order to effectively realise one's vision of practice and self as a lived reality Guided reflection is grounded in individual practice and can provide deeply meaningful insights into self development and professional care The process results in a reflexive narrative which highlights key issues for enhancing healthcare practice and professional care Reflection A Narrative Approach to Advancing Professional Practice uses a collection of such narratives from everyday clinical practice to demonstrate the theory and practicalities of guided reflection and narrative construction In this second edition Chris Johns has explored many of the existing narratives in more depth Many new contributions have been added including several more innovative reflections such as performance and art These narratives portray the values inherent in caring highlight key issues in clinical practice reveal the factors that

constrain the quest to realise practice and examine the ways practitioners work towards overcoming these constraints
