Molded Optics Michael Schaub, Jim Schwiegerling, Eric Fest, R. Hamilton Shepard, Alan Symmons, 2016-04-19 While several available texts discuss molded plastic optics none provide information on all classes of molded optics Filling this gap Molded Optics Design and Manufacture presents detailed descriptions of molded plastic glass and infrared optics Since an understanding of the manufacturing process is necessary to develop cost effective products

Seismic Interferometry Deyan Draganov, Johan O. A. Introduction to Petroleum Seismology, second edition Luc T. Ikelle, Lasse Amundsen, 2018-03-26 Introduction to Petroleum Seismology second edition SEG Investigations in Geophysics Series No 12 provides the theoretical and practical foundation for tackling present and future challenges of petroleum seismology especially those related to seismic survey designs seismic data acquisition seismic and EM modeling seismic imaging microseismicity and reservoir characterization and monitoring All of the chapters from the first edition have been improved

and or expanded In addition twelve new chapters have been added These new chapters expand topics which were only alluded to in the first edition sparsity representation sparsity and nonlinear optimization near simultaneous multiple shooting acquisition and processing nonuniform wavefield sampling automated modeling elastic electromagnetic mathematical equivalences and microseismicity in the context of hydraulic fracturing Another major modification in this edition is that each chapter contains analytical problems as well as computational problems These problems include MatLab codes which may help readers improve their understanding of and intuition about these materials The comprehensiveness of this book makes it a suitable text for undergraduate and graduate courses that target geophysicists and engineers as well as a guide and reference work for researchers and professionals in academia and in the petroleum industry

One hundred pious reflections, selected from A. Butler's Lives of the saints [by M.T. Taunton]. Alban Butler, 1870

Velocities in Reflection Seismology Jean-Pierre Cordier, 2013-03-09

Although considerable efforts are now being made to find new sources of energy all the experts are agreed that hydrocarbons will have to provide the greater part of our energy needs for a generation ahead Exploration for and production of hydrocarbons therefore pose a serious problem for our future as much for the quantitative satisfaction of our requirements as for our search for self sufficiency in energy As a direct result of improvements in technology throughout the world geophysics has progressively enlarged its field of influence in the realms of exploration and production But amongst the various geophysical methods available seismic reflection has gradually become accepted as the basic tool of the oil prospector Reflection seismology has reached and consolidated this position because it has shown itself to be capable of adapting to the increasing complexity of the requirements of exploration Initially directed towards geometric mapping of the sub surface it became the means of detection of structural traps in geotectonically quiescent regions and thereafter in increasingly complex surroundings It has enabled us to clothe the structural framework with a lithology initially approximate but becoming more and more precise assisting the explorer to locate stratigraphic traps Further developments enable us under favourable circumstances to estimate the quality of the deposits and to detect the presence of fluids and of their interfaces it then becomes an unrivalled tool for the producer both in the development of deposits and in the application of enhanced recovery methods

Measurement While Drilling (MWD) Signal Analysis, Optimization and Design Wilson C. Chin, Yinao Su, Limin Sheng, Lin Li, Hailong Bian, Rong Shi, 2014-04-16

Trade magazines and review articles describe MWD in casual terms e.g positive versus negative pulsers continuous wave systems drilling channel noise and attenuation in very simple terms absent of technical rigor However few truly scientific discussions are available on existing methods let alone the advances necessary for high data rate telemetry Without a strong foundation building on solid acoustic principles rigorous mathematics and of course fast inexpensive and efficient testing of mechanical designs low data rates will impose unacceptable quality issues to real time formation evaluation for years to come This book promises to change all of this The lead author and M I T educated scientist Wilson Chin and Yinao Su Academician Chinese Academy of Engineering and other

teammembers have written the only book available that develops mud pulse telemetry from first principles adapting sound acoustic principles to rigorous signal processing and efficient wind tunnel testing. In fact the methods and telemetry principles developed in the book were recently adopted by one of the world's largest industrial corporations in its mission to redefine the face of MWD. The entire engineering history for continuous wave telemetry is covered, anecdotal stories and their fallacies, original hardware problems and their solutions, different noise mechanisms and their signal processing solutions, apparent paradoxes encountered in field tests and simple explanations to complicated questions and so on are discussed in complete detail for students, research professors and professional engineers alike. These include signal processing algorithms, signal enhancement methods and highly efficient short and long wind tunnel test methods whose results can be dynamically re-scaled to real muds flowing at any speed. A must read for all petroleum engineering professionals.

Geophysical Abstracts, 180 January-March 1960, 1960 *Geological Survey Bulletin*, 1953 *Elements of 3D Seismology, third edition* Christopher L. Liner, 2016-10-15. *Elements of 3D Seismology* third edition is a thorough introduction to the acquisition, processing and interpretation of 3D seismic data. This third edition is a major update of the second edition. Sections dealing with interpretation have been greatly revised in accordance with improved understanding and availability of data and software. Practice exercises have been added as well as a 3D seismic survey pre-design exercise. Discussions include conceptual and historical foundations of modern reflection seismology, an overview of seismic wave phenomena in acoustic elastic and porous media, acquisition principles for land and marine seismic surveys, methods used to create 2D and 3D seismic images from field data, concepts of dip moveout, prestack migration and depth migration, concepts and limitations of 3D seismic interpretation for structure, stratigraphy and rock property estimation and the interpretation role of attributes, impedance estimation and AVO. This book is intended as a general text on reflection seismology including wave propagation, data acquisition, processing and interpretation and will be of interest to entry level geophysicists, experts in related fields, geology, petroleum engineering and experienced geophysicists in one subfield wishing to learn about another, e.g. interpreters wanting to learn about seismic waves or data acquisition. *Geometric, Physical, and Visual Optics E-Book* Michael P. Keating, 2015-01-28. A basic optics textbook that integrates relevant visual and ophthalmic optics material with basic geometric and physical optics. Dr. Keating's book uses the vergence approach to optics as well as the wavefront approach to vergence as an aid to developing optics intuition. Basic textbook on the integrated approach to geometric, physical and introductory visual optics. Features a unique early emphasis on image formation, the use of the vergence, dioptric power approach from the beginning, the relation of vergence to the geometric properties of wavefronts and the interchangeability of the wavefront representation with the ray representation. Emphasis on developing intuition and conceptual understanding so that the numbers mean something to the reader. **Deep Learning Applications of Short-Range Radars** Avik Santra, Souvik Hazra, 2020-09-30.
