appropriate to integrate two of the most relevant communities i e to combine the 2nd International Auralization Symposium with the 5th International Symposium on Ambisonics and Spherical Acoustics The Symposia on Ambisonics initiated in 2009 by the Institute of Electronic Music and Acoustics of the University of Music and Performing Arts in Graz were traditionally dedicated to problems of spherical sound field analysis and re synthesis strategies for the exchange of ambisonics encoded audio material and more than other conferences in this area the artistic application of spatial audio systems This publication contains the official conference proceedings It includes 29 manuscripts which have passed a 3 stage peer review with a board of about 70 international reviewers involved in the process Each contribution has already been published individually with a unique DOI on the DepositOnce digital repository of TU Berlin Some conference contributions have been recommended for resubmission to Acta Acustica united with Acustica to possibly appear in a Special Issue on Virtual Acoustics in late 2014 These are not published in this collection Hong Kong Cinema Since 1997 V. become culture phenomena In histories theories hagiographies and polemics these directors are conferred classic stature as are the four plays on which they worked Chekhov's The Seagull Brecht's Mother Courage and Her Children and Williams s A Streetcar Named Desire have long been recognized in the theatre and in the study as masterpieces They are anthologized quoted taught parodied read and produced constantly and globally The culturally conservative might question the presence of MaratiSade in such august company but Peter Weiss's play stands every chance of figuring in Western repertories classroom study and theatrical histories until well into the twenty first century In their quite different ways these are all classics of that Western drama which is part of our immediate 2014-07-24 Responding to a deep and universal need of philosophizing in the context of intensive intercultural interaction among all philosophical traditions in the process of globalization this timely book offers a unique collection of excellent papers on inter translatability art and ethics subjects which are most crucial for intercultural conversations today Instead of opting for a comparative philosophy that suggests the superiority of philosophy in comparison with other forms of thought this book explores inter translatability between East and West given that any dialogue between heterogeneous cultures and systems of thought has to start with translation which constitutes the first part of this book Art and ethics are the two areas that most obviously link philosophies of the past and the present and constitute a fundamental part of Chinese long living and practical philosophy The value of art and aesthetic appreciation no less than ethics is at the core of Chinese culture and indeed promises a great deal for the future world Thus they are dealt with here in the second and third parts This book is also relevant to inter culturalism in philosophy itself as the contributors firstly come from several different continents and secondly though most of them are philosophers all contributors are well versed in other disciplines such as anthropology literature religion aesthetics history of art sinology cognitive sciences and social sciences
