The Student Nurse's Guide to Successful Reflection is a must have text for all nursing students as well as useful reading for those involved in supporting them. With a Foreword by Theo Stickley Associate Professor University of Nottingham UK. Reflection is a way of being encompassing many ingredients. Clarke with great thoroughness and care introduces these constructively supporting students towards developing self insight and understanding of others. Her advice, explanations, illustrations and exercises are lucid and paced, helping nurses towards sufficient strength to undertake the developmental change which effective reflective practice brings. And to become practitioners who are far more than competent nurses who are calmly self aware, receptive and perceptive. Gillie Bolton PhD former Senior Research Fellow Medicine and the Arts King's College London UK. Reflection is a much discussed topic in nursing but some students find it difficult to reflect on their own practice. Nicola Clarke's ten essential ingredients provide a clear and explicit guide to effective reflective practice and as such this should be a key text for all student nurses. The chapters of this new text offer clear learning outcomes, practical advice and models to follow in order to develop a genuine, honest and balanced reflective writing style. It is an engaging and informative read which promotes understanding of this important process. Anita Savage Grainge RMN RGN RNT Senior Lecturer University of York UK. An engaging book which deals with the complexity of reflection in a clear, logical and in depth manner. Developed around her extended definition of reflective practice, Clarke clearly and logically enables the reader to build their understanding of reflective practice by focusing on her ten ingredients. The structure of the book, focusing on two ingredients in each chapter, allows Clarke to provide clarity whilst at the same time showing the reader how the ingredients fit together to build a whole that is greater than the sum of its parts. The focus on critical and analytic skills as well as person centredness based on Rogers' core conditions provides a strong theoretical basis for students to understand reflective practice. The use of questions and examples throughout are engaging and will be useful for students and tutors alike. I think this book will be excellent for all healthcare workers, students and qualified alike. Whilst it is aimed at nurses, the principles apply across healthcare. I think it is a real gem and certainly the best book I have read about reflective practice. Dr Rosie Stenhouse Nursing Studies University of Edinburgh UK.
