actor in the present and future When these are pieced together a picture emerges of a European strategy in the making albeit one that so far is modest and partial This book will be of interest to students of European Security European Politics and IR The Future of Transatlantic Security Relations Richard A. Chilcoat, Joseph R. Cerami, Patrick Baetjer, 2006

**New Transatlantic Agenda and the Future** Joerg Monar, 1998-12-18 This book presents the results of an international conference on the New Transatlantic Agenda organized in Brussels in July 1996 by the Centre for European Politics and Institutions CEPI of the University of Leicester in cooperation with the Directorate General I of the European Commission and Kluwer Law International While most of its chapters are revised versions of papers presented at the conference some were commissioned afterwards in order to address several relevant issues which could not be covered adequately within the time limited framework of the conference The book provides an analysis both of the innovative elements of the New Transatlantic Agenda and of the main challenges that EU US relations will have to face at the turn of this century While the main focus is on whether the New Transatlantic Agenda constitutes an adequate response to these challenges this volume also explores the necessary conditions for a successful long term implementation of the Agenda and asks what lessons can be drawn in this respect from previous experiences in transatlantic cooperation Emphasis has been given to the consideration of justice and home affairs as matters of EU US cooperation not only because this is undoubtedly one of the most innovative areas of the New Transatlantic Agenda but because it is an area in which both governments are confronted with rapidly increasing challenges This volume aims to make a significant contribution to the discussion of the future of the transatlantic relationship whose quality is likely to depend on the capability of both sides to respond with new approaches such as those laid out in the New Transatlantic Agenda to inevitable changes in both the bilateral and global contexts Transforming America's Military , **British Foreign Policy Under New Labour, 1997-2005** P. Williams, 2005-11-22 This important new study provides a critical analysis of the foreign policies conducted during the first two terms of Tony Blair's government It focuses upon the government's key foreign policy commitments three of its most important international relationships with the US the European Union and Africa and how Blair's government dealt with five fundamental policy issues political economy defence international development intervention and Iraq It argues that throughout this period Labour's foreign policies attempted to paper over some important contradictions *Russia Faces NATO Expansion* Joseph Laurence Black, 2000 The importance of Russian thinking about NATO expansion eastward has been badly underestimated in the West In this first comprehensive English language assessment of the Russian position Black seeks to remedy that oversight by a thorough examination of Russian official statements expert analysis party platforms and media commentary which show the degree to which NATO expansion has brought a rare unity to the otherwise fragmented and volatile Russian political arena Based entirely on Russian language sources this timely study provides invaluable insights into current Russian thinking on NATO expansion and projects the significance of such thinking for the Western Alliance into the future Partnership in

Crisis Paul Cornish, 1997-01-01 Focuses on the inner workings of NATO during the period 1996-97. After a summary of theoretical reflections on military alliances, chapters describe four paths to compromise: US, British, French, and German, without which the goals and complex formulae devised in 1996 and 1997 could not have been agreed upon and analyze the international adaptation of NATO and its strength of consensus on both sides of the Atlantic. **Geopolítica de la expansión de la OTAN** Antonio Sánchez Pereyra, 2003

**EU Enlargement and the Transatlantic Alliance** Sven Biscop, Johan Lembke, 2008. What is the interplay between EU enlargement and a fluctuating transatlantic security partnership? Will the accession of new EU members reinforce this partnership or instead increase the EU's assertiveness as an independent foreign policy actor? The authors of *EU Enlargement and Transatlantic Security* find answers in an examination of broader EU security strategies, the foreign and security policies of the newer and potential EU members, and changing US priorities. Their perceptive analysis offers a sharp lens through which to understand the current and future state of transatlantic security.

Arming the Western Front Roger Lloyd-Jones, M.J. Lewis, 2016-06-10. The First World War was above all a war of logistics. Whilst the conflict will forever be remembered for the mud and slaughter of the Western Front, it was a war won on the factory floor as much as the battlefield. Examining the war from an industrial perspective, *Arming the Western Front* examines how the British, between 1900 and 1920, set about mobilising economic and human resources to meet the challenge of industrial war. Beginning with an assessment of the run-up to war, the book examines Edwardian business-state relations in terms of armament supply. It then outlines events during the first year of the war, taking a critical view of competing constructs of the war and considering how these influenced decision-makers in both the private and public domains. This sets the framework for an examination of the response of business firms to the demand for shells, more shells, and their varying ability to innovate and manage changing methods of production and organisation. The outcome, a central theme of the book, was a complex and evolving trade-off between the quantity and quality of munitions supply, an issue that became particularly acute during the Battle of the Somme in 1916. This deepened the economic and political tensions between the military, the Ministry of Munitions, and private engineering contractors, as the pressure to increase output accelerated markedly in the search for victory on the Western Front. The Great War created a dual army: one in the field, the other at home producing munitions. The final section of the book examines the tensions between the two as the country strove for final victory and faced the challenges of the transition to the peacetime economy.
