Speaking of Profit William T. Rowe, 2020-10-26 In the first half of the nineteenth century the Qing Empire faced a crisis. It was broadly perceived both inside and outside of government that the prosperous age of the eighteenth century was over. Bureaucratic corruption and malaise, population pressure and food shortages, ecological and infrastructural decay, domestic and frontier rebellion, adverse balances of trade, and eventually a previously inconceivable foreign threat from the West seemed to present hopelessly daunting challenges. This study uses the literati reformer Bao Shichen as a prism to understand contemporary perceptions of and proposed solutions to this general crisis. Though Bao only briefly and inconsequentially served in office himself, he was widely recognized as an expert on each of these matters, and his advice was regularly sought by reform-minded administrators. From examination of his thought on bureaucratic and fiscal restructuring, agricultural improvement, the grain tribute administration, the salt monopoly, monetary policy, and foreign relations, Bao emerges as a consistent advocate of the hard-nosed pursuit of material profit in the interests not only of the rural populace but also of the Chinese state and nation, anticipating the arguments of self-strengthening reformers later in the century.

Bubonic Plague in Nineteenth-Century China Carol Ann Benedict, 1996 This book the first work in English on the history of disease in China traces an epidemic of bubonic plague that began in Yunnan province in the late eighteenth century spread throughout much of southern China in the nineteenth century and eventually exploded on the world scene as a global pandemic at the end of the century The author finds the origins of the pandemic in Qing economic expansion which brought new populations into contact with plague bearing animals along China's southwestern frontier She shows how the geographic diffusion of the disease closely followed the growth of interregional trading networks particularly the domestic trade in opium during the nineteenth century A discussion of foreign interventions during plague outbreaks along China's southern coast links the history of plague to the political impact of imperialism on China and to the ways in which European cultural representations of the Chinese influenced the theory and practice of colonial medicine

Different Worlds of Discourse Nanxiu Qian, Grace S. Fong, Richard Joseph Smith, 2008 During the late Qing reform era 1895-1912 women for the first time in Chinese history emerged in public space in collective groups They assumed new social and educational roles and engaged in intense debates about the place of women in China's present and future These debates found expression in new media including periodicals and pictorials which not only harnessed the power of existing cultural forms but also encouraged experimentation with a variety of new literary genres and styles works increasingly produced by and for Chinese women *Different Worlds of Discourse* explores the reform period from three interrelated and comparatively neglected perspectives the construction of gender roles the development of literary genres and the emergence of new forms of print media

The Qing Dynasty and Traditional Chinese Culture Richard J. Smith, 2015-10-23 The Qing dynasty 1636 1912 a crucial bridge between traditional and modern China was remarkable for its expansiveness and cultural sophistication This engaging and insightful history of Qing political social and cultural life traces the complex interaction between the Inner Asian traditions of the Manchus who conquered China in 1644 and indigenous Chinese cultural traditions Noted historian Richard J Smith argues that the pragmatic Qing emperors presented a Chinese face to their subjects who lived south of the Great Wall and other ethnic faces particularly Manchu Mongolian Central Asian and Tibetan to subjects in other parts of their vast multicultural empire They were attracted by many aspects of Chinese culture but far from being completely sinicized as many scholars argue they were also proud of their own cultural traditions and interested in other cultures as well Setting Qing dynasty culture in historical and global perspective Smith shows how the Chinese of the era viewed the world how their outlook was expressed in their institutions material culture and customs and how China s preoccupation with order unity and harmony contributed to the civilization s remarkable cohesiveness and continuity Nuanced and wide ranging his authoritative book provides an essential introduction to late imperial Chinese culture and society
