Regeneration Of War Torn Societies:

Regeneration of War-Torn Societies NA NA,2016-04-30 Regeneration and peacebuilding in war torn societies is a fast growing area of interest in world politics The book is an original and timely contribution to the study of post conflict transition through an examination of various aspects of regeneration and detailed analysis of examples of intent Four issues are highlighted in particular the legacies of modern conflict in the transitions to relative peace the question of ownership and accountability in the interactions between internal and external actors the need for coherent responses to regeneration the importance of case specific approaches The book s purpose is to encourage students policy makers and practitioners in governments intergovernmental organisations international and local non governmental organisations to understand and reflect on processes designed to promote social stability and relative peace and to re examine the nature of the tasks they confront and their responses The authors represent perspectives from law political economy social work development studies anthropology and international relations *Regeneration of War-torn Societies* Michael Pugh,2000 Conflict Prevention and Peace-building in Post-War Societies T. David Mason,James D. Meernik,2006-05-02 This volume provides an overview of the costs benefits consequences and prospects for rebuilding nations emerging from violent conflict The rationale for this comes from the growing realization that in the post Cold War era and in the aftermath of 9 11 our understanding of conflict and conflict resolution has to include consideration of the conditions conducive to sustaining the peace in nations torn by civil war or interstate conflict The chapters analyze the prospects for building a sustainable peace from a number of different perspectives examining the role of economic development democratization respect for human rights the potential for renewal of conflict the United Nations and other critical topics In an age when nation building is once again on the international agenda and scholars as well as policy makers realize both the tremendous costs and benefits in fostering developed democratic peaceful and secure nations the time has truly come for a book that integrates all the facets of this important subject Conflict Prevention and Peace building in Post War Societies will appeal to students and scholars of peace studies international relations security studies and conflict resolution as well as policy makers and analysts War Economies and Post-war Crime Sabine Kurtenbach,Angelika Rettberg,2020-05-21 Even when armed conflicts formally end the transition to peace is not clear cut This comprehensive volume explores the mounting evidence which suggests that it is rather unlikely to see a clean break from violence to consent from theft to production from repression to democracy or from impunity to accountability The authors analyse the complex endeavour of transitioning out of war studying how it is often interrelated with other transformations such as changes in the political regime democratisation and in the economy opening of markets to globalisation They explore how in the same way as wars and conflicts reflect the societies they befall post war orders may replicate and perpetuate some of the drivers of war related violence such as high levels of instability institutional fragility corruption and inequality This book thus suggests that even in the absence of a formal relapse into war and the re

mobilisation of former insurgents many transitional contexts are marked by the steady and ongoing reconfiguration of criminal and illegal groups and practices This book will be of great interest to students and researchers of political science and peace studies It was originally published as an online special issue of Third World Thematics The International Committee of the Red Cross and its Mandate to Protect and Assist Christy Shucksmith,2017-08-24 The purpose of this book is to consider the legality of the changing practice of the International Committee of the Red Cross ICRC It provides extensive legal analysis of the ICRC as an organisation legal person and humanitarian actor It draws on the law of organisations International Humanitarian Law International Human Rights Law and other relevant branches of international law in order to critically assess the mandate and practice of the ICRC on the ground The book also draws on more abstract human centric concepts including sovereignty as responsibility and human security in order to assess the development of the concept of humanity for the mandate and practice of the ICRC Critically this book uses semi structured interviews with ICRC delegates to test the theoretical and doctrinal conclusions The book provides a unique insight into the work of the ICRC It also includes a case study of the work of the ICRC in the Democratic Republic of Congo Ultimately the book concludes that the ICRC is no longer restricted to the provision of humanitarian assistance on the battlefield It is increasingly drawn into long term and extremely complicated conflicts in which civilians soldiers and non State actors intermingle In order to remain useful for the people on the ground therefore the ICRC is progressively developing its mandate This book questions whether on occasion this could threaten its promise to remain neutral impartial and independent Finally however it should be said that this author finds that the work of the ICRC is unparalleled on the international stage and its humanitarian mandate is a vital component for those embroiled in the undertaking of and recovery from conflict *Travelling Models in African Conflict Management* ,2014-05-01 Travelling Models offers a theoretical concept for comparative research on conflict management in Africa in processes of globalization how is change in one place related to developments in other places Why are certain issues that are important in one place taken up in other places while others are not The authors examine how the travel of models enact changes particularly in African conflict situations most often in unexpected ways They look at what happens when a model has been put into practice at a conflict site and they pay attention to the forms of social re ordering resulting from this process The authors look among others at conflict managing models of power and revenue sharing mediation freedom of expression disaster management community involvement and workshopping Contributors are Andrea Behrends Lydie Cabane Veronika Fuest Dejene Gemechu Mutasim Bashir Ali Hadi Remadji Hoinathy Mario Kr mer Sung Joon Park Tinashe Pfigu Richard Rottenburg Sylvanus Spencer and Kees van der Waal The Introduction of this volume is being offered in Open Access International Territorial Administration Ralph Wilde,2010-09-30 This is the first comprehensive treatment of the reasons why international organizations have engaged in territorial administration The book describes the role of international territorial administration and analyses the various purposes associated with this activity revealing the objectives which

territorial administration seeks to achieve *The Child in International Political Economy* Alison M.S. Watson, 2008-12-11 This pioneering volume argues for the inclusion of children and the structure known as childhood as a permanent social category worthy of continued study within the discipline of international political economy IPE Fundamentally and very simply IPE is concerned with the dynamics of interaction across the economic and political domains the relationship between the domestic and the international levels of analysis and the role of the state This book presents a convincing argument for the discussion of children within each of these areas This volume provides the first book length examination of the child within IPE draws on work from a variety of disciplines brings rich analyses to debates about the role of the child in society Contributing insights that may be fundamental to the development of IPE as a discipline *The Child in International Political Economy* will be vital reading to students and scholars of IPE Childhood Studies and International Relations *The Oxford Handbook of Peacebuilding, Statebuilding, and Peace Formation* Oliver P. Richmond, Gözim Visoka, 2021-05-31 In addition to being a major area of research within International Relations peacebuilding and statebuilding is a major policy area within the UN and other international and regional organizations It is also a concern of international financial institutions including the World Bank and a significant factor in the foreign and security policies of many established and emerging democracies Peacebuilding and statebuilding are among the main approaches for preventing managing and mitigating global insecurities dealing with the humanitarian consequences of civil wars and expanding democracy and neoliberal economic regimes Peace formation is a relatively new concept addressing how local actors work in parallel to international and national projects and helps shape the legitimacy of peace processes and state reform *The Oxford Handbook of Peacebuilding Statebuilding and Peace Formation* serves as an essential guide to this vast intellectual and policy landscape It offers a systematic overview of conceptual foundations political implications and tensions at the global regional and local levels as well as key policies practices examples and discourses underlining all segments of peacebuilding and statebuilding praxis Approaching peacebuilding from disciplinary perspectives across the social sciences the Handbook is organized around four major thematic sections Section one explores how peacebuilding statebuilding and peace formation is conceived by different disciplines and IR approaches thus offering an overview of the conceptual bedrock of major theories and approaches Section two situates these approaches among other major global issues including globalization civil society terrorism and technology to illustrate their global regional and local resonance Section three looks at key themes in the field including peace agreements democratization security reform human rights environment and culture Finally section four looks at key features of everyday and civil society peace formation processes both in theory and in practice *Determinants of Success in UN Peacekeeping Operations* Jacques L. Koko, Essoh J. M. C. Essis, 2012-06-14 This book examines 46 UN peacekeeping operations initiated from 1956 through 2006 to identify the most significant factors that could help to explain the success or lack of success of such operations *Peacebuilding* Robert Jenkins, 2013-02-15 The emergence of The United Nations

Peacebuilding Commission PBC in 2005 was the culmination of a long and contentious process. In this work Rob Jenkins provides a concise introduction that traces the origins and evolution of peacebuilding as a concept, the creation and functioning of the PBC as an institution and the complicated relationship between these two processes. Jenkins discusses how continued contestation over what exactly peacebuilding is and how its objectives can most effectively be achieved influenced the institutional design and de facto functioning of the PBC, its structure, mandate and origins. He then moves on to examine the peacebuilding architecture in action and analyses the role that the PBC has carved out for itself, reflecting on the future prospects for the organization. The theory and practice of peacebuilding has assumed increasing importance over the last decade and this work is essential reading for all students of conflict resolution, peace studies and international relations.

Palgrave Advances in Peacebuilding O. Richmond, 2010-01-20 The quality of the peace arrived at via liberal peacebuilding approaches has been poor. The related statebuilding praxis has generally been unable to respond to its critics. What is at stake is a recognition of peacebuilding's everyday political, social, economic and cultural dynamics. This indicates the emergence of a post liberal form of peace. *International Organization and Global Governance* Thomas G. Weiss, Rorden Wilkinson, 2013-10-15 Featuring a diverse and impressive array of authors, this volume is the most comprehensive textbook available for all interested in international organization and global governance. Organized around a concern with how the world is and could be governed, the book offers in depth and accessible coverage of the history and theories of international organization and global governance, discussions of the full range of state, intergovernmental and nonstate actors and examinations of key issues in all aspects of contemporary global governance. The book's 50 chapters are arranged into 7 parts and woven together by a comprehensive introduction to the field, separate section introductions designed to guide students and faculty and helpful pointers to further reading. *International Organization and Global Governance* is a self contained resource enabling readers to better comprehend the role of myriad actors in the governance of global life as well as to assemble the many pieces of the contemporary global governance puzzle. *Government-NGO Relationships in Africa, Asia, Europe and MENA* Raffaele Marchetti, 2018-04-27 This volume brings together some of the most recent scholarship on government and civil society. It examines the axis of the relationship between national governments and civil society organisations, NGOs by highlighting commonalities as well as differences among four key regions in the world. Using the stability vs instability framework, the book explores a range of pertinent issues including human rights, development, foreign policy, state building, regime change, governance frameworks, wars and civil liberties. It studies diverse situations from those entailing comprehensive cooperation to those involving politically contentious and revolutionary activities. With case studies from Africa, Asia, Europe and the Middle East and North Africa, MENA, this volume will be useful to scholars and researchers of political science, global politics, international relations, sociology, development studies, global governance and public policy as well as to those in the development sector and NGOs. *Peace on Earth* Thomas

Matyók, Maureen Flaherty, Hamdesa Tusó, Jessica Senehi, Sean Byrne, 2013-12-16 *Peace on Earth The Role of Religion in Peace and Conflict Studies* provides a critical analysis of faith and religious institutions in peacebuilding practice and pedagogy The work captures the synergistic relationships among faith traditions and how multiple approaches to conflict transformation and peacebuilding result in a creative process that has the potential to achieve a more detailed view of peace on earth containing breadth as well as depth Library and bookstore shelves are filled with critiques of the negative impacts of religion in conflict scenarios *Peace on Earth The Role of Religion in Peace and Conflict Studies* offers an alternate view that suggests religious organizations play a more complex role in conflict than a simply negative one Faith based organizations and their workers are often found on the frontlines of conflict throughout the world conducting conflict management and resolution activities as well as advancing peacebuilding initiatives

United Nations Disarmament Processes in Intra-State Conflict S. Hill, 2004-10-01 During the 1990s the United Nations was called upon to conduct unprecedented peacekeeping and humanitarian operations in order to bring peace to war torn states Essential to the resolution of these conflicts was deemed to be the disarmament of the former warring parties *United Nations Disarmament Processes in Intra State Conflict* therefore seeks to identify the most important lessons taught by the UN's experiences in disarmament and constructs an original analytical framework to explain the variation in the UN's success On this basis Stephen M Hill proffers recommendations for the UN's present and future disarmament operations

Handbook of the Sociology of the Military Giuseppe Caforio, Marina Nuciari, 2018-05-19 This new edition of the volume is presented on the wave of the success which had its first edition 2003 It is entirely updated to the current situation of the disciplines covered and expanded with particular regard to the new missions that have become the main challenge for the armed forces in these first decades of the new millennium with new insights to technological development toward so called cyborg warriors new forms of leadership and changes in soldier's identity and organisational culture It is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study Covered in this volume is a historical excursus of studies prior to contemporary research interpretive models and theoretical approaches developed specifically for this topic civic military relations including issues surrounding democratic control of the armed forces military culture professional training conditions and problems of minorities in the armed forces an examination of the structural change within the military over the years including new duties and functions following the Cold War

Mitigating Conflict Henry F. Carey, Oliver P. Richmond, 2004-08-02 This title examines the roles and new opportunities arising from the increasing participation of non governmental organizations NGOs in peace making peacekeeping and peace building processes both formal and informal state sponsored and unofficial Drawing on both academic experts and activists this study brings together contributions from those who have observed how NGOs have sought to reflect civil society concerns provide humanitarian relief monitor compliance with international norms and treaty requirements and disseminate information of concern to

advocacy networks A critical appraisal of the opportunities and constraints of NGOs is provided alongside the examination of the NGOs role in the new agendas for peace The New Bosnian Mosaic Elissa Helms,2016-02-17 Since the violent events of the Bosnian war and the revelations of ethnic cleansing that shocked the world in the early 1990s Bosnia has become a metaphor for the new ethnic nationalisms for the transformation of warfare in the post Cold War era and for new forms of peacekeeping and state building This book is unique in offering a re examination of the Bosnian case with a bottom up perspective It gathers together cultural anthropologists and other social scientists to consider the specificities of the Bosnian case However the book also raises broader questions what are the consequences of internecine violence and how should societies attempt to overcome them Are the uncertainties and the transformations of Bosnian post war society due entirely to the war or are they related to wider processes encompassing post communist Europe as a whole And are the difficulties experienced by international state building operations mainly due to distinctive features of the local societies or are they due to the policies promoted by the international community itself Post-conflict Disarmament, Demobilization and Reintegration Antonio Giustozzi,2016-04-08 This book revisits post Cold War Disarmament Disintegration and Reintegration DDR programmes in the light of previous experiences of disarmament demobilisation and reintegration In the history of North America and Europe in particular such programmes had a major impact on state building contributing to the development of the welfare state shaping political settlements and directing government policy to maintain social peace The authors in this important book ask what is left of these state building dimensions in contemporary DDR programmes and whether the constraints imposed by international organisations on DDR programmes have more negative effects than positive ones The role of political leadership in DDR processes is highlighted can bureaucratically driven processes deliver success Only if political elites take full control and manage DDR programmes can there be a lasting impact on state building Even then most political elites avoid deep changes in their relationship with the veterans Is there a chance of reshaping international intervention in such a way as to favour the development of a social contract between political elites and veterans In taking a historical perspective this book is unique in the existing literature on DDR and will be essential reading for policy makers students and scholars of conflict studies and those working in NGOs particularly donor agencies This volume was produced with the contribution of the Crisis States Research Centre LSE
