Braunstein, Gleb Mamantov, G. P. Smith, 2012-12-06 Molten salts are investigated by very diverse techniques and for different purposes and the results are reported in widely scattered journals There is a need to keep investigators aware of progress in other specialties and to provide students with source and background material Advances in Molten Salt Chemistry hopes to fill these needs by providing reviews of recent progress presented insofar as is reasonable with enough background material and commentary to be comprehensible to a nonspecialist We prefer a discussion of underlying principles to the extent that they are known and we encourage authors to comment critically on the reliability of data the utility of models and the cogency of ideas and theories We take a broad view of the suitability of topics for inclusion in this series Both fundamental and technological advances have a place here as do studies on materials related to molten salts like liquid silicates very concentrated aqueous solutions solutions of salts in liquid metals and solid electrolytes We intend this series to serve the needs of those who investigate or use molten salts We welcome suggestions of topics and suitable authors as well as comments on the strengths and shortcomings of what is published Regenerative Emf Cells: a Symposium..at the 149th Meeting of the American Chemical Society, Detroit, Mich., April 8-9, 1965 American Chemical Society, 1967 **Regenerative EMF Cells** American Chemical Society, 1967 Chemical Engineering Division Research Highlights ,1965 Advances in Chemistry Series ,1967 *Progress in High Temperature Physics and Chemistry* Carl A.
