Long Revolution:

The Long Revolution Raymond Williams, 2001-03-02 Raymond Williams whose other works include *Keywords* *The Country and the City* *Culture and Society* and *Modern Tragedy* was one of the world's foremost cultural critics. Almost uniquely, his work bridged the divides between aesthetic and socio-economic inquiry, between Marxist thought and mainstream liberal thought, and between the modern and post-modern world. When *The Long Revolution* first appeared in 1961, much of the acclaim it received was based on its prescriptions for Britain in the 60s, which form a relatively brief final section of the whole. The body of the book has since come to be recognized as one of the foundation documents in the cultural analysis of English-speaking culture. The long revolution of the title is a cultural revolution which Williams sees as having unfolded alongside the democratic revolution and the industrial revolution. With this book, Williams led the way in recognizing the importance of the growth of the popular press, the growth of standard English, and the growth of the reading public in English-speaking culture and in Western culture as a whole. In addition, Williams's discussion of how culture is to be defined and analyzed has been of considerable importance in the development of cultural studies as an independent discipline. Originally published by Chatto Windus, *The Long Revolution* is now available only in this Broadview Encore Edition. *The Long Revolution* Zelda Fichandler, 2024-03-12 Zelda Fichandler is one of the founding visionaries of the theatre movement in America. From the creation of Washington D.C.'s Arena Stage in 1950 with her husband Thomas through her later stewardship of the acting training programs at both at NYU and Juilliard, Zelda spent over sixty years speaking, writing, and observing the rise and impact of the art of theatre in the U.S. She has relentlessly questioned the very field that she, as much as anyone, created. Her essays and speeches capture both the play of her own dazzling mind and the aspirations and contradictions of the theater she pioneered. This first-ever collection of Zelda Fichandler's writings is edited by Todd London, who was personally chosen by Zelda to complete this book before she died. **The Long Revolution of the Global South** Samir Amin, 2019-04-22 The final writings of Samir Amin, a mix of personal experiences and theoretical analysis of global challenges and movements. In this second volume of his memoirs, Amin takes us on a journey to a dizzying array of countries, recounting the stages of his ongoing dialogue over several decades with popular movements struggling for a better future. As in his many works over the years, *The Long Revolution of the Global South* combines Amin's astute theoretical analyses of the challenges confronting the world's oppressed peoples with militant action. In these final writings based on his life, Amin presents us with theoretical interventions, analyses of political conjunctures, and narration of personal experiences. Amin's reminiscences of travels to places too often overlooked by the world at large are a joy to read. We even catch a glimpse of some of his memorable and sometimes not so memorable culinary adventures. **The Long Revolution** Edgar Snow, 1973

Origins and Revolutions Clive Gamble, 2007-03-26 In this study, Clive Gamble presents and questions two of the most famous descriptions of change in prehistory. The first is the human revolution when evidence for art, music, religion, and

language first appears The second is the economic and social revolution of the Neolithic period Gamble identifies the historical agendas behind origins research and presents a bold alternative to these established frameworks relating the study of change to the material basis of human identity He examines through artefact proxies how changing identities can be understood using embodied material metaphors and in two major case studies charts the prehistory of innovations asking did agriculture really change the social world This is an important and challenging book that will be essential reading for every student and scholar of prehistory

Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra

Julia Swindells, Lisa Jardine, 2018-12-07 First published in 1990 What had been left out of Left thought What had allowed the Left to substitute nostalgia for programme and action and to continue to address itself exclusively to labouring men despite insistent demands for inclusion from others notably women who recognised themselves as belonging to the Left What's Left a feminist challenge to the male dominated ideology of the Labour Party took shape under the pressure of two crucial events the third successive election defeat of Labour by the Conservative Party and the death of Raymond Williams Swindells and Jardine analyse the difficulties the Left had including women in its account of class to clarify general problems in British Left thought They conclude that there was a serious and widely perceived discrepancy between the Labour Party's model of working class consciousness and the experiences of the contemporary workforce as a whole An important exploration of the intellectual history of the Labour Movement What's Left looks critically at the Left from within the Left It will be fascinating reading for students of cultural studies history politics and women's studies
