In November 12 2002 Dr John Chambers of the NASA Ames Research Center gave a seminar to the Astrobiology Group at the

University of Washington The audience of about 100 listened with rapt attention as Chambers described results from a computer study of how planetary systems form The goal of his research was to answer a deceptively simple question How often would newly forming planetary systems produce Earth like planets given a star the size of our own sun By Earth like Chambers meant a rocky planet with water on its surface orbiting within a star's habitable zone This not too hot and not too cold inner region relatively close to the star supports the presence of liquid water on a planet surface for hundreds of millions of years the time span probably necessary for the evolution of life To answer the question of just how many Earth like planets might be spawned in such a planetary system Chambers had spent thousands of hours running highly sophisticated modeling programs through arrays of powerful computers The results presented at the meeting were startling The simulations showed that rocky planets orbiting at the right distances from the central star are easily formed but they can end up with a wide range of water content Earth seems to be quite a gem a rocky planet where not only can liquid water exist for long periods of time but where water can be found as a healthy oceanful not too little and not too much Our planet seems to reside in a benign region of the Galaxy where comet and asteroid bombardment is tolerable and habitable zone planets can commonly grow to Earth size Such real estate in our galaxy perhaps in any galaxy is prime for life And rare as well The Everything Sex Signs Book Constance Stellas, 2006-10-30 Lower your voice to seduce a Scorpio Kiss the Bull's neck to make him see red Start a fling with a Cancer at the new moon Every sun sign has its match in and out of bed In this hot new edition of the classic bestseller you'll learn the sensual secrets of the zodiac including how to Find their sexual soulmate using the author's sign compatibility quiz Act and dress to attract any sign Ravish that special someone with sign specific sexual techniques Determine the best and worst sun sign matches With in depth quizzes and descriptions of the sexual characteristics favorite fantasies and compatible matches of each sign this entertaining guide is guaranteed to heat up any couple's sex life one heavenly body at a time One Universe: Charles Tsun-Chu Liu, Neil de Grasse Tyson, Robert Irion, 1999-12-20 A new window opens onto the cosmos Almost every day we are challenged by new information from the outermost reaches of space Using straightforward language One Universe explores the physical principles that govern the workings of our own world so that we can appreciate how they operate in the cosmos around us Bands of color in a sunlit crystal and the spectrum of starlight in giant telescopes the arc of a hard hit baseball and the orbit of the moon traffic patterns on a freeway and the spiral arms in a galaxy full of stars they're all tied together in grand and simple ways We can understand the vast cosmos in which we live by exploring three basic concepts motion matter and energy With these as a starting point One Universe shows how the physical principles that operate in our kitchens and backyards are actually down to Earth versions of cosmic processes The book then takes us to the limits of our knowledge asking the ultimate questions about the origins and existence of life as we know it and where the universe came from and where it is going Glorious photographs many seen for the first time in these pages and original illustrations expand and enrich our understanding Evocative and clearly written
